

Matt Young

Optics and Lasers

Including Fibers and Optical Waveguides

Fourth Revised Edition

With 188 Figures

Springer-Verlag

Berlin Heidelberg New York

London Paris Tokyo

Hong Kong Barcelona

Budapest

Contents

1. Introduction.	1
2. Ray Optics.	5
2.1 Reflection and Refraction.	5
2.1.1 Refraction.	5
2.1.2 Index of Refraction.	6
2.1.3 Reflection.	7
2.1.4 Total Internal Reflection.	7
2.1.5 Reflecting Prisms.	8
2.2 Imaging.	9
2.2.1 Spherical Surfaces.	9
2.2.2 Object-Image Relationship.	11
2.2.3 Use of the Sign Convention.	13
2.2.4 Lens Equation.	13
2.2.5 Classification of Lenses and Images.	15
2.2.6 Spherical Mirrors.	16
2.2.7 Thick Lenses.	17
2.2.8 Image Construction.	19
2.2.9 Magnification.	20
2.2.10 Newton's Form of the Lens Equation.	22
2.2.11 Lagrange Invariant.	23
2.2.12 Aberrations.	23
Problems.	24
3. Optical Instruments.	27
3.1 The Eye (as an Optical Instrument).	27
3.2 Basic Camera.	30
3.2.1 Photographic Emulsion.	31
3.2.2 Sensitometry.	32
3.2.3 Resolving Power.	35
3.2.4 Depth of Field.	35
3.3 Projection Systems.	36
3.4 Hand Lens or Simple Magnifier.	38
3.5 Microscope.	39

3.6 Scanning Confocal Microscope.	41
3.6.1 Nipkow Disk.	42
3.7 Telescope.	43
3.7.1 Pupils and Stops.	44
3.7.2 Field Stop.	46
3.7.3 Terrestrial Telescopes.	46
3.8 Resolving Power of Optical Instruments.	47
3.8.1 Camera.	47
3.8.2 Telescope.	48
3.8.3 Microscope.	49
3.8.4 Condensers.	50
Problems.	51
4. Light Sources and Detectors.	55
4.1 Radiometry and Photometry.	55
4.1.1 Radiometric Units.	55
4.1.2 Photometric Units.	57
4.1.3 Point Source.	58
4.1.4 Extended Source.	59
4.1.5 Diffuse Reflector.	60
4.1.6 Integrating Sphere.	61
4.1.7 Image Illuminance.	63
4.1.8 Image Luminance.	65
4.2 Light Sources.	67
4.2.1 Blackbodies.	67
4.2.2 Color Temperature and Brightness Temperature.	71
4.2.3 Line Sources.	71
4.2.4 Light-Emitting Diodes (LEDs).	74
4.3 Detectors.	75
4.3.1 Quantum Detectors.	75
4.3.2 Thermal Detectors.	80
4.3.3 Detector Performance Parameters.	82
Problems.	85
5. Wave Optics.	88
5.1 Waves.	88
5.1.1 Electromagnetic Waves.	90
5.1.2 Complex-Exponential Functions.	90
5.2 Superposition of Waves.	91
5.2.1 Group Velocity.	92
5.2.2 Group Index of Refraction.	93
5.3 Interference by Division of Wavefront.	94
5.3.1 Double-Slit Interference.	94
5.3.2 Multiple-Slit Interference.	96

5.4 Interference by Division of Amplitude.	98
5.4.1 Two-Beam Interference.	98
5.4.2 Multiple-Reflection Interference.	100
5.5 Diffraction.	102
5.5.1 Single-Slit Diffraction.	104
5.5.2 Interference by Finite Slits.	106
5.5.3 Fresnel Diffraction.	107
5.5.4 Far and Near Field.	110
5.5.5 Babinet's Principle.	112
5.5.6 Fermat's Principle.	112
5.6 Coherence.	114
5.6.1 Temporal Coherence.	115
5.6.2 Spatial Coherence.	116
5.6.3 Coherence of Thermal Sources.	117
5.6.4 Coherence of Microscope Illumination.	117
5.7 Theoretical Resolution Limit.	118
5.7.1 Two-Point Resolution.	119
5.7.2 Coherent Illumination.	120
5.7.3 Diffused, Coherent Illumination.	121
5.7.4 Quasi-Thermal Source.	124
Problems.	124
 6. Interferometry and Related Areas.	 129
6.1 Diffraction Grating.	129
6.1.1 Blazing.	131
6.1.2 Chromatic Resolving Power.	131
6.2 Michelson Interferometer.	132
6.2.1 Twyman-Green Interferometer.	134
6.2.2 Mach-Zehnder Interferometer.	135
6.3 Fabry-Perot Interferometer.	136
6.3.1 Chromatic Resolving Power.	136
6.3.2 Free Spectral Range.	138
6.3.3 Confocal Fabry-Perot Interferometer.	139
6.4 Multilayer Mirrors and Interference Filters.	139
6.4.1 Quarter-Wave Layer.	139
6.4.2 Multilayer Mirrors.	140
6.4.3 Interference Filters.	140
Problems.	141
 7. Holography and Image Processing.	 143
7.1 Holography.	143
7.1.1 Off-Axis Holography.	146
7.1.2 Zone-Plate Interpretation.	147

7.1.3	Amplitude and Phase Holograms.	148
7.1.4	Thick Holograms.	149
7.2	Optical Processing.	151
7.2.1	Abbe Theory.	152
7.2.2	Fourier Series.	154
7.2.3	Fourier-Transform Optics.	157
7.2.4	Spatial Filtering.	158
7.2.5	Phase Contrast.	162
7.2.6	Matched Filter.	164
7.2.7	Converging-Beam Optical Processor.	166
7.3	Impulse Response and Transfer Function.	168
7.3.1	Impulse Response.	168
7.3.2	Edge Response.	170
7.3.3	Impulse Response of the Scanning Confocal Microscope.	171
7.3.4	Image Restoration.	173
7.3.5	Optical Transfer Function.	175
7.3.6	Coherent Transfer Function.	176
7.3.7	Diffraction-Limited Transfer Functions.	176
7.3.8	MTF of Photographic Films.	179
7.4	Digital Image Processing.	179
7.4.1	Video Camera.	179
7.4.2	Single-Pixel Operations.	180
7.4.3	Cross-Correlation.	182
7.4.4	Video Microscope.	184
7.4.5	Dimensional Measurement.	186
	Problems.	187
8.	Lasers.	192
8.1	Amplification of Light.	192
8.1.1	Optical Amplifier.	193
8.2	Optically Pumped Laser.	196
8.2.1	Rate Equations.	197
8.2.2	Output Power.	198
8.2.3	Q-Switched Laser.	198
8.2.4	Mode-Locked Laser.	200
8.3	Optical Resonators.	202
8.3.1	Axial Modes.	202
8.3.2	Transverse Modes.	204
8.3.3	Gaussian Beams.	205
8.3.4	Stability Diagram.	208
8.3.5	Coherence of Laser Sources.	209
8.4	Specific Laser Systems.	210
8.4.1	Ruby Laser.	210

8.4.2 Neodymium Laser.	212
8.4.3 Organic-Dye Lasers.	214
8.4.4 Helium-Neon Laser.	215
8.4.5 Ion Lasers.	216
8.4.6 CO ₂ Laser.	217
8.4.7 Other Gas Lasers.	218
8.4.8 Semiconductor Lasers.	218
8.5 Laser Safety.	219
8.5.1 Sunglasses.	221
Problems.	221
9. Electromagnetic and Polarization Effects.	224
9.1 Reflection and Refraction.	224
9.1.1 Propagation.	224
9.1.2 Brewster's Angle.	225
9.1.3 Reflection.	226
9.1.4 Interface between Two Dense Media.	228
9.1.5 Internal Reflection.	228
9.1.6 Phase Change.	229
9.1.7 Reflection from Metals.	231
9.2 Polarization.	231
9.2.1 Birefringence.	232
9.2.2 Wave Plates.	233
9.2.3 Glan-Thompson and Nicol Prisms.	235
9.2.4 Dichroic Polarizers.	236
9.2.5 Optical Activity.	236
9.2.6 Liquid Crystals.	237
9.3 Nonlinear Optics.	238
9.3.1 Second-Harmonic Generation.	239
9.3.2 Phase Matching.	240
9.3.3 Optical Mixing.	242
9.4 Electro-optics, Magneto-optics and Acousto-optics.	243
9.4.1 Kerr Effect.	243
9.4.2 Pockels Effect.	244
9.4.3 Electro-optic Light Modulation.	245
9.4.4 Acousto-optic Beam Deflection.	246
9.4.5 Faraday Effect.	247
Problems.	248
10. Optical Waveguides.	250
10.1 Rays in Optical Fibers.	250
10.2 Modes in Optical Waveguides.	252
10.2.1 Propagation Constant and Phase Velocity	255
10.2.2 Prism Coupler.	256

10.2.3	Grating Coupler.	257
10.2.4	Modes in Circular Waveguides.	259
10.2.5	Number of Modes in a Waveguide.	259
10.2.6	Single-Mode Waveguide.	260
10.3	Graded-Index Fibers.	261
10.3.1	Parabolic Profile.	261
10.3.2	Local Numerical Aperture.	263
10.3.3	Leaky Rays.	264
10.3.4	Restricted Launch.	265
10.3.5	Bending Loss and Mode Coupling.	267
10.4	Connectors.	268
10.4.1	Multimode Fibers.	269
10.4.2	Single-Mode Fibers.	272
10.4.3	Star Couplers.	274
	Problems.	275
11.	Optical-Fiber Measurements.	278
11.1	Launching Conditions.	278
11.1.1	Beam-Optics Launch.	279
11.1.2	Equilibrium Mode Simulator.	279
11.1.3	Cladding-Mode Stripper.	280
11.2	Attenuation.	281
11.2.1	Attenuation Measurements.	282
11.3	Fiber Bandwidth.	284
11.3.1	Distortion.	284
11.3.2	Material Dispersion.	285
11.3.3	Waveguide Dispersion.	285
11.3.4	Bandwidth Measurements.	286
11.3.5	Coherence Length of the Source.	287
11.4	Optical Time-Domain Reflectometry.	288
11.5	Index Profile.	290
11.5.1	Transverse Methods.	290
11.5.2	Longitudinal Methods.	291
11.5.3	Near-Field Scanning.	292
11.5.4	Refracted-Ray Method.	293
11.5.5	Core-Diameter Measurements.	295
11.6	Numerical-Aperture Measurements.	296
	Problems.	297
12.	Integrated Optics.	300
12.1	Optical Integrated Circuits.	300
12.1.1	Channel or Strip Waveguides.	302
12.1.2	Ridge Waveguide.	303
12.1.3	Branches.	304

12.1.4 Distributed-Feedback Lasers.	305
12.1.5 Couplers.	306
12.1.6 Modulators and Switches.	307
12.2 Planar Optical Devices.	310
12.2.1 Mode-Index Lenses.	311
12.2.2 Luneburg Lenses.	312
12.2.3 Geodesic Lenses.	313
12.2.4 Gratings.	316
12.2.5 Surface-Emitting Lasers.	319
Problems.	320
Suggested Reading Material.	323
Subject Index.	328
