

Contents

Introduction	11
<i>S. Arhangel'skii</i>	
Divisibility and cleavability	13
<i>A. Bella</i>	
A couple of questions concerning nowhere constant continuous functions	27
<i>H. L. Bentley</i>	
Strict extensions of T_1 -spaces	33
<i>H. L. Bentley and H. Herrlich</i>	
Compactness = completeness $\cap$ total boundedness - a natural example of a non-reflective intersection of reflective subcategories	46
<i>R. Börger</i>	
How to make a path injective	57
<i>G. C. L. Brümmer</i>	
Completions of functorial topological structures	60
<i>G. Castellini, J. Kosłowski, and G. E. Strecker</i>	
Categorical closure operators via Galois connections	72
<i>S. Dolecki and R. Peirone</i>	
Topological semigroups of every countable sequential order	80
<i>E. Eichhorn</i>	
Felix Hausdorff - Paul Mongré: Some aspects of his life and the meaning of his death	85
<i>P. Eklund and W. Gähler</i>	
Contributions to fuzzy convergence	118
<i>R. Frič</i>	
On completions of rationals	124
<i>S. Gähler and W. Gähler</i>	
Generalized topologies generated by distance functions	130
<i>W. Gähler</i>	
Monadic topology - a new concept of generalized topology	136
<i>U. Höhle</i>	
On the equivalence between β -algebras and compact Hausdorff spaces in the framework of Łukasiewicz logic	150
<i>S. S. Hong</i>	
Simple extensions of frames	156
<i>M. Hušek</i>	
History and development of Hausdorff's work in extension in metric spaces	160
<i>J. Juhász</i>	
The cardinality and weight-spectrum of a compact space	170
<i>H. Kleisli and H.-P. Künzi</i>	
Topologies on totally convex spaces	176

<i>H.-P. Künzi</i>	
Minimal order compactifications and quasi-uniformities	181
<i>D. Leseberg</i>	
Superconvergence spaces and related topics	187
<i>H. Lord</i>	
Factorizations and disconnectednesses	197
<i>R. Lowen and K. Robeys</i>	
Products of metric spaces	203
<i>E. Lowen-Colebunders</i>	
Hausdorff separation for Cauchy spaces	212
<i>E. Michael</i>	
Selection theorems with and without dimensional restrictions	218
<i>J. Nagata</i>	
A survey of dimension theory V	223
<i>R. Nakagawa</i>	
Separation axioms for fuzzy topological spaces	236
<i>L. D. Nel</i>	
Effective categories of complete separated spaces	242
<i>C. Pedicchio</i>	
On Grothendieck quasi-topoi	252
<i>H. Poppe</i>	
On Hausdorff convergence of graphs of functions	256
<i>J. Porter</i>	
Hausdorff-closed extensions and Tychonoff	261
<i>G. Preuß</i>	
Semiuniform limit spaces and semi-Cauchy spaces	268
<i>H.-Ch. Reichel</i>	
Distance-functions and g -functions as a unifying concept in the theory of generalized metric spaces	279
<i>G. Richter</i>	
Algebraically behaved categories of ordered Hausdorff spaces	287
<i>S. Salbany and S. Romaguera</i>	
The Hausdorff extension theorem for distance spaces	293
<i>F. Schwarz</i>	
Hulls of classes of "gestufte Räume"	299
<i>V. Trnková</i>	
Rigid points and rigidity-creating properties	303
<i>P. Vojtás</i>	
Topological cardinal invariants and the Galois-Tukey category	309
List of Participants	315
List of Talks	318
