

Inhaltsverzeichnis – Teil I

Aerodynamics

Macan Goes BEV. Aerodynamics of the First All-Electric Porsche SUV	3
<i>Andreas Burk</i>	
The New Porsche Taycan: Augmented Range or Enhanced Performance?	
The Choice is Yours	23
<i>Francesca Cogotti</i>	
Impact of Wheel Drive Unit Secondary Flows on the Aerodynamics	
of Passenger Cars	45
<i>Dennis Möllenbeck, Axel Fischer, and Hardy Schmidt</i>	

Automotive Electronics

OpTC – A Toolchain for Deployment of Neural Networks on AURIX	
TC3xx Microcontrollers	65
<i>Christian Heidorn, Frank Hannig, Dominik Riedelbauch,</i>	
<i>Christoph Strohmeier, and Jürgen Teich</i>	

Autonomous Driving

Towards a Data-Based Interface Definition to Support a Modular Safety	
Approval of Highly Automated Vehicles	85
<i>Alexander Blödel, Björn Klamann, and Steven Peters</i>	
Occurrence Estimation for the Classification and Prioritization of Concrete	
Scenarios in the Context of Virtual Scenario-Based Validation of Vehicles	109
<i>Julian Fuchs, Lennart Ries, and Eric Sax</i>	
Synthetic Object Placement with Statistical Representations Regarding	
Real Data Sets	124
<i>Lukas Lang and Hans-Christian Reuss</i>	
Rapid Assessment of EV Battery Without Driving the Car	138
<i>A. Richter, S. Tilgner, T. Ost, and C. Nolte</i>	

Battery

Efficient Parametrization of Electrochemical LIB Models	157
<i>Christoph Lechner, Susanne Kutschi, and Johann C. Wurzenberger</i>	

Charging & Infrastructure

Fuzzy Rule-Based Coordinated EV Charging Management	171
<i>Alia Salah, Omar Abu Mohareb, Frank Brosi, and Hans-Christian Reuss</i>	
Energy and Automotive—Do We Have Enough Sufficient electrical energy	186
<i>Ursel Willrett</i>	

Chassis Systems

Brake Feel—Objective Assessment and Potential for Virtual Development	201
<i>Raphael Groß, Anton Tworek, and Peter Pfeffer</i>	

Circularity & LCA

Managing the Complexity of Circularity in Automotive Design	211
<i>Lukas Block, Antonino Ardilio, and Lukas Keicher</i>	
An Analysis of the Greenhouse Gas Potential of Current Powertrain Technologies	221
<i>Tobias Stoll, Hans-Jürgen Berner, and André Casal Kulzer</i>	

Connected Vehicle

Accelerated Time-to-Market for Powertrain Development and Fast System Verification incl. OTA-Updates	243
<i>DI Wolfgang Weisser, Dr. Peter Ebner, and DI Stefan Eder</i>	

Cyber Security

A New Perspective in Automotive Cybersecurity Principles and Practices of Security Chain Strategy	259
<i>Huiru Ma and Bernd Reh</i>	
Zonal Architecture and HW-Driven Protections for Software-Defined Vehicles	268
<i>Dr.-Ing. Lara N. Popova and Markus Maier</i>	

Automotive Cybersecurity: Level up Your Product Risk Management!	277
<i>Théo Tamisier and Robin Huber</i>	

Data Science & AI

Mobility Enabled by AI: How to Benefit from Recent Advancements in AI	289
<i>Ulrich Bodenhausen</i>	
Accelerate Autonomous Vehicle (AD) Development with Data-driven Automotive AI	297
<i>Frank Kraemer</i>	
Scalable Measurement Data Acquisition for ADAS Development	306
<i>Thomas Schöpfner and Patrick Nickel</i>	
OPTIMALIS® – An AI Framework Tailor-Made for the Needs of the Automotive Industry	311
<i>Frank Beutenmüller, Victor Fäßler, Patrick K.S. Vaudrevange, and Thomas Wolf</i>	

Development Methods

A Digital Machine-Executable V-Model for a Formula Student Racing Car	325
<i>Julian Borowski and Stephan Rudolph</i>	
Impact of Electrification and Digitalization on the Development Methodology and Testing Technology	336
<i>Stefan Geneder and Günter Hohenberg</i>	
Dynamic Offset- and Drift Compensation in Powertrain Test Benches	351
<i>Mathias Jaksch and Hans-Christian Reuss</i>	
Measuring Internal Energy with Force	360
<i>Daniel Puscher and Hans Christian Reuss</i>	
Creation and Usage of Virtual Control Units (V-ECUs) in SIL and HIL for Development and Validation especially for Software-Defined-Vehicles (SDVs)	371
<i>Martin Ruehl and Fabian Bronner</i>	
Investigation of Digital Potentiometer Networks for Precise and Digital Calibration of Resistive Sensors in Wheatstone Bridges	384
<i>Ralf Sauerwald, Lukas Brandl, and Hans Christian Reuss</i>	

Reduction of the Carbon Footprint in Automotive Filtration Applications
by means of Alternative Materials and Optimized Product Design 395
*Lars Spelter, Sven Grebhardt, Christian Schweikl, Markus Hirt,
Martin Veit, Alexander Kilian, and Thilo Müller*

Fiber Segment Interferometry for Automotive Strain, Shape and EV
Battery Temperature Testing 410
*Michael D. Summers, Filippo Rossi, Jack Waller, Kristopher Statham,
and Marian Gragert*

Autorenverzeichnis 423
