

Contents

Code Selection

Code Selection by Regularly Controlled Term Rewriting <i>Helmut Emmelmann</i>	3
Tree Automata for Code Selection <i>Christian Ferdinand, Helmut Seidl and Reinhard Wilhelm</i>	30
Considerate Code Selection <i>Robert Giegerich</i>	51
Discussion: Code Generator Specification Techniques <i>Chris Fraser, John Boyland and Helmut Emmelmann</i>	66

Code Generation for Parallel Architectures

Scheduling Vector Straight Line Code on Vector Processors <i>C. W. Keßler, W.J. Paul and T. Rauber</i>	73
Compiling for Massively Parallel Machines <i>Michael Philippsen and Walter F. Tichy</i>	92
Discussion: Parallelism <i>Walter F. Tichy and Michael Philippsen</i>	112

Register Allocation and Phase Ordering

A Quantitative Algorithm for Data Locality Optimization <i>François Bodin, William Jalby, Daniel Windheiser and Christine Eisenbeis</i>	119
Phase Ordering of Register Allocation and Instruction Scheduling <i>Stefan M. Freudenberger and John C. Ruttenberg</i>	146

Formal Methods

From Programs to Object Code using Logic and Logic Programming <i>Jonathan Bowen</i>	173
An Approach to Automatic Proof Support for Code Generator Verification <i>Bettina Buth and Karl-Heinz Buth</i>	193
The Semantics and Syntax of Update Schemes <i>Hugh Osborne</i>	210

Additional Topics

Attributed Transformational Code Generation for Dynamic Compilers <i>John Boyland, Charles Farnum and Susan L. Graham</i>	227
The RTL System: A Framework for Code Optimization <i>Ralph E. Johnson, Carl McConnell and J. Michael Lake</i>	255
Systems for Late Code Modification <i>David W. Wall</i>	275
The Design of a Back-end Object Management System <i>A. Asthana, H. V. Jagadish and P. Krzyzanowski</i>	294
Author Index	321
