1	Introduction	1
1.1	Presentation of a Catalogue of Criteria	1
1.2	Organization of the Survey	4
2	Traditional Distributed File Systems	7
2.1	Alpine	7
2.2	Andrew File System (AFS)	8
2.3	Cedar File System (CFS)	11
2.4	Coda	13
2.5	Extended File System (EFS)	14
2.6	HARKYS	15
2.7	IBIS	16
2.8	Network File System (NFS)	18
2.9	Remote File Sharing (RFS)	20
2.10	S-/F-UNIX	21
2.11	Spritely NFS	22
2.12	VAXcluster	23
2.13	Xerox Distributed File System (XDFS)	24
3	Object-Oriented Distributed File Systems	27
3.1	DOMAIN	27
3.2	Helix	28
3.3	SWALLOW	29
4	Traditional Distributed Operating Systems	31
4.1	Accent	31
4.2	Cambridge Distributed Computing System (CDCS)	32
4.3	Charlotte	34
4.4	DEMOS/MP	35
4.5	DIOS	36
4.6	Distributed Academic Computing Networking OS (DACNOS)	38
4.7	DUNE	39
4.8	DUNIX	40
4.9	Freedomnet	41

4.10	HERMIX	43
4.11	JASMIN	44
4.12	LOCUS	45
4.13	MACH	47
4.14	Multicomputer Operating System (MOS)	48
4.15	Newcastle Connection	49
4.16	PULSE	53
4.17	QuickSilver	54
4.18	Research Oriented Distributed Operating System (RHODOS)	55
4.19	Saguaro	57
4.20	Sprite	58
4.21	V	60
4.22	WANDA	61
4.23	Wisdom	63
5	Object-Oriented Distributed Operating Systems	65
5.1	Alpha	65
5.2	Amoeba	68
5.3	Argus	70
5.4	BirliX	71
5.5	CHORUS	73
5.6	Clouds	75
5.7	Cronus	77
5.8	Cosmos	78
5.9	Eden	79
5.10	Gothic	81
5.11	Grenoble Universities Integrated Distributed Environment (Guide)	82
5.12	Gutenberg	84
5.13	MARUTI	85
5.14	NEXUS	88
5.15	Process Execution And Communication Environment (PEACE)	90
5.16	Profemo	91
5.17	Prospero	92
5.18	SOMIW Operating System (SOS)	94
6	Closely Related Systems	97
6.1	Athena	97
6.2	Avalon	99
6.3	DAPHNE	100
6.4	DASH	101
6.5	Emerald	102
6.6	Enchère	104
6.7	Galaxy	104

6.8	Global, Active and Flexible File Environment Study (GAFFES)	106
6.9	Grapevine	107
6.10	Heterogeneous Computer System (HCS)	108
6.11	Incremental Architecture for Distributed Systems (INCAS)	109
6.12	ISIS	111
6.13	Medusa	114
6.14	Meglos	115
6.15	Mirage	116
6.16	Network Computing Architecture/System (NCA/NCS)	118
6.17	Plan 9	119
6.18	Psyche	120
6.19	Server Message Block Protocol (SMB)	122
6.20	Symunix	123
6.21	Synthesis	124
6.22	α -Kernel	126

7 Table of Comparison **129**

8	Related Projects	141
8.1	Acorn	141
8.2	Agora	141
8.3	Amber	141
8.4	Arachne	142
8.5	Arca	142
8.6	Arcade	142
8.7	Archons (ArchOS)	143
8.8	Argos	143
8.9	Arjuna	144
8.10	Boston Community Information System (BCIS)	144
8.11	Camelot	145
8.12	Carnegie Mellon Central File System (CMCFS)	145
8.13	Choices	145
8.14	Circus	145
8.15	Clearinghouse	145
8.16	Cocanet	146
8.17	Computing System for Societies of Agents (CSSA)	146
8.18	CONIC	147
8.19	Customer Information Control System (CICS)	147
8.20	Datacomputer	147
8.21	Deceit	147
8.22	DEMOS	148
8.23	DFS 925	148
8.24	DISTRIX	148

8.25 Dragon Slayer	148
8.26 Echo	148
8.27 Encompass	149
8.28 Felix	149
8.29 Ficus	149
8.30 FileNet	150
8.31 Firefly	150
8.32 Generic File System (GFS)	151
8.33 Helios	151
8.34 HERON	151
8.35 Intelligent Distributed Resource Processing System (IDRPS)	152
8.36 Interim File System (IFS)	152
8.37 Language for Distributed Systems (LADY)	152
8.38 Lynx	153
8.39 Management of Distributed Systems (MANDIS)	153
8.40 Melampus	154
8.41 Meta	155
8.42 MICROS	155
8.43 MODOS	156
8.44 Munin	156
8.45 Network Workstations (NEST)	156
8.46 Networked Resource Discovery Project (NRDP)	157
8.47 NonStop	157
8.48 Onyx	157
8.49 PHARROS	158
8.50 Presto	158
8.51 R*	158
8.52 Rapport	158
8.53 RNFS	159
8.54 Rochester's Intelligent Gateway (RIG)	159
8.55 ROE	159
8.56 Roscoe	159
8.57 RSS	160
8.58 RT PC Distributed Services	160
8.59 S/Net's Linda Kernel	160
8.60 Sesame	160
8.61 StarOS	160
8.62 STORK	161
8.63 Thoth	161
8.64 TimixV2	161
8.65 Topaz (Taos)	161
8.66 Transparent Integrated Local and Distributed Environment (TILDE)	162
8.67 Transparent Remote File System (TRFS)	162

8.68 Trollius (Trillium)	162
8.69 Universal Poly-Processor with Enhanced Reliability (UPPER)	163
8.70 Woodstock File Server (WFS)	163
8.71 Xcode	163
8.72 Z-Ring File Server	164
Bibliography	165
