

Contents

1	Introduction	1
1.1	Background	1
1.2	Systemic versus Local and Regional Hyperthermia	2
1.3	Conceptual Approaches to the Therapeutic Use of WBH	3
1.3.1	Drugs	3
1.3.2	Immunotherapy	4
1.3.3	Radiotherapy	4
1.4	Summary	5
2	Hyperthermia and the Immune System	6
2.1	Introduction	6
2.2	In Vitro Studies of Hyperthermia and Immune Effector Cells	7
2.2.1	Macrophages and Hyperthermia	8
2.2.2	Hyperthermia and NK Cells	8
2.2.3	In Vitro Hyperthermia and Biological Response Modifiers	9
2.3	In Vivo Studies: The Abscopal Response and Metastasis	10
2.3.1	NK cells In Vivo	10
2.3.2	Metastasis and Hyperthermia	11
2.4	Clinical Hyperthermia and the Abscopal Response	12
2.5	Clinical WBH and the Immune Response	13
2.6	Conclusions	15
3	WBH and Ionizing Irradiation	16
3.1	Background	16
3.2	Potential Advantages of WBH Compared to Local Hyperthermia	20
3.3	The Importance of Treatment Temperatures Used in Preclinical Studies	21
3.4	Possibly Controllable Clinical Treatment Variables	22
3.5	Clinical Investigations Combining WBH and Ionizing Irradiation	25
3.6	Summary	27

4	WBH and Chemotherapy	29
4.1	Introduction	29
4.2	Potential Mechanisms of Thermal Chemosensitization	33
4.3	Factors Which May Modify Thermal Chemosensitization	35
4.3.1	Heat-drug Sequence	35
4.3.2	Temperature	36
4.3.3	Heating Duration	37
4.3.4	Thermal Tolerance	37
4.3.5	Decreased pH and pO ₂	38
4.4	Therapeutic Index	39
4.5	Probable Thermal Sensitizing Agents	41
4.6	Future Directions for Preclinical Research	41
4.7	Clinical WBH Studies	41
5	Clinical and Biophysical Aspects of Systemic Hyperthermia	47
5.1	Thermal Regulation and WBH Methodologies	47
5.1.1	Review	47
5.1.2	WBH with a Regional Heat Boost	49
5.1.3	Electromagnetic Technology and WBH	50
5.1.4	Summary	51
5.2	Monitoring Body Site Temperature During WBH	51
5.3	Cardiorespiratory Effects of WBH	54
5.4	Biochemical Effects of WBH	58
5.5	Hematological Changes	60
5.6	Neurological Sequelae	60
5.7	Endocrine Function and WBH	61
5.8	Gastrointestinal Toxicity	62
5.9	Miscellaneous Toxicities	62
6	WBH Animal Studies	63
6.1	Introduction	63
6.2	Large Animals	63
6.3	Murine Models	63
6.4	Special Considerations	64
6.4.1	Species Differences	64
6.4.2	WBH and Metastatic Dissemination	64

Contents	IX
7 Special Considerations for the Future	65
7.1 Nononcological Considerations	65
7.1.1 Collagen Vascular Diseases	65
7.1.2 Hypothermia	65
7.1.3 Acquired Immunodeficiency Syndrome	66
7.2 Implications of WBH Research for General Medical Practice	67
7.3 Systemic Hyperthermia: Summary Reflections Regarding Neoplastic Disease	68
