1 Introduction, Definition, and Historical Background of Picture Archiving and Communication Systems

F.P. OTTES, A.R. BAKKER, and

J.M.L. KOUWENBERG 1

1.1	Background	1
1.2	Description	3
1.2.1	Image Entry	4
1.2.2	Communication	5
1.2.3	Storage	5
1.2.4	Data Compression	6
1.2.5	Presentation	6
1.2.6	Data Base Management	7
1.2.7	Organization and Procedures	8
1.3	Genesis	8
1.4	PACS Research	9
1.4.1	Workstations	10
1.4.2	Storage Devices	11
1.4.3	Network	12
1.4.4	Teleradiology	12
1.4.5	System Integration	13
1.4.6	Standardization	14
1.4.7	Diagnostic Image Quality	14
1.4.8	Technology Assessment	14
1.4.9	PACS Manufacturers	15
1.5	Clinical Implementation and Evaluation	15
1.6	Organizations and Conferences	17
1.6.1	Organizations	17
1.6.2	Conferences	18
	References	20

2 Medical Requirements for Clinical Integration

M. OSTEAX, R. VAN DEN BROECK,

Y. TEMMERMAN, and B. WEIN 23

2.1	Introduction	23
2.1.1	The Clinical Advantages of PACS Technology	23

2.2	The Structure of Imaging Activities Within the Hospital	24
2.2.1	Some Definitions: Radiology, Diagnostic Imaging, Medical Imaging, Microscopy, Endoscopy	24
2.2.2	The Relationship Between Hospital and Its Diagnostic Imaging Activity: The AZ-Vrije Universiteit Brussels as a Case Study	26
2.2.3	Flow of Images Produced by the Radiology Department	30
2.2.4	The Different User Clusters of Diagnostic Imaging and Their Specific Needs	34
2.3	Medical Requirements in Terms of Access to Images	36
2.4	Medical Needs in Terms of Spatial Resolution	37
2.4.1	Spatial Resolution Required for Digital Thorax Radiology	38
2.4.2	Digital Skeletal Radiography	39
2.4.3	Digital Gastrointestinal Imaging	39
2.4.4	CT and MRI	40
2.4.5	Ultrasound	40
2.4.6	Conclusion	40
2.5	Medical Needs in Terms of User Friendliness	40
2.6	Medical Needs in Terms of Patient Data Consistency	41
2.7	Medical Need for Image Manipulation: Image Compression	41
	References	43
3	Looking for Indicators of a Reference Hospital H. LODDER, B.M. VAN POPPEL, and A.R. BAKKER	45
3.1	Introduction	45
3.2	Questionnaire	45
3.3	Basic Schema of Possible Indicators	46
3.4	Preliminary Results	47
3.4.1	Some Results for the Dutch Situation	47
3.4.2	First Steps Outside the Netherlands	51
3.5	Indications for Further Inquiries	52
	References	53
4	Communication Between Hospital and Radiology Information Systems and Picture Archiving and Communication Systems	55
4.1	Integrated Information Systems in the Hospital A.R. BAKKER	55

4.1.1	Background	55
4.1.2	Computers in the Hospital: The Concept of HIS	55
4.1.3	Potential Benefits of HIS: Some Examples	56
4.1.4	Objectives of an HIS	57
4.1.5	Short History of HIS	57
4.1.6	Problems Encountered in HIS Realization	58
4.1.7	Approaches to HIS Realization	58
4.1.8	Realising HIS: Choosing an Approach	60
4.1.9	Common Characteristics of HIS	60
4.1.10	Structure of HIS	61
4.1.11	IMIA Working Group 10 "Hospital Information Systems"	62
4.1.12	Main Obstacles for the Further Development of HIS	62
4.1.13	HIS and Data Protection	64
4.1.14	HIS Workload: A Case Description	66
4.2	Radiology Information Systems R. VAN DE VELDE	67
4.2.1	Introduction	67
4.2.2	PACS, HIS and RIS: Natural Couples	68
4.2.3	Radiology Information Systems	68
4.2.4	The Relationship of PACS to HIS	76
4.2.5	Distributed Radiology Systems: A Possible Architecture	77
4.3	Integration of PACS, RIS, and HIS H. LODDER, B.M. VAN POPPEL, and A.R. BAKKER	79
4.3.1	Introduction	79
4.3.2	Specifications of a Global HIPACS	83
4.3.3	Decomposition of HIPACS into its Components HIS, RIS, and PACS	89
4.3.4	Conclusions and Prospects for a Second Generation PACS Concept	96
	References	97
5	Networking	99
5.1	Image Network Technology D. MEYER-EBRECHT, A. KEIZERS, W.J.J. STUT Jr., and F. VOSSEBÜRGER	99
5.1.1	Introduction	99
5.1.2	Quantitative Requirements	100
5.1.3	Present State of LANs	104

5.1.4	Network Requirements for PACS Applications . .	107
5.1.5	ImNet: Specialized Image Network for PACS . . .	109
5.2	Network Management	
	R. MATTHEUS and J.G. TIBERGHIE	120
5.2.1	Why Network Management?	120
5.2.2	PACS Architecture	127
5.2.3	PACS Network Management Kernel	129
5.2.4	Network Model	131
5.2.5	Traffic Manager	131
5.2.6	Flow Manager	136
5.2.7	Simulator	140
5.2.8	Case Study AZ-VUB	141
5.2.9	Conclusion	144
5.3	Potential Benefits and Critical Issues of Prefetching	
	B.M. VAN POPPEL, H. LODDER, P.H. ELSAKKERS, M.L. KOENS, and A.R. BAKKER	145
5.3.1	Introduction	145
5.3.2	A Model of Prefetching	147
5.3.3	The Algorithm and its Effectiveness	152
5.3.4	Pilot Study of Potential Effectiveness in Leiden University Hospital	156
5.3.5	Design of the Prefetch Component	164
5.3.6	Suggestions for the Second Generation of PACS . .	168
	References	170
6	Digital Image Workstations	
	TH. WENDLER, K.J. MÖNNICH, and J. SCHMIDT . . .	173
6.1	Workstation Design Considerations	173
6.1.1	User Interfaces to Picture Archiving and Communication Systems	173
6.1.2	Workstation Design in the Transition to Fully Digital Imaging Departments	175
6.1.3	Methodology for the Design of User-Friendly Digital Image Workstations	179
6.1.4	Elements of Image Workstation User Interfaces	182
6.1.5	Technical Design Considerations	187
6.2	Adaptive User Interfaces for PACS Image Workstations	190

6.2.1	Why Adaptive User Interfaces?	190
6.2.2	State of the Art in Adaptive User Interface Design	191
6.2.3	Scenario for Adaptive, Co-operative PACS Workstations	193
6.2.4	Sources of Evidence for the Adaptation Process	196
6.2.5	Context-Sensitive Models of Diagnostic Information Requirements	196
6.2.6	Architectures for Implementing Adaptive PACS Workstations	205
6.2.7	Discussion and Perspective for Future Work	207
6.2.8	Acknowledgement	208
	References	209
7	Data Bases	211
7.1	Distributed Multimedia Data Base Systems D. BELL, D.H.O. LING, and I.R. YOUNG	211
7.1.1	Introduction	211
7.1.2	Starting Point	215
7.1.3	Multimedia Data Bases	226
7.1.4	An Architecture for MMIP	230
7.1.5	Linking HIS and Image Data Bases Using These Architectures	234
7.1.6	Open Issues of Working Systems	238
7.2	Distributed Image Archival C. SCHILLING, B. WEIN, and D. MEYER-EBRECHT . .	238
7.2.1	Introduction	238
7.2.2	Analysis of the Current Situation	239
7.2.3	A Generic Concept for Distributed Digital Image Archives	244
7.3	Image Indexing by Content P. KOFAKIS and S. ORPHANOUDAKIS	250
7.3.1	Introduction	250
7.3.2	Image Representation	254
7.3.3	The Object-Oriented Approach	262
7.3.4	Image Retrieval	270
7.3.5	Description of the System Model	275
7.3.6	Evaluation	287
7.3.7	Possible Enhancements of the System	288
7.3.8	Conclusions	291
