Preface

O. Braun-Falco, H. C. Korting, H. I. Maibach V

Introduction

O. Braun-Falco XIX

General Considerations

Percutaneous Absorption and Conventional Penetration Enhancers

H. Loth 3

Lipid Flow Phenomena Between Liposomes, Lipoproteins and Cell Membranes; Applications in Drug Delivery

G. L. Scherphof, K. Maruyama, M. van Borssum Waalkes, D. Hoekstra, J. Damen, S. J. Kennel, L. Huang 11

Basic Principles of Liposomes for Drug Use

G. P. Martin, A. W. Lloyd 20

Chemical Aspects

Phospholipids as Basic Ingredients

A. Blume 29

Liposome Dermatics:

Chemical Aspects of the Skin Lipid Approach

P. W. Wertz 38

Ceramides for Liposomes	
<i>R. R. Schmidt</i>	44
Liposome Phospholipids:	
Toxicological and Environmental Advantages	
<i>M. J. Parnham</i>	57

Physico-chemical Aspects

Liposome Production: Historic Aspects	
<i>Y. Barenholz</i>	69
Rationale for the Production and Dermal Application of Lipid Vesicles	
<i>G. Cevc</i>	82
Liposome Production: The Ethanol Injection Technique and the Development of the First Approved Liposome Dermatic	
<i>R. W. Kriftner</i>	91
Liposome Production: The Sizing-Up Technology Starting from Mixed Micelles and the Scaling-Up Procedure for the Topical Glucocorticoid Betamethasone Dipropionate and Betamethasone	
<i>H. G. Weder</i>	101
Properties and Characterization of Pre-Liposome Systems	
<i>J. Röding</i>	110

Technological Aspects

Changes in the Structure of the Human Stratum Corneum Induced by Liposomes	
<i>J. A. Bouwstra, H. E. J. Hofland, F. Spies, G. S. Gooris, H. E. Junginger</i>	121
Monitoring in vivo Skin Hydration by Liposomes Using Infrared Spectroscopy in Conjunction with Tape Stripping	
<i>H. E. Boddé, L. A. R. M. Pechtold, M. T. A. Subnel, F. H. N. de Haan</i>	137
Liposome Dermatics: Assessment of Long-Term Stability	
<i>K. Thoma, U. E. Jocham</i>	150

Delivery of Liposome-Encapsulated Agents to Artificial Membranes	
<i>J. Kreuter</i>	167

Topical Delivery of Liposomally Encapsulated Ingredients Evaluated by In Vitro Diffusion Studies	
<i>K. Egbaria, N. Weiner</i>	172

Pre-Clinical Aspects: Kinetics and Toxicology

The Fate of Liposomes in Animal Skin	
<i>J. Röding, C. Artmann</i>	185

The Fate of Liposomes for Topical Use in Skin Tissue Culture	
<i>M. H. Schmid</i>	195

Liposomally Encapsulated Active Ingredients Penetrate Through the Follicle	
<i>L. M. Lieb, C. Ramachandran, N. Weiner</i>	200

Biodisposition of Liposome-Encapsulated Active Ingredients Applied on the Skin	
<i>M. Mezei</i>	206

Distribution of Liposome-Encapsulated Ingredients in Human Skin Ex Vivo	
<i>W. Wohlrab, J. Lasch, R. Laub, C. M. Taube, K. Wellner</i>	215

Liposomes as Safe Carriers of Drugs and Vaccines	
<i>C. R. Alving</i>	226

Pre-Clinical Aspects: Dynamics

Comedolytic Activity of a Liposomal Antiacne Drug in an Experimental Model	
<i>A. Meybeck</i>	235

Topical Delivery of Liposomally Encapsulated Interferon Evaluated by in Vitro Diffusion Studies and in a Cutaneous Herpes Guinea Pig Model	
<i>N. Weiner, K. Egbaria, C. Ramachandran</i>	242

Comparative Activity of a Liposomal and a Conventional Econazole Preparation for Topical Use According to a Guinea Pig Tinea Model <i>H. Hänel, B. Braun, N. Jovic</i>	251
---	-----

Liposome-Encapsulated Enzymes for DNA Repair <i>D. B. Yarosh</i>	258
---	-----

Patent and Regulatory Aspects

General Remarks on Patent Matter <i>H.-G. Sternagel</i>	273
--	-----

Liposome Dermatics to Come According to the Patent Literature <i>P. Blecher</i>	281
--	-----

Clinical Regulatory Aspects of Topical Liposomal Drugs with Special Consideration of Safety Aspects <i>A. Zesch</i>	288
--	-----

Clinical Aspects

Clinical Trial Protocols for Anti-Inflammatory and other Liposome Dermatics <i>M. Schäfer-Korting</i>	299
--	-----

Chemical Composition of Liposomes and Its Influence on the Humidity of Normal Skin <i>M. Ghyczy</i>	308
--	-----

Influence of Various Topical Liposome Preparations With and Without Active Ingredients on the Cutaneous Blood Flow <i>W. Gehring, M. Klein, M. Gloor</i>	315
---	-----

Increased Activity and Tolerability of a Conventional Glucocorticoid in a Liposomal Form <i>H. C. Korting</i>	320
--	-----

Influence of Liposomal Encapsulation on the Activity of a Herbal Non-Steroidal Anti-Inflammatory Drug <i>M. J. Kerscher</i>	329
--	-----

Future Prospects

Past, Present and Future of Liposome Cosmetics	
<i>A. Meybeck</i>	341
Liposomes in Drug Delivery: Present and Future	
<i>G. Gregoriadis</i>	346
Subject Index	353
