

Contents

Preface	vii
Chapter I. Preliminaries - Groups and Rings	1
1. Introduction to Groups	2
2. Quotient Groups and Sylow Subgroups	16
3. Finite Abelian Groups and Solvable Groups	34
4. Introduction to Rings	43
5. Factoring in $F[x]$	60
Chapter II. Field Extensions	73
1. Simple Extensions	73
2. Algebraic Extensions	88
3. Splitting Fields and Normal Extensions	97
Chapter III. The Galois Correspondence	110
1. The Fundamental Correspondence	110
2. The Solvable Correspondence	149
Chapter IV. Applications	163
1. Constructibility	163
2. Roots of Unity	173
3. Wedderburn's Theorem	181
3. Dirichlet's Theorem and Finite Abelian Groups	183
Bibliography	189
Index	191
