

Contents

Overview	VII
Participants in the Project Evolution of Information Processing Systems	IX
I Basic Concept	
I.1 K. Haefner: Evolution of Information Processing – Basic Concept	1
II Contributions to the Concept of Information	
II.1 G. Kampis: Information: Course and Recourse	49
II.2 E. Laszlo: Aspects of Information	63
II.3 A. Semenov: Mathematical Aspects of PANINFORMATICA	72
II.4 G. Kampis: Process, Information Theory and the Creation of Systems	83
II.5 E. Oeser: Mega-Evolution of Information Processing Systems	103
III Information Processing Systems at the Physical Level	
III.1 M. Requardt: From “Matter-Energy” to “Irreducible Information Processing” – Arguments for a Paradigm Shift in Fundamental Physics	115
III.2 H.-W. Klement: Inorganic Matter as One of Four Levels of Natural Information Processing	136
III.3 H. Haken: The Concept of Information Seen from the Point of View of Physics and Synergetics	153
III.4 G. Nicolis: Dynamical Systems, Instability of Motion and Information Processing	169
III.5 J. Kurths, U. Feudel and W. Jansen: Pragmatic Information in Nonlinear Dynamo Theory for Solar Activity	185
IV Information Processing in Biological Systems	
IV.1 S.W. Fox: Thermal Proteins in the First Life and the “Mind-Body” Problem	203
IV.2 J. Kien: Remembering and Planning: A Neuronal Network Model for the Selection of Behaviour and its Development for Use in Human Language	229
IV.3 V. Csányi: Nature and Origin of Biological and Social Information	257

V The Evolution of Information Processing Systems at the Social Level	
V.1 E. Laszlo: Unitary Trends in Sociocultural Evolution	281
V.2 M. Pantzar and V. Csányi: The Replicative Model of the Evolution of Business Organization	288
VI The Evolution of Information Processing Systems at the Sociotechnical Level	
VI.1 K. Haefner: Information Processing at the Sociotechnical Level	307
VI.2 E. Oeser: From Neural Information Processing to Knowledge Technology	320
Epilogue	343
Bibliography	347
