Chronological Table XV

Chapter 1 Universal Jointed Driveshafts for Transmitting Rotational Movements . . . 1

1.1 Early Reports on the First Joints 1
1.1.1 Hooke's Universal Joints 1
1.2 Theory of the Transmission of Rotational Movements by Hooke's Joints 5
1.2.1 The Non-uniformity of Hooke's Joints According to Poncelet 5
1.2.2 The Double Hooke's Joint to Avoid Non-uniformity 8
1.2.3 D'Ocagne's Extension of the Conditions for Constant Velocity 10
1.2.4 Simplification of the Double Hooke's Joint 10
1.2.4.1 Fenaille's Tracta Joint 12
1.2.4.2 Various Further Simplifications 14
1.2.4.3 Bouchard's One-and-a-half Times Universal Joint 15
1.2.5 Developments Towards the Plunging Joint 15
1.3 First Applications of the Science of Strength of Materials to Driveshafts 19
1.3.1 Designing Crosses Against Bending 20
1.3.2 Designing Crosses Against Surface Stress 22
1.3.3 Designing Driveshafts for Durability 26
1.4 Literature to Chapter 1 27

Chapter 2 Theory of Constant Velocity Joints 29

2.1 The Origin of Constant Velocity Joints 30
2.2 Weiss and Rzeppa Ball Joints 33
2.3 First Indirect Method of Proving Constant Velocity According to Metzner . . . 38
2.3.1 Effective Geometry with Straight Tracks 41
2.3.2 Effective Geometry with Circular Tracks 43
2.4 Second, Direct Method of Proving Constant Velocity by Orain 45
2.4.1 Polypode Joints 49
2.4.2 The Free Tripode Joint 53
2.5 Literature to Chapter 2 56

Chapter 3 Hertzian Theory and the Limits of Its Application 57

3.1 Systems of Coordinates 58
3.2 Equations of Body Surfaces 59
3.3 Calculating the Coefficient $\cos \tau$ 60
3.4 Calculating the Deformation δ at the Contact Face 63

Bibliografische Informationen
http://d-nb.info/920569307

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3.5 Solution of the Elliptical Single Integrals J_1 to J_4 . . . 67
3.6 Calculating the Elliptical Integrals K and E . . . 70
3.7 Semiaxes of the Elliptical Contact Face for Point Contact . . . 71
3.8 The Elliptical Coefficients μ and ν . . . 73
3.9 Width of the Rectangular Contact Surface for Line Contact . . . 75
3.10 Deformation and Surface Stress at the Contact Face . . . 76
3.10.1 Point Contact . . . 76
3.10.2 Line Contact . . . 77
3.11 Literature to Chapter 3 . . . 78

Chapter 4 Designing Joints and Driveshafts . . . 79

4.1 Design Principles . . . 79
4.1.1 Comparison of Theory and Practice by Franz Karas 1941 . . . 80
4.1.2 Static Stress . . . 81
4.1.3 Dynamic Stress and Durability . . . 81
4.1.4 Universal Torque Equation for Joints . . . 84
4.2 Hooke's Joints and Hooke's Jointed Driveshafts . . . 85
4.2.1 The Static Torque Capacity M_o . . . 86
4.2.2 The Dynamic Torque Capacity M_d . . . 89
4.2.3 Mean Equivalent Compressive Force P_m . . . 90
4.2.4 Approximate Calculation of the Equivalent Compressive Force P_m . . . 92
4.2.5 Dynamic Transmission Parameter CR . . . 95
4.2.5.1 Example of a Calculation for a Hooke's Jointed Driveshaft . . . 97
4.2.6 Motor Vehicle Driveshafts . . . 98
4.2.6.1 Example Showing the Calculation Methods for Hooke's Jointed Driveshafts of Commercial Vehicles . . . 101
4.2.7 Maximum Values for Speed and Articulation Angle . . . 102
4.2.8 Critical Speed and Shaft Bending Vibration . . . 104
4.2.9 Double Hooke's Joints . . . 107
4.3 Forces on the Support Bearings of Hooke's Jointed Driveshafts . . . 112
4.3.1 Interaction of Forces in Hooke's Joints . . . 112
4.3.2 Forces on the Support Bearings of a Driveshaft in the W-Configuration . 113
4.3.3 Forces on the Support Bearings of a Driveshaft in the Z-Configuration . 116
4.4 Ball Joints . . . 117
4.4.1 Static and Dynamic Torque Capacity . . . 117
4.4.2 Rzeppa Type Fixed Joints . . . 120
4.4.2.1 AC Fixed Joints . . . 121
4.4.2.2 RF Fixed Joints . . . 124
4.4.2.3 UF Fixed Joints . . . 126
4.4.3 Rzeppa-type Plunging Joints . . . 126
4.4.3.1 DO Joints . . . 126
4.4.3.2 VL Joints . . . 127
4.4.3.3 Calculation of a Driveshaft with Ball Joints . . . 128
4.4.4 Service Life of Joints Using the Palmgren/Miner Rule . . . 133
4.4.5 Example of a Calculation for the Driveshafts of a Four Wheel Drive Passenger car . . . 135
4.4.6 Weiss Type Ball Joints . . . 144
4.4.6.1 Fixed Joints . . . 144
4.4.6.2 Plunging Joints . . . 145
4.4.7 Variation of the Pressure Angle α with Articulation . . . 146
4.5 Pode Joints . . . 150
4.5.1 Bipode Plunging Joints . . . 153
4.5.2 Tripode Joints . . . 154
4.5.2.1 Static Torque Capacity of the Non-articulated Tripode Joint . . . 154

4.5.2.2 Torque Capacity of the Articulated Tripode Joint 158
4.5.2.3 Calculation for the Tripode Jointed Driveshaft of a Passenger Car 163
4.6 Basic Procedure for the Applications Engineering of Driveshafts 165
4.7 Literature to Chapter 4 168

Chapter 5 Joint and Driveshaft Configurations 170

5.1 Hooke's Jointed Driveshafts 171
5.1.1 End Connections 172
5.1.2 Hooke's Joints 176
5.1.3 Plunging Elements 179
5.1.4 Designs of Driveshaft 181
5.1.4.1 Driveshafts for Machinery and Motor Vehicles 181
5.1.4.2 Driveshafts for Steer Drive Axles 185
5.1.4.3 American Style Driveshafts 186
5.1.4.4 Driveshafts for Agricultural Machinery 190
5.1.4.5 Automotive Steering Assemblies 199
5.1.4.6 Driveshafts to DIN 808 201
5.1.4.7 Grooved Spherical Ball Jointed Driveshafts 204
5.2 Ball Jointed Driveshafts 205
5.2.1 End Connections 205
5.2.2 Ball Joints 207
5.2.2.1 Shape of the Tracks 207
5.2.2.2 Steering the Balls 210
5.2.2.3 Checking for Perturbations of Motion in Ball Joints 212
5.2.3 Rzeppa Type Fixed Joints 213
5.2.3.1 Configuration and Torque Capacity 214
5.2.3.2 Materials and Manufacture 216
5.2.3.3 Lubrication and Sealing 219
5.2.3.4 Uses and Outlook 220
5.2.4 Rzeppa Type Plunging Joints 222
5.2.4.1 Configuration and Torque Capacity 224
5.2.4.2 Materials and Manufacture 226
5.2.4.3 Sealing 227
5.2.4.4 Uses 228
5.2.5 Weiss Type Fixed Joints 231
5.2.5.1 Configuration and Torque Capacity 231
5.2.5.2 Materials and Manufacture 231
5.2.6 Weiss Type Plunging Joints 234
5.2.6.1 Materials and Manufacture 234
5.2.7 Balancing Ball Jointed Driveshafts 235
5.3 Pode Jointed Driveshafts 235
5.3.1 End Connections 237
5.3.2 GE Fixed Tripode Joints 237
5.3.3 GI Plunging Tripode Joints 239
5.3.4 Triplan Ball Joints 240
5.3.4.1 Materials and Manufacture 240
5.3.5 Tripode Jointed Driveshaft Designs 241
5.4 Design and Configuration Guidelines to Optimise the Drivetrain 243
5.5 Literature to Chapter 5 244
