

CONTENTS

0. TERMINOLOGY AND CONVENTIONS	1
CHAPTER 1. FIRST PROPERTIES	7
1. Basic spaces and maps	7
2. Prolongations and embeddings	20
3. Local finiteness and splitting	24
CHAPTER 2. AFFINE D-GROUP SCHEMES	30
1. The analytic method	30
2. The algebraic method: direct products	37
3. The algebraic method: semidirect products	43
CHAPTER 3. COMMUTATIVE ALGEBRAIC D-GROUPS	60
1. Logarithmic Gauss–Manin connection	60
2. Duality theorem	66
3. Descent. Regularity	81
CHAPTER 4. GENERAL ALGEBRAIC D-GROUPS	87
1. Local finiteness criterion	87
2. Representing the automorphism functor	91
3. Products of abelian varieties by affine groups	96
CHAPTER 5. APPLICATIONS TO DIFFERENTIAL ALGEBRAIC GROUPS	99
1. Ritt–Kolchin theory	99
2. $\Delta_{\circ}$ -groups versus algebraic D-groups	106
3. Structure of $\Delta_{\circ}$ -groups	116
4. Moduli of $\Delta_{\circ}$ -groups	123
APPENDIX A. Link with movable singularities	136
APPENDIX B. Analogue of a diophantine conjecture of S. Lang	139
APPENDIX C. Final remarks and questions	139
