

Preface.....	VII
Figures.....	XIII
Tables.....	XIX
Abbreviations.....	XXI
Symbols.....	XXV
Abstract.....	XXVII
Kurzfassung.....	XXXI
1 Introduction.....	1
1.1 Principles of Water Injection in Spark-Ignition Engines.....	7
1.1.1 Limiting factors of Water Injection.....	11
1.1.2 Water-in-Fuel Emulsions in Gasoline Engines.....	13
1.2 Potential of Alternative Fuels towards Carbon Neutrality.....	17
1.2.1 Investigated eFuel in the Study: POSYN.....	18
2 Fundamentals of CFD Simulations for ICEs Development.....	21
2.1 The Real Working-Process Analysis.....	22
2.2 1D-CFD Simulation.....	23
2.3 3D-CFD Simulation.....	24
2.3.1 Fundamental Equations.....	24
2.3.2 Turbulence Modelling.....	27
2.3.3 Engine-Specific 3D-CFD Models.....	29
3 3D-CFD Simulation Environment: the Virtual Test Bench.....	31
3.1 The 3D-CFD Tool QuickSim.....	31
3.2 Fuel Model and Working Fluid Description.....	33
3.3 Water Description and Numerical Implementation.....	36
3.4 Combustion and Auto-Ignition Model.....	37
3.5 Injection Model.....	40
3.6 Single-Cylinder Virtual Engine Test Bench.....	42
3.7 3-Cylinder Virtual Engine Test Bench.....	44

4	Experimental Spray Analysis and 3D-CFD Injection Model Calibration	47
4.1	Experimental Setup and Methodology	47
4.1.1	Phase Doppler Anemometry (PDA)	47
4.1.2	Spray Optical Measurements	51
4.1.3	Experimental Test Matrix	52
4.2	Experimental Spray Analysis Results	55
4.2.1	Spray Optical Measurements Results	55
4.2.2	PDA Measurements Results	60
4.3	Calibration of the 3D-CFD Injection Simulations	63
4.3.1	Results of the Calibration of 3D-CFD Injection Simulations	66
5	Applicability of Water Injection in Combination with an eFuel.....	71
5.1	Investigated Fuels Modeling and Properties	72
5.2	Calibration of the 3D-CFD Single-Cylinder Engine Simulations	74
5.3	Water Injection in Combination with an eFuel for Knock Mitigation	75
5.3.1	Direct Water Injection Strategies	79
5.3.2	Indirect Water Injection Strategies	93
5.3.3	Influence of eFuel and Water Injection on Fuel Consumption	97
5.4	Water Injection with an eFuel for Exhaust Temperature Control	99
6	Water-in-Fuel Emulsions at the Virtual Engine Test Bench	107
6.1	Water-in-Fuel Emulsions Modeling	109
6.2	3D-CFD Virtual Engine Test Bench Calibration with Emulsions	111
6.3	Direct Emulsion Injection for Knock-Limited Operating Conditions	114
6.3.1	Comparison of Different Water Injection Strategies (DWI, IWI, DEI)	123

6.4	Water Injection Concepts Comparison at 2500 rpm and 15 bar IMEP	128
7	Water Injection at the 3-Cylinder Virtual Engine Test Bench	131
7.1	Knock Mitigation and Efficiency Enhancement with Water Injection	132
7.1.1	Water Injection Strategies Implementation	135
7.2	Exhaust Temperature Control by Means of Water Injection	140
7.2.1	Water Injection Strategies Implementation	140
8	Conclusion and Outlook.....	147
8.1	Experimental Spray Analysis and 3D-CFD Injection Simulations	148
8.2	Water Injection and eFuels	149
8.3	Water-in-Fuel Emulsions Direct Injection Implementation	150
8.4	Water Injection Implementation at the 3-Cylinder Engine	151
8.5	Outlooks and Possible Future Work	152
	Bibliography	153
