

Inhaltsverzeichnis

Hauptvorträge

Stefan Jähnichen

Modelica - Modeling and simulation of technical systems..... 11

Matthias Klauda

Automotive Safety and Security from a Supplier's Perspective..... 13

Stefan Schmerler

Evolution of Functional Safety & Security in AUTOSAR..... 23

Vorträge

Oscar Slotosch, Martin Wildmoser, Jan Philipps, Reinhard Jeschull,

Rafael Zalman

ISO 26262 - Tool chain analysis reduces tool qualification costs..... 27

Daniel Kästner, Christian Ferdinand

Static Verification of Non-Functional Software Requirements in the ISO-26262... 39

Martin Wittiger, Steffen Keul

Extraktion von Interthread-Kommunikation in eingebetteten Systemen..... 55

Dirk Nowotka, Johannes Traub

MEMICS - Memory Interval Constraint Solving of (concurrent) Machine Code.. 69

David Haworth, Tobias Jordan, Alexander Mattausch, Alexander Much

Freedom from Interference for AUTOSAR-based ECUs: a partitioned AUTOSAR stack..... 85

Jörn Schneider

Why current Memory Management Units are not suited for Automotive ECUs.... 99

Klaus Becker, Christian Buckl, Alexander Camek, Rainer Falk,

Ludger Fiege, Jürgen Geßner, Stephan Sommer

SW-basierte Integration von neuen Fahrzeugfunktionen in zentralisierten Controllern..... 115

Cyrille Comar, Johannes Kanig, Yannick Moy

Integration von Formaler Verifikation und Test..... 133

Christian Berger, Sebastian Siegl

Constructive Requirements Modeling – More Reliable Implementations in a Shorter Time..... 149

Jürgen Braun, Jürgen Mottok, Christian Miedl, Dirk Geyer, Mark Minas <i>Increasing the reliability of single and multi core systems with software rejuvenation and coded processing.....</i>	163
Rasmus Adler, Sören Kemmann, Markus Schurius, Christian Allmann <i>Modellbasierte Sicherheitsanalysen im BMBF-Förderprojekt e performance....</i>	179
Marko Wolf, Michael Scheibel <i>A Systematic Approach to a Qualified Security Risk Analysis for Vehicular IT Systems.....</i>	195
Felix Jakob, Wolfgang Kremer, Andreas Schulze, Jürgen Großmann, Nadja Menz, Martin Schneider, Allain-Georges Vouffo Feudjio <i>Risk-based testing of Bluetooth functionality in an automotive environment.....</i>	211
Stefan Kriso <i>ISO 26262 - Quo vadis?.....</i>	229
