## SECTION I. Background Papers

### 1. The Dietary Fibre Hypothesis: A Historical Perspective

<i>D.A.T. Southgate .....</i>	<i>3</i>
Introduction .....	3
Developments in the Chemistry and Analysis of Food	
Carbohydrates: Early Studies on the Chemistry of Foods	4
Concerns about the Energy Value of Foods .....	4
Studies on the Chemistry of Plant Cell Walls .....	5
Nutritional Studies on Food Carbohydrates .....	5
The Impact of New Techniques on the Study of Carbohydrates	7
The Energy Values of Carbohydrates in the Human Diet .....	8
Studies on the Analysis of Fibre .....	8
Dietary Fibre as a Protective Component of the Diet .....	9
The Dietary Fibre Hypothesis Emerges .....	10
Initial Responses to the Hypothesis .....	11
Major Themes in the Initial Development of the Dietary Fibre	
Hypothesis .....	13
Definition and Analysis .....	13
Studies with Isolated Polysaccharides .....	14
Dietary Fibre as a Source of Energy .....	14
Mechanism of Faecal Bulking .....	15
The Status of the Dietary Fibre Hypothesis .....	16
Commentary .....	19

### 2. Physico-chemical Properties of Food Plant Cell Walls

<i>J.-F. Thibault, M. Lahaye and F. Guillou .....</i>	<i>21</i>
Introduction .....	21
Ion-Exchange Properties .....	21
The Ionic Groups Associated with Fibres .....	22
Methods of Cation-Exchange Capacity Determination .....	23
The Cation-Exchange Capacity Values .....	23
Determination of pK .....	25

Hydration Properties .....	26
Hydration Properties of Polysaccharides .....	26
Methods for the Determination of Hydration Characteristics ...	27
Variations of the Hydration Value .....	29
Examples of Hydration Value .....	31
Adsorption of Organic Molecules .....	32
Effect of Processing .....	33
Grinding .....	33
Chemical Treatments .....	33
Heat Treatment .....	34
Conclusions .....	34

### **3. Physico-chemical Properties of Food Polysaccharides**

<i>E.R. Morris</i> .....	41
Introduction .....	41
Structure and Shape of Polysaccharide Chains .....	41
Order and Disorder .....	42
Inter-residue Linkage Patterns and Ordered Packing .....	43
Hydrated Networks .....	45
Polysaccharide "Weak Gels" .....	47
Hydrodynamic Volume of Disordered Polysaccharide Chains ...	47
Coil Overlap and Entanglement .....	48
Shear-Rate Dependence of Viscosity .....	50
Implications for Digesta Viscosity .....	51
Transport and Release of Nutrients .....	53
Susceptibility to Digestive Enzymes and Colonic Fermentation ...	54
Conclusions .....	54
Commentary .....	55

### **4. Dietary Fibre Analysis**

<i>N.-G. Asp, T.F. Schweizer, D.A.T. Southgate and O. Theander</i>	57
Classification of Carbohydrates in Foods as Related to Dietary	
Fibre Analysis .....	57
Principal Criteria for Classification .....	58
Degree of Polymerisation .....	58
Classification of the Polysaccharides .....	58
Recommendations for Nomenclature for use in the	
Classification of Carbohydrates in Nutritional Studies ...	61
The Definition of Dietary Fibre: A Determinant of Analytical	
Strategy .....	62
Main Features of Analytical Strategies .....	63
Implications for the Choice of Analytical Methods for the	
Carbohydrates in Foods .....	64
Criteria for the Choice of Method: The Conflict Between the	
Requirements of Research and Regulation .....	65
Development of Crude Fibre, Detergent Fibre and Enzymatic	
Methods .....	65
Crude Fibre .....	66
Detergent Fibre Methods .....	67

Enzymatic Methods .....	67
The Method of Asp et al. ....	69
The AOAC Method .....	69
The Various Steps in Enzymatic Gravimetric Methods .....	70
Comparison of Methods .....	72
Other Current Gravimetric Methods .....	72
The Southgate Method for Unavailable Carbohydrates .....	73
Principles .....	74
Performance .....	74
Limitations .....	75
Analysis of Individual Components of Dietary Fibre .....	75
Determination and Chemical Characterisation of Total Dietary Fibre by the Uppsala Methodology .....	77
Analysis and Characterisation of Soluble and Insoluble Dietary Fibre .....	79
Main Features of the Method of Englyst et al. ....	79
Alternatives for the Determination of Dietary Fibre Constituents .....	82
Collaborative Studies .....	85
Studies under Review and Performance Criteria .....	85
Total Dietary Fibre with Gravimetric Methods .....	89
Non-starch Polysaccharides with the Englyst Procedures ....	90
Separate Measurement of Insoluble and Soluble Dietary Fibre .....	91
Inter-method Comparisons .....	91
Summary and Conclusions .....	93
Note Added in Proof .....	99
The MAFF IV Study .....	99
The AOAC Method .....	100
Commentary .....	100

## 5. Gastro-intestinal Physiology and Function

<i>N.W. Read and M.A. Eastwood</i> .....	103
Introduction .....	103
How Do Non-starch Polysaccharides Reduce Absorption of Nutrients in the Small Intestine? .....	103
How Does Increasing the Viscosity of Gastro-intestinal Contents Delay Absorption? .....	103
Unresolved Issues .....	107
Can Non-starch Polysaccharides Reduce Absorption by Mechanisms Other than Increasing the Viscosity of Gastro-intestinal Contents? .....	109
Effects on the Colon .....	112
Increased Stool Output .....	112
Transit Time .....	113
Laxative Action of Sequestered Bile Acids and Fatty Acids	113
Direct Irritant Effect of Particles .....	113
Gas Formation .....	114
How does the Colon Adapt to Fibre? .....	115

## 6. Bacterial Fermentation in the Colon and Its Measurement

<i>C.A. Edwards and I.R. Rowland</i> .....	119
Introduction .....	119
Fermentation .....	119
Colonic Bacteria .....	119
Carbohydrate Fermentation by Gut Bacteria .....	120
Dietary Fibre .....	120
Oligosaccharides .....	122
Resistant Starch .....	122
Mucins and Mucopolysaccharide .....	122
Enzymes Involved in Polysaccharide Degradation .....	123
Fermentation Products .....	123
Short Chain Fatty Acids .....	123
Products of Protein and Amino Acid Degradation .....	124
Gaseous Products .....	125
Measurement of Colonic Fermentation In Vivo .....	125
Human Models .....	125
Patients with Colostomies .....	127
Faecal Analysis .....	127
Animal Models .....	127
Measurement of Colonic Fermentation In Vitro .....	128
Static In Vitro Systems .....	129
Continuous and Semi-continuous Culture Systems .....	130
Studies of Carbohydrate Fermentation .....	131
Conclusions .....	132
Commentary .....	136

## 7. Metabolism and Utilisation of Short Chain Fatty Acids

### Produced by Colonic Fermentation

<i>C. Rémésy, C. Demigné and C. Morand</i> .....	137
Background .....	137
Metabolism of SCFA by the Digestive Tract .....	137
Comparison of SCFA and Glucose Absorption .....	139
Hepatic Metabolism of SCFA .....	139
Acetate Metabolism .....	141
Propionate Metabolism .....	142
Butyrate Metabolism .....	144
Extrasplanchnic Metabolism of Acetate .....	145
SCFA and Lipid Metabolism .....	145
Energy Aspects .....	146
Conclusion .....	147
Commentary .....	150

## SECTION II. Physiological Effects

### 8. The Influence of Dietary Fibre on Protein Digestion and Utilisation

<i>B. O. Eggum</i> .....	153
Introduction .....	153

Experiments with Rats .....	154
Conclusion from Experiments with Rats .....	157
Experiments with Pigs .....	157
Conclusion from Experiments with Pigs .....	159
Experiments with Humans .....	159
Conclusion from Experiments with Humans .....	161
General Conclusion .....	161
 <b>9. The Influence of Dietary Fibre on Lipid Digestion and Absorption</b>	
<i>I. T. Johnson</i> .....	167
Introduction .....	167
Digestion and Absorption of Dietary Fat .....	167
Inhibition of Lipolytic Activity .....	169
Formation and Composition of Micelles .....	171
Effects of Fibre on Intraluminal Lipid Transport .....	172
The Cellular Phase: Adaptation to Prolonged Fibre Intake .....	174
Conclusions .....	176
Commentary .....	179
 <b>10. The Influence of Dietary Fibre on Carbohydrate Digestion and Absorption</b>	
<i>B. Flourié</i> .....	181
Introduction .....	181
Acute Effects of Dietary Fibre on Factors Affecting Digestion and Absorption of Carbohydrates .....	182
Influence of Dietary Fibres on Gastric Emptying .....	182
Influence of Dietary Fibres on Small Intestinal Digestion and Absorption .....	185
Chronic Effects of Dietary Fibre on Factors Affecting Digestion and Absorption of Carbohydrates .....	190
Conclusion .....	192
Commentary .....	196
 <b>11. The Influence of Dietary Fibre on Mineral Absorption and Utilisation</b>	
<i>L. Rossander, A.-S. Sandberg and B. Sandström</i> .....	197
Introduction .....	197
Methodological Considerations in Studies on Mineral Absorption in Humans .....	197
Effects of Fibre and Fibre-Associated Compounds on Mineral Absorption in Humans .....	198
Effect of Non-starch Polysaccharides and Lignin .....	198
Effect of Fibre-Associated Compounds .....	199
Mineral Absorption from Fibre-Rich Diets .....	204
Interactions Between Dietary Components .....	205
The Significance of the Phytate Content in the Diet .....	206
The Influence of Food Processing on Mineral Absorption .....	207
Extrusion Cooking .....	207

Soaking and Malting .....	207
Fermentation .....	208
The Possibility of Predicting Absorption Using In Vitro and Animal Models .....	208
In Vitro Studies .....	208
Animal Models .....	210
Conclusions .....	210
Points of Consensus .....	210
Implementation of Present Knowledge by the Food Industry and Legislative Bodies .....	211
Areas for Future Research .....	211
Commentary .....	216

## **12. Dietary Fibre and Bile Acid Metabolism**

<i>F.M. Nagengast</i> .....	217
Introduction .....	217
Bile Acid Metabolism .....	217
Colonic Carcinogenesis .....	218
Fibre .....	218
Fat .....	219
Dietary Fibre and Bile Acid Metabolism .....	219
Fibre and Biliary Bile Acids .....	220
Fibre and Faecal Bile Acids .....	223
Conclusions .....	228

## **13. Faecal Bulking and Energy Value of Dietary Fibre**

<i>E. Wisker and W. Feldheim</i> .....	233
Introduction .....	233
Faecal Bulking Effect of Dietary Fibre .....	233
Physico-chemical Properties .....	234
Personality Factors .....	235
Mechanisms of Action .....	235
Conclusions .....	236
Energy Value of Dietary Fibre .....	236
Estimation of the Digestible and Metabolisable Energy of Dietary Fibres .....	237
Calculation of the Metabolisable Energy of Fibre-Rich Diets .....	241
Commentary .....	246

## **SECTION III. Prevention and Treatment of Disease**

### **14. Dietary Fibre in the Prevention and Treatment of Gastro-intestinal Disorders**

<i>K. W. Heaton</i> .....	249
Introduction .....	249
Sliding Hiatus Hernia .....	249
Duodenal Ulcer .....	250
Gallstones .....	250
Crohn's Disease .....	252

Appendicitis .....	252
Constipation .....	253
Irritable Bowel Syndrome .....	255
Diverticular Disease of the Colon .....	256
Cancer of the Large Bowel .....	257
Conclusions .....	259
Commentary .....	263
<b>15. Dietary Fibre in the Prevention and Treatment of Obesity</b>	
<i>S. Rössner</i> .....	265
Introduction .....	265
Fibre Trial Design Problems in Obesity .....	265
Indicators of Success of Obesity Treatment .....	267
Dietary Fibre in Obesity .....	268
Dietary Fibre and Energy Intake .....	269
Effects of Dietary Fibre on Hunger, Appetite, Satiation and Satiety .....	270
Effects of Dietary Fibre on Weight Loss .....	271
Dietary Fibre in the Prevention of Obesity .....	273
Dietary Fibre, Obesity and Hypertension .....	273
Conclusions .....	274
Commentary .....	276
<b>16. Dietary Fibre in the Prevention and Treatment of Diabetes Mellitus</b>	
<i>M. Berger and A. Venhaus</i> .....	279
Introduction .....	279
Different Glycaemic Responses of Foods .....	279
Metabolic Effects of Fibre .....	280
Studies with Soluble Fibre .....	281
Insoluble Fibre and High-Carbohydrate, High-Fibre Studies .....	281
Acceptability of High-Carbohydrate, High-Fibre Diets .....	283
No Direct Effects of Fibre in Diabetes Treatment? .....	283
Evidence Suggesting Starch as the Responsible Factor for Different Glycaemic Responses .....	284
Effects of Thermal Processing and Starch Characteristics .....	284
Mechanical Processing and "Antinutrients" .....	285
Studies Including Fibre and the Effect of Processing .....	286
Conclusions and Areas for Future Research .....	287
Commentary .....	292
<b>17. Dietary Fibre and Plasma Lipids: Potential for Prevention and Treatment of Hyperlipidaemias</b>	
<i>A.S. Truswell and A.C. Beynen</i> .....	295
Introduction .....	295
Wheat Fibre .....	296
Pectin .....	298
Guar .....	303
Oat Fibre .....	309
Cellulose .....	316

<b>Lignin</b> .....	317
<b>Other Types of Dietary Fibre</b> .....	317
<b>Legumes</b> .....	318
<b>Whole Foods</b> .....	322
<b>Discussion</b> .....	323
<b>Conclusion</b> .....	324
<b>Commentary</b> .....	332
<b>General Discussion</b> .....	333
<b>Subject Index</b> .....	349
