Editors

Molecular Approaches to Fundamental and Applied Entomology

With 59 Illustrations

Springer-Verlag

New York Berlin Heidelberg London Paris
Tokyo Hong Kong Barcelona Budapest

Contents

Series Preface	v
Preface	vii
Contributors	xiii
1. <i>Drosophila</i> as a Tool for Investigating the Molecular Genetics of Insecticide Resistance RICHARD H. FFRENCH-CONSTANT, RICHARD T. ROUSH, and FLERIDA A. CARIÑO With 2 Figures	1
2. Naturally Occurring Insecticidal Molecules as Candidates for Genetic Engineering KEITH C. BINNINGTON and VALERIE J. BAULE	38
3. Genetic Engineering of Baculoviruses for Insect Control JUSTINUS M. VLAK With 10 Figures	90
4. Insect Viruses: New Strategies for Pest Control PETER D. CHRISTIAN, TERRY N. HANZLIK, DAVID J. DALL, and KARL H. GORDON With 4 Figures	128
5. Molecular Methods for Insect Phylogenetics ROSS H. CROZIER With 4 Figures	164

6. Molecular Population Genetics of <i>Drosophila</i> CHARLES F. AQUADRO With 5 Figures	222
7. The Regulation of Cellular Pattern Formation in the Compound Eye of <i>Drosophila melanogaster</i> RICK G. TEARLE, TREVOR J. LOCKETT, WAYNE R. KNIBB, JEREMY GARWOOD, and ROBERT B. SAINT With 8 Figures	267
8. Molecular Genetics of Sex Determination in <i>Drosophila</i> <i>melanogaster</i> JOHN M. BELOTE With 7 Figures	292
9. Molecular Genetics of Complex Behavior: Biological Rhythms in <i>Drosophila</i> C.P. KYRIACOU With 6 Figures	329
10. Molecular Analysis of Insect Meiosis and Sex Ratio Distortion TERRENCE W. LYTTLE, CHUNG-I WU, and R. SCOTT HAWLEY With 7 Figures	357
11. Strategies and Tools for Extending Molecular Entomology Beyond <i>Drosophila</i> STEPHEN C. TROWELL and PETER D. EAST With 1 Figure	407
12. Prospects and Possibilities for Gene Transfer Techniques in Insects DAVID A. O'BROCHTA and ALFRED M. HANDLER With 5 Figures	451
Index	489
