
Contents

1	Introduction	1
1.1	In-time Supply of Goods for Assembly as a Success Factor	2
1.2	Research Methodology	4
1.3	Objectives and Contribution of the Four Publication within this Cumulative Dissertation	6
2	Theoretical Background for the Prediction of Missing Parts for Assembly	9
2.1	Fundamentals and Challenges of a Manufacturing Process	9
2.1.1	Design	10
2.1.2	Production Planning	11
2.1.3	Procurement	12
2.1.4	Component manufacturing	14
2.1.5	Assembly	16
2.2	Fundamentals and Challenges in Planning and Controlling a Manufacturing Process	22
3	Publication I: Approaches for the Prediction of Lead Times in an Engineer to Order Environment—a Systematic Review	27
3.1	Abstract	27
3.2	Section I: Introduction	28
3.3	Section II: Lead Time and Lead Time Prediction	30
3.4	Section III: Conducting the Review	33
3.4.1	Definition of Review Scope	33
3.4.2	Conceptualization of the Topic	34

3.4.3	Literature Search	35
3.5	Section IV: Results	37
3.5.1	Definition of the Framework	38
3.5.2	Analysis and Synthesis	40
3.6	Section V: Implications for Further Research	47
3.7	Section VI: Conclusion	48
3.8	Presentation of Own Contribution	49
4	Publication II: Impact of Material Data in Assembly Delay Prediction—a Machine Learning-based Case Study in Machinery Industry	51
4.1	Abstract	51
4.2	Section I: Introduction	52
4.3	Section II: State of the art	54
4.4	Section III: Modelling approach	57
4.4.1	Business understanding	57
4.4.2	Data understanding	61
4.4.3	Data preparation	63
4.4.4	Modeling	65
4.5	Section IV: Evaluation of model application	66
4.6	Section V: Limitations and implications for further research	69
4.7	Section VI: Conclusion	70
4.8	Appendix	71
4.9	Presentation of own contribution	74
5	Publication III: Machine Learning-based Prediction of Missing Components for Assembly—a Case Study at an Engineer-to-order Manufacturer	75
5.1	Abstract	75
5.2	Section I: Introduction	76
5.3	Section II: State of the art	77
5.4	Section III: Modelling approach	80
5.4.1	The prediction model	81
5.4.2	The data model	86
5.4.3	Training/test split and prediction time	90

5.4.4	Evaluation of the model quality	90
5.5	Section IV: Results	92
5.6	Section V: Critical reflection of results, limitations, and implications for further research	95
5.7	Section VI: Conclusion	97
5.8	Appendix	98
5.9	Presentation of own contribution	103
6	Publication IV: Predicting Supplier Delays Utilizing Machine Learning—a Case Study in German Manufacturing Industry	105
6.1	Abstract	105
6.2	Section I: Introduction	106
6.3	Section II: State of the art: Predictive Analytics in Supply Chain Management	109
6.4	Section III: Case Study	111
6.4.1	Business Understanding	113
6.4.2	Data Understanding	115
6.4.3	Data Preparation	119
6.4.4	Modelling	123
6.4.5	Evaluation and Results	125
6.5	Section IV: Discussion	130
6.6	Section V: Conclusion	132
6.7	Appendix	133
6.8	Presentation of Own Contribution	136
7	Critical Refection and Future Perspective	137
8	Summary	139
	References	141
