

**ESO WORKSHOP ON
HIGH RESOLUTION
SPECTROSCOPY
WITH THE VLT**

Garching, 11–13 February 1992

PROCEEDINGS

Edited by M.-H. Ulrich

June 1992

Table of Contents

Foreword

Summary Talks

<i>J.M. Beckers:</i> High Resolution Spectroscopy with the VLT: Summary of Experimental Aspects	1
<i>D.L. Lambert:</i> Scientific Requirements for High-Resolution Spectroscopy with the VLT	11

High Resolution Spectroscopy Observations

<i>B. Gustafsson:</i> Why High Spectral Resolution - Even at Low Signal/Noise?	17
<i>D.L. Lambert:</i> Stellar Evolution, Nucleosynthesis and High-Resolution Spectroscopy	23
<i>R.J. Boyle, D.E. Jennings, D. Deming, G. Bjoraker, T. Kostiuk, G. Wiedemann:</i> High Resolution Spectroscopy in the Thermal Infrared	39
<i>P.E. Nissen:</i> High Resolution Spectroscopy of Very Metal-Poor Stars	49
<i>D. Dravins:</i> High Resolution Spectroscopy of Stellar Velocity Signatures	55
<i>D. Baade:</i> Early-Type Stars at High Spectral Resolution	67
<i>M.S. Bessell:</i> High Resolution Spectroscopy in the Magellanic Clouds and in Nearby Galaxies	75
<i>G. Wiedemann:</i> Study of Carbon Monoxide Infrared Lines in Late-Type Stars	83
<i>J.-P. Maillard, G.F. Mitchell:</i> Interstellar Chemistry: the Environment of Massive Young Stellar Objects	87
<i>R. Ferlet:</i> High Resolution Spectroscopy of the Interstellar Medium	97
<i>L. Hartmann:</i> High Resolution Spectroscopy of Young Stellar Objects	105
<i>T. Encrenaz, M. Combes, O. Saint-Pé:</i> Solar-System Infrared Observations at High Spectral Resolution	115
<i>E.J. Wampler:</i> Narrow Absorption Lines in Quasars	127
<i>B. Artamonov:</i> Spectral Observation of Hot Spots in Galaxies M82, NGC 3077, NGC 2976 with the Echelle Spectrometer of the 6-m Telescope	131
<i>H.U. Käufl, L. Stanghellini:</i> Spectroscopy of SiO in Envelopes of Late-Type Stars	135
<i>S.A. Levshakov:</i> Time Variation of the Fine-Structure Constant: Bounds Available from High-Resolution Spectroscopy of QSOs	139
<i>A. Ardeberg, H. Lindgren, I. Lundström, E. Maurice:</i> Sodium as a Probe of the Interstellar Medium	143
<i>P. Molaro, M. Dennefeld, S. D'Odorico, R. Ferlet, S. Monai, A. Vidal-Madjar, G. Vladilo:</i> The Interstellar Medium at High Resolution towards Bright LMC Stars	147

<i>R. Pallavicini, L. Pasquini, S. Randich:</i> High-resolution Optical Spectroscopy of Cool Stars	151
<i>S. Randich, R. Gratton, R. Pallavicini:</i> High-resolution Spectrum Synthesis Analysis of Late-type Spectroscopic Binaries	155
<i>F. Spite, M. Spite, P. François:</i> The Lithium Primordial Abundance and the VLT	159
<i>M. Spite, P. François, F. Spite:</i> Chemical Evolution of the Magellanic Clouds	163
<i>K.G. Strassmeier:</i> Stellar Atmosphere Inhomogeneities from High-Resolution Spectroscopy	167
<i>G. Tagliaferri, S. Randich, R. Pallavicini, G. Cutispoto:</i> High Resolution Spectroscopy of Stellar X-ray Sources	171
<i>G. Tautvaisiene:</i> Spectral Investigation of Suspected Red Horizontal Branch Stars	175
<i>J.P. Maillard, R. Viotti, A. Altamore:</i> First FTS Observations of η Car	179
<i>R. Viotti, A. Altamore, C. Rossi, G.B. Baratta, A. Damineli Neto:</i> The Role of High Resolution Spectroscopy of the Near-IR Spectrum of Normal and Peculiar Stars	183
<i>G. Vladilo, M. Centurion, C. Cassola:</i> High Resolution Observations of the CH ⁺ Interstellar Molecule as a Probe of the ¹² C/ ¹³ C Galactic Gradient	187

Instrumentation for High Resolution Spectroscopy

<i>S. D'Odorico:</i> Options for High Resolution Spectroscopy at Optical Wavelengths at the ESO VLT	193
<i>A.F.M. Moorwood, G. Wiedemann:</i> Options for High Resolution Infrared Spectroscopy at the ESO VLT	203
<i>S.T. Ridgway, K.H. Hinkle:</i> Strategies for Very High Resolution Infrared Spectroscopy	213
<i>S.S. Vogt:</i> HIRES: A High Resolution Echelle Spectrometer for the Keck Ten-Meter Telescope	223
<i>M.J. Andersen, J. Andersen:</i> Possible Design Features of a UV-Near Infrared VLT High-Resolution Spectrograph	235
<i>J.P. Maillard:</i> Update on the FTS Project for the VLT	239

Components for High Resolution Spectroscopy

<i>F. Merkle:</i> Adaptive Optics Techniques	245
<i>G. Avila, N. Hubin:</i> Optical Efficiency at the VLT Incoherent Combined Focus	255
<i>H. Dekker, J. Hoose:</i> Very High Blaze Angle (R4) Echelle Mosaic	261
<i>F. Diego, I. Crawford, M. Barlow, A. Fish, M. Dryburgh:</i> Ultra-High Resolution Facility for the UCL Echelle Spectrograph	267

<i>R.G. Bingham, D.D. Walker, F. Diego: Extending the Wavelength Coverage of Spectrographs</i>	271
<i>A.P. Hatzes, W.D. Cochran: Spectrograph Requirements for Precise Radial Velocity Measurements</i>	275
<i>R. Bhatia, A. Ciani: Active Control of Spectrum Drifts in Spectrographs</i>	279
<i>A.C. Danks, B. Woodgate, R. Kimble: STIS (Space Telescope Imaging Spectrograph) - its Technology</i>	283
<i>N.G. Douglas, F.J. van Hoesel: A Non-Scanning Interferometer with Postdisperser</i>	289
<i>R. Gratton, R. Bhatia: Theory of the Post Dispersed Fourier Transform Spectrograph</i>	293
<i>E. Le Coarer, Y. Georgelin, S. Bensammar: Pythéas: a Multi-Channel Spectrometer for the Analysis of Astronomical Images</i>	297
<i>D.D. Walker, R.G. Bingham, F. Diego, A. Radley: Echelle Spectrographs for 8m Telescopes</i>	301
<i>G. Wiedemann: Immersion Gratings for High-Resolution Infrared Spectroscopy</i>	305
List of Participants	309
