

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	III
ABSTRACT	V
Table of Contents	xiii
NOMENCLATURE	XVI
CHAPTER ONE	1
1.1. Background	1
1.2. Research Objectives	3
CHAPTER TWO	5
2.1. Materials	5
2.1.1. High-Temperature Low Sag (HTLS) conductor wire	5
2.1.2. Al-Zr alloy	6
2.1.3. Pitting Corrosion	8
2.1.4. Hydrogen Traps	12
CHAPTER THREE	23
3.1. Materials	23
3.2. Materials Characterization	29

3.2.1. Metallography	29
3.2.2. Hardness.....	30
3.2.3. Transmission Electron Microscope	30
3.3. Pitting Corrosion Characterization	31
3.3.1. Finite Element Models	34
3.4. Hydrogen Sorption and Desorption Measurement	37
3.4.1. Solution characterization.....	37
3.4.2. Sorption measurement.....	38
3.4.3. Desorption measurement.....	39
3.5. Hydrogen Permeation	40
CHAPTER FOUR	43
4.1. Materials Characterization.....	43
4.1.1. Grain Size Characterization	43
4.1.2. Precipitates Characterization	44
4.1.3. Microhardness Vickers.....	47
4.2. Electrochemical characterization.....	48
4.2.1. Pitting Corrosion	48
4.2.2 Metastable pitting behavior.....	51
4.2.2. Surface impedance behaviour	53
4.2.3. COMSOL Simulation.....	56
4.3. Hydrogen Sorption and Desorption	60
4.3.1. Linear Sweep Voltammetry.....	60
4.3.2. Charging process.....	61
4.3.3. Hydrogen Sorption Process	62

Table of Contents

4.3.4. Hydrogen Desorption Process	65
4.3.5. Ion release characterization	68
4.4. Hydrogen Permeation	69
4.4.1. Immersion test in 0.01M NaOH	69
4.4.2. Cyclic voltammetry	70
4.4.3. Permeation Time at Open Circuit Potential (OCP)	71
4.4.4. Charging and De-charging transient	73
CHAPTER FIVE	77
5.1. Discussion: Material Characterization	77
5.2. Discussion: Corrosion	79
5.2.1. Effect of Precipitates Transformation in Pitting Corrosion	79
5.2.2. Effect Al ₃ Zr precipitates on the hydrogen sorption and desorption behavior	87
5.2.3. Effect of the Al ₃ Zr structure on the effective/apparent hydrogen diffusivity coefficient ($D_{H,eff}$) of Al-0.1Zr (%wt)	93
CHAPTER SIX	97
Conclusions and Outlook	97
