Variants on 3-manifold invariants <i>W.B.R. Lickorish</i>	1
Fibered links which are band connected sum of two links <i>T. Kobayashi</i>	9
Geometries on 4-manifolds, Euler characteristic and elementary amenable groups <i>J.A. Hillman</i>	25
Satellites and surgery invariants <i>H.R. Morton and P.M. Strickland</i>	47
Hermitian forms on periodic modules and even- dimensional links <i>M. Farber</i>	67
Unknotting, knotting by twists on disks and property (P) for knots in S^3 <i>Y. Mathieu</i>	93
On the $Z_2 \oplus Z_2$ branched coverings of spatial K_4 -graphs <i>M. Nakao</i>	103
Geometric link homotopy invariants <i>U. Koschorke</i>	117
Projective planes in 4-sphere obtained by deform-spinnings <i>S. Kamada</i>	125
Universal abelian coverings of spatial theta-curves <i>T. Harikae</i>	133
Special hermitian forms for Seifert surfaces of boundary links and algebraic invariants <i>S. Fukuhara</i>	143

Casson's invariant for branched cyclic covers over iterated torus knots <i>A. Davidow</i>	151
Symmetry-spun tori in the four-sphere <i>M. Teragaito</i>	163
From a view of localized link theory <i>Y. Nakanishi</i>	173
Adequate links and the Jones polynomial of unlinks <i>G.T. Jin, B.K. Kim and K.H. Ko</i>	185
Chern-Simons theory, link invariants and quasi-Hopf algebras <i>E. Guadagnini, M. Martellini and M. Mintchev</i>	195
A note on incompressible surfaces in solid tori and in lens spaces <i>C.M. Tsau</i>	213
Certain abelian subgroups of two-knot groups <i>K. Yoshikawa</i>	231
Universal pretzel links <i>Y. Uchida</i>	241
Knots, spin networks and 3-manifold invariants <i>L.H. Kauffman</i>	271
The framed braid group and representations <i>K.H. Ko and L. Smolinsky</i>	289
On the decompositions of elliptic surfaces <i>M. Ue</i>	299
Symmetry groups of prime knots up to 10 crossings <i>K. Kodama and M. Sakuma</i>	323
Tangle invariants and centre of the quantum group <i>H.C. Lee</i>	341
A survey of skein modules of 3-manifolds <i>J. Hoste and J.H. Przytycki</i>	363

Representations of link groups <i>P. Vogel</i>	381
Applications of Morse theory to link theory <i>N. Habegger</i>	389
Signature invariants of homology bordism with applications to links <i>J.P. Levine</i>	395
Lusternik-Schnirelmann category of a fibered knot complement with fiber a punctured torus <i>T. Matumoto</i>	407
On 3-fold irregular branched coverings of θ_4 curves in a 3-sphere <i>S. Kinoshita</i>	417
Spherical space forms and Dehn surgery <i>S.A. Bleiler and C.D. Hodgson</i>	425
Some remarks on knots and links in spatial graphs <i>T. Kohara and S. Suzuki</i>	435
A topological invariant of spatial regular graphs <i>S. Yamada</i>	447
On local relations to determine the multi-variable Alexander polynomial of colored links <i>J. Murakami</i>	455
Almost identical link imitations and the skein polynomial <i>A. Kawachi</i>	465
3-manifolds that are unions of three handlebodies of genus at most 1 <i>J.C. Gómez-Larrañaga and W. Heil</i>	477
On a hierarchal Jones invariant <i>B.I. Kurpita and K. Murasugi</i>	489
Canonical surgery on alternating link diagrams <i>I.R. Aitchison and J.H. Rubinstein</i>	543

State models for link invariants from the classical Lie groups <i>D.A. Meyer</i>	559
Geometric structures and monodromy representations <i>Y. Moriah</i>	593
The problem of finiteness for Kleinian groups in 3-space <i>L. Potyagailo</i>	619
A calculus on links in the 3-sphere <i>J.S. Birman and W.W. Menasco</i>	625
