

Contents

General Problems

Selected problems in heat exchanger design J. Taborek	3
Compact new formulae for mean temperature difference and efficiency of heat exchangers H. Martin	19
The multi-dimensional thermalhydraulics code TRIO applications to heat exchangers P. Mercier, M. Villand	30
Heat exchanger control by stream(s) by-pass P. J. Heggs, I.M. Abid	39

Shell and Tube Heat Exchangers

Effects of unequal transfer area in multi-pass heat exchangers P. J. Heggs, I.M. Abid	53
Variable pitch tube layout concept for shell and tube heat exchanger S. Krishnan, G.K. Sadekar	64
Design improvements of a shell and tube heat exchanger based on practical experience and numerical analysis C.W.M. van der Geld, J.M.W.M. Schoonen	74
Simple algorithms for optimization of shell and tube heat exchangers K.R. Rao, U. Shrinivasa, J. Srinivasan	88
Dispersion model for divided-flow heat exchanger W. Roetzel, Y. Xuan	98
Heat exchanger in transient conditions G. Ratel, P. Mercier, G. Icart	111

Cross-Flow Heat Exchangers

Approximate equations for the design of cross-flow heat exchangers B. Spang, W. Roetzel	125
Numerical analysis of cross-flow heat exchangers in order to establish a new design method O. Marin, S. Petrescu, N. Baran	135
Improvement of fin-tube heat exchangers by longitudinal vortex generators M. Sanchez, M. Fiebig, N.K. Mitra	144

Numerical studies of a compact fin-tube heat exchanger A. Bastani, M. Fiebig, N.K. Mitra	154
Heat transfer and pressure drop in single rows M. Beziel, K. Stephan	164
Pressure losses in tube bundles of close spacings J. Buxmann	174
Improvement of existing fuel-air heat exchangers of modern air-breathing engines V.M. Epifanov, D.V. Efremov, L.S. Yanovskiy	180
A model for predicting the performance of domestic gas-fired water heaters K.K. Yau, J.W. Rose	191
Plastic heat exchangers P. Bandelier, J.C. Deronzier, F. Lauro	201
Condition monitoring of air cooled heat exchangers R. J. Berryman	210
Plate Heat Exchangers	
Approximate theory of spiral heat exchanger Th. Bes, W. Roetzel	223
Thermal hydraulic performances of plate and frame heat exchangers - The CEPAJ software R. Vidil, G. Ratel, J.M. Grillot	233
Flow distribution in plate heat exchangers and consequences on thermal and hydraulic performances B. Thonon, P. Mercier, M. Feidt	245
Welded plate heat exchangers as refrigerants dry-ex evaporators Ch. Marvillet	255
Development of a compact heat exchanger for gas turbine heat recovery A. Bontemps, M. Brun	269
High performance titanium plate fin heat exchanger using a novel manufacturing process C.I. Adderley, J.O. Fowler	280
Regenerators	
Optimal thermal control of regenerative heat exchangers E. Van den Bulck	295
A simplified model for a helical heat exchanger for long-term energy storage in soil Y. Rabin, E. Korin, E. Sher	305

Multiphase Systems

Pressure drop during condensation in vertical tubes R. Numrich, N. Claus	317
Intensification of heat transfer in horizontal-tube vapour condensers Y.E. Trokoz, V.G. Rifert	328
Measurements and modelling: a 350 MWe power plant condenser C. Zhang, C. Dutcher, W. Cooper, K. Diab, A.C.M. Sousa, J.E.S. Venart	340
The computer aided design of steam surface condensers J. Y. Jang, J. S. Leu	362
Some comments on the use of mixed bundles of smooth and enhanced tubes in reboilers A. MacIver, B.M. Burnside	375
The heat pipe heat exchangers: design, technology and applications S. Chaudourne	386
Performance analysis and test of a two-phase closed thermosyphon heat exchanger C.S. Chang, C. Tao, R.J. Shyu	397
An application of semi-empirical turbulence theory to the hydrodynamics and heat exchange in gas-liquid foam A. Alabovsky, E. Galperin, V. Salo, N. Sulgik	407
Prediction of heat transfer rates in a liquid-liquid direct-contact heat exchanger J. Hutchins, L. Moresco, K. Pickens, E. Marschall	420
