

Numerical Techniques for Boundary Element Methods

222-10966
Proceedings of the Seventh GAMM-Seminar,
Kiel, January 25-27, 1991

Edited by
Wolfgang Hackbusch

CONTENTS

H. ANTES, K. VOLK: On parallel processing in 3-D acoustic BEM	1
K. GEORGIEV: On the boundary element method realization on a transputer system	14
M. GUIGGIANI: Direct evaluation of hypersingular integrals in 2D BEM	23
C. HAACK, V. SCHLEGEL, O. MAHRENHOLTZ: Efficient algorithms for vector or parallel-computing to analyse nonlinear gravity waves with the boundary element method	35
J.J. HEIJSTEK, H. SCHIPPERS: Modal analysis of solar arrays using boundary integral equations	48
G. JENSEN: A panel method using numerical integration . . .	60
K. KALIK: On the existence and evaluation of the derivatives of the single layer potential	64
R. KIESER: The triangle-to-square transformation for finite-part integrals	72
R. KLEES: Numerical solution of the oblique derivative problem in R^3 using the Galerkin-Bubnov-method: Numerical integration, solution of the linear system of equations and the use of vector pipeline machines	79
B. KNÖPKE: The analytical integration of boundary integrals for plate bending	92
J.A. KOLODZIEJ, J. STEFANIAK, M. KLEIBER: Transient heat conduction by boundary collocation methods and FEM - a comparison study	104
X. LIN, J. BALLMANN: Computation of plane stress fields by the covering domain method	116
G. MASTROIANNI, S. PRÖSSDORF: On quadrature methods of Gauss type for singular integral equations and the airfoil equation	129
S. PRÖSSDORF, R. SCHNEIDER: Convergence of spline approximation methods for periodic elliptic pseudodifferential equations .	141
A. RÖTTGERMANN, R. BEHR, CH. SCHÖTTL, S. WAGNER: Calculation of blade-vortex interaction of rotary wings in incompressible flow by an unsteady vortex-lattice method including free wake analysis	153

E. SCHNACK: Numerical techniques for the coupling stiffness matrix of FEM and BEM	167
C. SCHWAB, W.L. WENDLAND: On the numerical integration of singular surface integrals in the BEM	177
List of participants	191
