

Table of Contents

The Past, Present and Future of the Harderian Gland

J.M. OLCESE 1

Comparative Anatomy of the Mammalian Harderian Glands

T. SAKAI 7

1 Introduction 7

2 Harderian Gland in Individual Mammalian Species 8

3 Macroscopic Anatomy of the Mammalian Harderian Gland 15

 3.1 Location and Shape of the Harderian Gland 15

 3.2 Duct of the Harderian Gland 15

 3.3 Innervation 17

 3.4 Orbital Venous Sinus 18

4 Comparative Anatomy of the Harderian Gland 18

 4.1 Mammalian Harderian Gland 18

 4.2 Harderian Gland in Mammals and Lower Vertebrates 19

References 20

Harderian Glands and Their Development in Laboratory Rats and Mice

K. SHIRAMA and M. HOKANO 25

1 Introduction 25

2 Histological Organization 25

 2.1 Secretory Epithelium 26

 2.2 Myoepithelial Cells 30

 2.3 Interstitial Connective Tissue 32

 2.4 Cytology 32

3 Secretory Products 34

 3.1 Lipids 34

 3.2 Porphyrins 34

 3.3 Melatonin 37

 3.4 Other products 38

4 Innervations	38
5 Development	39
6 Hormones	41
6.1 Gonadal Steroids	41
6.2 Thyroid Hormones	43
7 Light	44
8 Tumours and Diseases	45
9 Ocular Immune System	46
10 Conclusions	46
References	47

The Structure of the Harderian Gland of the Golden Hamster

A.P. PAYNE, J. MCGADEY, H.S. JOHNSTON	53
1 Introduction	53
2 General Features	53
3 Particular Features	54
3.1 The Epithelial Cells	54
3.1.1 The Epithelial Cells of the Male Gland	54
3.1.2 The Epithelial Cells of the Female Gland	57
3.1.3 Classification of Epithelial Cell Types	58
3.2 The Luminal Contents	58
3.3 Myoepithelial Cells	59
3.4 Interstitial Tissues	60
3.5 The Secretory Duct	61
4 Hormones and the Harderian Gland	63
5 Development of the Hamster Harderian Gland	64
6 Comparisons with Other Species and Overview	64
References	65

The Mammalian Harderian Gland: Ultrastructure, Sexual Dimorphism, and Its Regulation by Light and Steroids

M.J. NADAKAVUKAREN	69
1 Introduction	69
2 Secretory Epithelium	70
2.1 Rabbit	70
2.2 Armadillo	70
2.3 Gerbil	71
2.4 Rat	71
2.5 Mouse	72
2.6 Plains Mouse	73
2.7 Woodmouse	74
2.8 Hamster	74

3 Secretory Products	78
3.1 Lipids	78
3.2 Porphyrin	79
4 Myoepithelial Cells	80
5 Innervation	82
6 Secretory Duct	82
7 Sexual Dimorphism	84
7.1 Influence of Light	85
7.2 Regulation by Steroids	86
References	88

The Harderian Gland of Amphibians and Reptiles

G. CHIEFFI, G. CHIEFFI-BACCARI, L. DI MATTEO, M. D'ISTRIA, S. MARMORINO, S. MINUCCI, B. VARRIALE	91
1 Introduction	91
2 Embryology	91
2.1 Amphibians	91
2.2 Reptiles	92
3 Gross Anatomy	92
3.1 Amphibians	92
3.2 Reptiles	92
4 Histology and Ultrastructure	93
4.1 Amphibians	93
4.2 Reptiles	95
5 Histochemistry	100
5.1 Amphibians	100
5.2 Reptiles	100
6 Regulation of the Secretory Activity	101
6.1 Exogenous Factors	102
6.2 Endogenous Factors	103
7 Pinealectomy	103
8 Hypophysectomy	103
9 Sex Hormones	104
10 Putative Functions	105
11 Concluding Remarks	106
References	106

Morphology of the Harderian Gland in the Rabbit.

A Short Review

W. KÜHNEL	109
1 Introduction	109
2 Gross Anatomy	110

3 Morphology	110
3.1 Light Microscopy	110
3.2 Electron Microscopy	112
3.3 Innervation	116
3.4 Lipid Droplet Section	116
4 Histochemistry–Biochemistry	121
5 Conclusions	122
References	123

The Function of the Harderian Gland in the Mongolian Gerbil, *Meriones unguiculatus*

D. THIESSEN	127
1 Introduction	127
2 The Release of Harderian Gland Secretions	128
3 Chemical Communication and Harderian Gland Function	132
4 Thermoregulation and Osmoregulation	134
5 The Delicate Balance	137
References	139

Gonadal Hormones, Structure and Porphyrin Synthesis in the Rodent Harderian Gland

A.P. PAYNE, R.C. SPIKE, M.R. MOORE	141
1 Sex Differences in Porphyrin Synthesis and Gland Structure	141
2 Hormone Changes, Gland Structure and Porphyrin Synthesis	144
2.1 The Male Hamster Harderian Gland	144
2.2 The Female Hamster Harderian Gland	145
2.3 Interrelation Between Structure and Porphyrin Synthesis	149
2.4 Why Should Hormones Affect the Harderian Gland?	149
2.4.1 Because it is a gland of ectodermal origin	149
2.4.2 Because it synthesises porphyrins	149
2.4.3 Because it is a site of immune response	150
2.4.4 Because it synthesises lipids	150
2.4.5 Because it produces pheromones	151
2.5 How Can We Use This Interrelationship?	151
References	152

The Harderian Gland in Birds: Histology and Immunology

R.B. BURNS	155
1 Introduction	155
2 The Shape of the Avian Harderian Glands	155
3 Secretory Duct	156
4 Histology	156
5 Secretory Mechanism	159

6 Secretory Products	159
7 Plasma Cell and Lymphocytes	160
8 Immune Status of the Fowl Harderian Gland	160
9 Immunoglobulin Production	161
10 Specific Antibody Production	161
References	161

Porphyryns and Their Possible Significance in Harderian Glands

R.C. SPIKE, A.P. PAYNE, M.R. MOORE	165
1 Introduction	165
2 Haem Biosynthesis	165
2.1 ALA Synthase (EC 2.3.1.37)	166
2.2 ALA Dehydratase (EC 4.2.1.24)	166
2.3 PBG Deaminase (EC 4.3.1.8) and Uroporphyrinogen 3-Cosynthase (EC 4.2.1.75)	167
2.4 Uroporphyrinogen Decarboxylase (EC 4.1.1.37)	168
2.5 Coproporphyrinogen Oxidase (EC 1.3.3.3)	168
2.6 Protoporphyrinogen Oxidase (EC 1.3.3.4)	168
2.7 Ferrochelatase (EC 4.99.1.1)	168
3 Control of Haem Biosynthesis	169
3.1 The Role of ALA Synthase	169
3.2 Glycine	170
3.3 Control in Normal Subjects and in Porphyrins	170
3.4 Measurement of Porphyrins and their Enzymes	170
4 Porphyria	171
5 Porphyrin Synthesis in the Rodent Harderian Gland	172
6 Histological Appearance of Porphyrins in the Harderian Gland	173
6.1 Histological Preparation	175
6.2 Effects of Drugs	175
7 Factors Influencing Porphyrin Synthesis in the Harderian Gland	176
7.1 Species Differences	176
7.2 Age and Strain	176
7.3 Sex Differences	179
7.4 Effects of Temperature and Lighting	181
8 Harderianectomy and Porphyrin Synthesis	184
9 Porphyrins and Cancer Susceptibility	184
10 The Possible Significance of Harderian Gland Porphyrins	186
10.1 Lubrication	186
10.2 Pheromones and Thermoregulation	186
10.3 Phototransduction	186
10.4 Reproductive Function	187
References	188

Lipids in Harderian Glands and Their Significance

Y. SEYAMA, T. KASAMA, E. YASUGI, S.-H. PARK, K. KANO	195
1 Introduction	195
2 Chemical Diversity of Lipids	196
2.1 Secretory Lipids	196
2.1.1 Rabbit	196
2.1.2 Guinea Pig	198
2.1.3 Rat	199
2.1.4 Mouse	199
2.1.5 Mouse Tumour	200
2.1.6 Golden Hamster	201
2.1.7 Mongolian Gerbil	202
2.2 Nonsecretory Neutral Lipids	202
2.2.1 Rabbit	202
2.2.2 Guinea Pig	203
2.2.3 Rat	203
2.2.4 Mouse	203
2.2.5 Mouse Tumour	203
2.2.6 Golden Hamster	203
2.2.7 Mongolian Gerbil	204
2.3 Phospholipids	204
2.3.1 Rabbit	204
2.3.2 Guinea Pig	204
2.3.3 Rat	205
2.3.4 Mouse	205
2.3.5 Golden Hamster	205
2.4 Glycolipids	205
2.4.1 Guinea Pig	205
2.4.2 Rat and Mouse	206
3 Enzymes Related to Lipid Synthesis	206
3.1 Fatty Acid Synthase	206
3.2 Enzymes in the Ether-Lipid Synthesis	209
3.2.1 Dihydroxyacetone Phosphate Acyltransferase	210
3.2.2 Alkyl-DHAP Synthase	211
3.2.3 Alkylacylglycerol Acyltransferase	212
3.2.4 Alkylglycerol Phosphotransferase	212
3.2.5 Alkylglycerol-3-Phosphate Acyltransferase	212
4 Significance of Lipids in the Harderian Gland	212
References	214

Harderian Gland Indoles

A. MENENDEZ-PELAEZ, G.R. BUZZELL	219
1 Introduction	219
2 Indole Synthesis and Metabolism	219

3 Indoles in the Rodent Harderian Gland	220
3.1 Melatonin	220
3.2 Other Indoles	227
4 Indoles in the Harderian Glands of Nonrodent Species	227
5 Are Harderian Gland Indoles Secreted to Circulation?	228
6 Conclusions	230
References	231

Harderian Gland Peptides

S.M. WEBB, M. PUIG-DOMINGO, M. VIADER, E. MATO, M.-A. PIENADO	235
1 Introduction	235
2 Somatostatin	235
3 Vasoactive Intestinal Polypeptide (VIP)	237
4 Substance P	239
5 Arginine Vasopressin and Oxytocin	240
6 Neurotensin (NT), Cholecystokinin (CCK), Neuropeptide Y (NPY) and Calcitonin-Gene-Related-Peptide (CGRP)	240
7 Harderian Gland-Derived Growth Factor (HGDGF)	241
8 Thyrotropin-Releasing Hormone (TRH)	241
9 Summary	241
References	242

Adrenergic Activity in the Male Rat Harderian Gland

P. ABRUE, G. HERNANDEZ, N. FAJARDO, R. ALONSO	245
1 Introduction	245
2 Experimental Procedures	246
2.1 Animals	246
2.2 Tyrosine Hydroxylase Activity	247
2.3 Catecholamine Concentration	247
2.4 Chromatographic Conditions	248
2.5 Hormonal Determination	248
2.6 Statistical Analysis	248
3 Experimental Findings	248
4 Commentary and Conclusions	250
References	252

The Interrelationship Between the Harderian Glands and the Neuroendocrine-Thyroid Axis in Rodents

G.R. BUZZELL, A. MENENDEZ-PELAEZ	255
1 Introduction	255
2 Graves Ophthalmopathy and the Harderian Gland	255
3 Effects of the Neuroendocrine-Thyroid Axis on Harderian Glands	258
3.1 Weights, Morphology, Composition	258
3.2 Porphyrins	260
3.3 Indoles	263

4 Response of Harderian Glands to Thyrotropin and Thyroid Hormones	265
5 Effects of Harderian Glands on Thyroid Hormones	266
6 Conclusions	266
References	267

Type II 5'-Deiodinase in the Harderian Gland

M.K. VAUGHAN, J.M. GUERRERO	271
1 Introduction	271
2 Characteristics of the Type II 5'-Deiodinase Enzyme	271
3 Photoperiod and Type II 5'-Deiodinase Activity	273
References	276

The Pineal and the Harderian Glands: Evidence for Mutual Interactions

R.J. REITER, B.A. RICHARDSON	279
1 Introduction	279
2 Evidence for Harderian Gland Effects on the Pineal Gland	279
3 Evidence for Pineal Gland Effects on the Harderian Glands	286
4 Final Comment	292
References	293

The Harderian Gland as a Target for Steroid Hormone Action: Role and Characteristics of Intracellular Receptors

F. VILCHIS, B. CHÁVEZ, M.A. CÉRBON, G. PÉREZ-PALACIOS	297
1 Introduction	297
2 Genomic Mechanisms of Steroid Hormone Action	297
3 Androgen Receptors	300
4 Progesterone Receptors	306
5 Estrogen Receptors	309
6 Other Hormone Receptors	310
7 Concluding Remarks	312
