

Table of Contents

Part I Invited Lectures

Advanced Laser Diagnostics: Implications of Recent Results for Advanced Combustor Models. By R.W. Bilger.....	3
Combustion Research for the 21st Century - Some Speculative Extrapolations. By F.J. Weinberg.....	17

Part II Experiments and Calculations of Combusting Flows

Transition of Turbulent Premixed Flame Structure with Turbulence Reynolds Number and Damkohler Number. By A. Yoshida, Y. Ando, M. Narisawa and H. Tsuji.	31
Laser Velocity and Density Measurements of a Flat Counter Flow Diffusion Flame. By J.C. Rolon, V. Veynante, J.P. Martin, G. Jakob, E. Domberger and F. Durst.	47
Investigation of a Combustion Zone Behind a Wedge. By P. Bruel, P. Blazart, B. Deshaies, M. Champion, S. Duplantier and L. Sramek.	75
The Influence of Swirl Generator Characteristics on Flow and Combustion in Turbulent Diffusion Flames. By B. Mundus, and H. Kremer.....	89
Flame Diagnostics by Pure Rotational CARS. By A. Leipertz, E. Magens, T. Seeger and H. Spiegel.	105
Thermometry Inside a Swirling Turbulent Flame, CARS Advantages and Limitations. By C. Cahen, P. Bellaiche and D. Garreton.	119
A Unified Model of Mean Reaction Rate in Turbulent Premixed Flames. By M. Katsuki, Y. Mizutani, T. Yoshida and T. Yasuda.	133
A Simple Reaction Mechanism for Soot Formation in Non-Premixed Flames. By R.P. Lindstedt.	145

Part III Two Phase Flows

Droplet Vaporization Law in Non-Dilute Sprays. By H.H. Chiu.	159
Experimental Investigation of the Reduction of Burning Rate Due to a Finite Spacing Between Droplets. By N. Roth, K. Anders and A. Frohn.	175
Blue Flame Combustion in a Jet-Mixing-Type Spray Combustor. By H. Hiroyasu, M. Arai, K. Nakamori and S. Nakaso.	185
The Influence of Upstream Prevaporization on Flame Extinction of One-Dimensional Dilute Sprays. By C.-C. Liu and T-H. Lin.	197

Part IV Unsteady Flows

Control of Oscillations in Ducted Premixed Flames. By E.N. Hendricks, S. Sivasegaram and J.H. Whitelaw.	215
Catalytic Ignition Model in a Monolithic Reactor with In-Depth Reaction. By T.-C. Tien and J.S. T'ien.....	231
Combustion of Heavy Fuel Oils in a Rijke Type Pulse Combustor with a Tangential Injection Stream. By T. Bai, S. Shani, B.R. Daniel and B.T. Zinn.	245
Matching of Fuel Injection Equipment to Diesel Engines. By R. Ziarati and V. Veshagh.	265

Part V Gas Turbine Combustors

The Turbulence and Mixing Characteristics of the Complex Flow in a Simulated Augmentor. By Y.-C. Chao, J. H. Leu, T. H. Yang and C. -K. Lin.....	279
Scalar Characteristics in a Liquid-Fuelled Combustor with Curved Exit Nozzle. By S.K. Chow and J.H. Whitelaw.	291
Structure of the Primary Region of a Model Gas Turbine Combustor. By S. Nakamura, K. Hyodo and O. Kawaguchi.	301

Development of Gas Turbine Combustors for Low BTU Gas. By I. Fukue, S. Mandai and M. Inada.	317
Measurements of Gas Composition and Temperature Inside a Can Type Model Combustor. By W.P. Jones and A. Tober.	327
Numerical Model for Predictions of Reverse Flow Combustor Aerothermal Characteristics. By P. Di Martino, E. Narciso and G. Cinque.	339
