

1	Introduction	1
1.1	Innovations in Health Care, the Aging Population, and Agile eHealth Usability Evaluation	2
1.2	Human-computer Interaction Relating to Universal Usability for eHealth	6
1.3	Agility in Terms of eHealth and Software Life Cycle Models	7
1.4	Research Gap and Research Questions	9
1.5	Outline of this Book	18
2	Method	21
2.1	Research Design	21
2.2	Research Phase 1: Identifying and Expert-validating Rapidly Deployable eHealth Usability Evaluation Methods	26
2.3	Research Phase 2: Development of a Toolbox for eHealth Usability Evaluations	32
2.4	Research phase 3: Applicability of Agile eHealth Usability Evaluation with Elderly Users	33
2.5	Research phase 4: Challenges of Conducting an Agile eHealth Usability Evaluation with Elderly Users	37
3	Results	39
3.1	Research Phase 1: Identification and Expert Validation of 43 Rapidly Deployable and Potentially Useful eHealth Usability Evaluation Methods	41
3.2	Research Phase 2: ToUsE—Toolbox for eHealth Usability Evaluations	47

3.3	Research Phase 3: Remote User Testing Combined With Think Aloud for Agile eHealth Usability Evaluation With Elderly Users	48
3.4	Research Phase 4: Twenty-four Recommendations for Addressing Challenges Prior to, During, and After Carrying Out the eHealth Usability Evaluation With Elderly Users	50
4	Discussion	55
4.1	Answering the Research Questions	55
4.2	Limitations	62
4.3	New Research Questions	64
5	Conclusion	65
	List of Publications	69
	Glossary	71
	Bibliography	75
