

Contents

Preface — V

Dedication — IX

Dibya Jyoti Bora

- 1 Medical color image enhancement:
Problems, challenges & recent techniques — 1**

Sudeep Basu, Indrajit Pan, and Siddhartha Bhattacharyya

- 2 Exploring the scope of intelligent algorithms for various community
detection techniques — 19**

Sebastian Salazar-Colores, Fernando Cervantes-Sanchez, Arturo Hernandez-Aguirre,
and Ivan Cruz-Aceves

- 3 An unsupervised graph-based approach for the representation
of coronary arteries in X-ray angiograms — 43**

Rik Das, Sourav De, and S. N. Singh

- 4 A study of recent trends in content based image classification — 65**

Arindam Mondal, Anirban Mukherjee, and Utpal Garain

- 5 Intelligent monitoring and evaluation of digital geometry figures
drawn by students — 95**

B. K. Tripathy, T. R. Sooraj, and R. K. Mohanty

- 6 Rough set and soft set models in image processing — 123**

Alokananda Dey, Sandip Dey, Siddhartha Bhattacharyya, Vaclav Snasel, and Aboul
Ella Hassanien

- 7 Quantum inspired simulated annealing technique for automatic
clustering — 145**

Mithun Roy, Indrajit Pan, and Siddhartha Bhattacharyya

- 8 Intelligent greedy model for influence maximization in multimedia
data networks — 167**

Index — 183
