

Table of Contents

1st Session

Interface Phenomena of Pure Fluids under Isothermal Conditions

Chairman: J.I.D. Alexander (USA)

A. Sanz Andrés (invited lecture) .	3
Static and dynamic response of liquid bridges	
P. Concus, R. Finn	19
On accurate determination of contact angle	
R.M.S.M. Schulkes	29
Liquid bridge oscillations: analytical and numerical results	
J. Meseguer, J.M. Perales	37
Viscosity effects on the dynamics of long axisymmetric liquid bridges	
H.F. Bauer, W. Eidel	47
Vibrational behavior of amphora liquid columns in microgravity fields	

1st Poster Session

Interface Phenomena I

Chairman: C.A. Ward (Canada)

W. Eidel	61
Marangoni-convection in a non-spherical liquid drop	
G. Lebon, A. Cloot	71
Some problems raised by Marangoni instability in spherical geometry	
B. Petri, A. Delgado, H.J. Rath	81
Marangoni convection in drops under microgravity conditions	
S. Slavtchev, V. Naidenov, Zh. Kozhoukharova	91
Stationary Marangoni instability in a liquid layer due to non-isothermal gas absorption	

R. Marek, J. Straub	99
Three-dimensional transient simulation of Marangoni flow in a cylindrical enclosure under various gravity levels	
J.A. Szymczyk	111
Influence of the temperature gradient on the oscillatory instabilities of thermocapillary flow at a rotating interface	
G. Wozniak, K. Wozniak	119
Simultaneous measurement of the temperature and velocity field in thermocapillary convections of bubbles	
A. Yu. Gelfgat, B. J. Martuzans	129
Influence of the electromagnetic, g-jitter or thermocapillary forces on the stability of the stationary buoyancy convection	
N.A. Bezdenezhnykh, V.A. Briskman, A.Yu. Lapin, D.V. Lyubimov, T.P. Lyubimova, A.A. Tcherepanov, I.V. Zakharov	137
The influence of high frequency tangential vibrations on the stability of the fluid interfaces in microgravity	
V.A. Briskman, A.L. Zuev, T.P. Lyubimova, A.A. Nepomnyashchy	145
Thermocapillary flows and deformations of the surface in the systems of fluid layers with the longitudinal temperature gradient in microgravity	

2nd Session

Residual Acceleration Effects, Fluid Handling

Chairman: J. Vreeburg (The Netherlands)

G.Netter, J. Weiß (invited lecture)	155
Fluid management under micro-gravity conditions in technical applications	
J.I.D. Alexander, Y. Zhang	167
The sensitivity of a non-isothermal liquid bridge to residual acceleration	
Y. Kamotani, S. Ostrach	175
Effect of g-jitter on liquid free surfaces in microgravity	

- A. Delgado, H.J. Rath 185
Theoretical investigation of the rotating disks flow of one and two-phase fluids in microgravity

- ** S. Schneider, J. Straub 195
Transient convection caused by acceleration disturbances

3rd Session

Convection Induced by Interface-Tension-Gradients: Marangoni-Effects
Chairman: S. Ostrach (USA)

- D. Schwabe (invited lecture) 201
Experimental studies of thermal Marangoni-effects

- H. Azuma, S. Yoshihara, M. Ohnishi, T. Doi 205
Upper layer flow phenomena in two immiscible liquid layers subject to a horizontal temperature gradient

- D. Schwabe, U. Moeller, J. Schneider, A. Scharmann 213
Surface waves in a free liquid-gas interface by oscillatory Marangoni convection

- I.V. Barmin, A.S. Senchenkov, Yu.M. Gelfgat, M.Z. Sorkin 217
Thermocapillary convection in a magnetic field

- M. Treuner, A. Delgado, H.J. Rath, U. Duda, J. Szymczyk, J. Siekmann 227
Experimental investigation of the management of large-sized drops and the onset of Marangoni-convection

2nd Poster Session

Interface Phenomena II, Convective Processes, Solidification
Chairman: I.V. Barmin (USSR)

- R.M. Merritt, R.S. Subramanian 237
Bubble migration under the combined action of buoyancy and thermocapillarity

H. Nomura, M. Kono, J. Sato, G. Marks, H. Iglseder, H.J. Rath	245
Effects of the natural convection on fuel droplet evaporation	
V.I. Polezhaev, M.K. Ermakov	253
Thermal convection in microgravity during a slow rotation	
D. Strube	263
Stability of a spherical and a catenoidal liquid bridge between two parallel plates in the absence of gravity	
A. Gañán, I.G. Loscertales, A. Barrero, H. González, A. Ramos, F.M.J. McCluskey, A. Castellanos	271
Equilibrium shapes, stability and dynamical behaviour of liquid captive menisci under gravitational, centrifugal and electrical fields	
K. Nitschke, A. Thess, G. Gerbeth	285
Linear stability of Marangoni-Hartmann-convection	
J.I.D. Alexander, J. Ouazzani, S. Amiroudine, F. Rosenberger	297
Numerical analysis of the sensitivity of crystal growth experiments to spacecraft residual acceleration	
R. Balasubramaniam, L.H. Dill	307
Thermocapillary bubble migration - an Oseen-like analysis of the energy equation	
S. Xu	315
Applications of bifurcation theory to the problem of rotating liquid drops in space	
* C.F. Chen	325
Surface tension effects on the onset of double-diffusive convection	

4th Session**Combustion, Physico-Chemical Processes, Multiphase Phenomena****Chairman: P. Joulain (France)**

- M.Y. Choi, S.Y. Cho, F.L. Dryer, J.B. Haggard, Jr. (invited lecture)** 337
Computational/experimental basis for conducting alkane droplet combustion experiments on space-based-platforms
- H. Nagata, K. Ishii, S. Tomioka, M. Kono, J. Sato** 355
Ignition delay of premixed gases under microgravity conditions
- A. Sanz Andrés, J.L. Espino Granado** 363
Velocity measurement by PIV in flames
- D. Yee, J.A. Wade, C.A. Ward** 373
Stability of the vapour phase in a rotating two-phase fluid system subjected to different gravitational intensities
- O.M. Lavrentyeva, L.K. Antanovskii, G.B. Volkova, V.V. Pukhnachov, O.N. Goncharova** 381
Mathematical modelling of microsphere formation under short-time weightlessness

5th Session**Convection Induced by Interface-Tension-Gradients: Bubbles and Drops****Chairman: J. Siekmann (Germany)**

- R.S. Subramanian (invited lecture)** 393
Thermocapillary motion of bubbles and drops
- A. Crespo, J. Jiménez-Fernández** 405
Thermocapillary migration of bubbles at moderately large Reynolds numbers
- D. Langbein** 413
Drop and bubble migration at moderate Reynolds and Marangoni numbers

* Yu. S. Ryazantsev, A. Ye. Rednikov

427

Capillary effects associated with the motion of a droplet in a homogeneous medium

D. Raake, J. Siekmann, Ch.-H. Chun

435

Steady and oscillating convection phenomena caused by an air bubble beneath a heated wall

3rd Poster Session

Applications

Chairman: H. Azuma (Japan)

M.S. Bello, V.I. Polezhaev

445

Distortions of parallel flow in continuous flow electrophoresis

B. Li, S. Guo

453

Propellant management for satellite propulsion system under microgravity

A. Crespo, J. Hernández

459

Fire modelling under microgravity conditions

A.A.M. Delil

469

Thermal scaling of two-phase heat transport systems for space: predictions versus results of experiments

M. Dreyer, A. Delgado, H.J. Rath

479

Experimental study of capillary effects for fluid management under microgravity conditions

* X. Zhang

489

Microgravity liquid-gas interface configuration and surface-tension device design

Yu.M. Gelfgat, M.Z. Sorkin

503

Modelling of binary systems with a miscibility gap behaviour under weightlessness and quasi-weightlessness

R. Greger, A. Delgado, H.J. Rath	511
Measurement of the thermal conductivity of fluids with low viscosity under microgravity	

J.P.B. Vreeburg	519
Free motion of an unsupported tank that is partially filled with liquid	

F.R. Stengele, A. Delgado, H.J. Rath	529
Calibration of thermal anemometer at very low Reynolds numbers under microgravity	

6th Session

Non-Newtonian Fluid Flows, Solidification, Applications

Chairman: V.I. Polezhaev (USSR)

D. Langbein (invited lecture)	541
Particle migration at melting and solidification fronts	

T.P. Lyubimova	555
Thermal convection of non-newtonian fluids under low gravity conditions	

L.G. Badratinova, I.V. Belova, N.A. Leontiev	563
Solidification of a liquid sphere in weightlessness	

M. Liu, C. Egbers, A. Delgado, H.J. Rath	573
Investigation of density driven large-scale ocean motion under microgravity	

<u>Panel Discussion</u> (Synthesis)	583
--	-----

<u>Contributors</u>	599
----------------------------	-----

* no oral presentation
