Preface	V
Part I: The Matrix	1
1 Poly(Ether Ether Ketone) Characterization	3
<i>D. Daoust, J. Devaux, P. Godard, A. Jonas, and R. Legras</i>	
Abstract	3
1 Introduction	3
2 Synthesis, Solubility, and Sulphonation of PEEK	5
3 Spectroscopic Characterization of PEEK and Sulphonated PEEK ..	15
4 Molecular Mass and Distribution Determination	35
Conclusion	52
Acknowledgments	53
References	54
2 PEEK Degradation and Its Influence on Crystallization Kinetics	57
<i>A. Jonas and R. Legras</i>	
Abstract	57
1 Introduction	57
2 Thermal Stability of Molten PEEK in an Oxidative Atmosphere	58
3 Thermal Stability of Molten PEEK in Inert Atmosphere	63
Conclusion	79
Acknowledgments	79
References	80
3 Assessing the Crystallinity of PEEK	83
<i>A. Jonas and R. Legras</i>	
Abstract	83
1 Introduction	83
2 Density Determination of the Degree of Crystallinity of PEEK	84
3 Differential Scanning Calorimetry Determination of the PEEK Degree of Crystallinity	87
4 Infrared Absorption Spectroscopy Determination of the Degree of Crystallinity of PEEK	94
5 Limitations of the Two-Phase Crystallinity Concept for PEEK	99

Conclusion	106
Acknowledgments	107
References	107
4 The Physical Structure and Mechanical Properties of Poly(Ether Ether Ketone)	111
<i>P.-Y. Jar and Ch.J.G. Plummer</i>	
Abstract	111
1 Introduction	111
2 The Microstructure of PEEK	112
3 The Mechanical Properties of Bulk Samples	121
4 Microdeformation Behaviour in Thin Films	129
Conclusions	137
Acknowledgments	138
References	138
5 Structure and Mechanical Properties of Other Advanced Thermoplastic Matrices and Their Composites	141
<i>P. Davies and Ch.J.G. Plummer</i>	
Abstract	141
1 Introduction	141
2 Case Studies	146
Conclusions	166
Acknowledgments	166
References	166
Part II: Evaluation of the Composites	171
6 The Short-Term Properties of Carbon Fibre PEEK Composites	173
<i>W.J. Cantwell and P. Davies</i>	
Abstract	173
1 Introduction	173
2 Comparison of the Mechanical Properties of Carbon Fibre PEEK with Other High Performance Composites	174
3 A More Detailed Characterization of the Mechanical Properties of Carbon Fibre PEEK	180
References	190

7 Long-Term Properties of Aromatic Thermoplastic Continuous Fibre Composites: Creep and Fatigue	193
<i>D.R. Moore</i>	
Abstract	193
1 Introduction	193
2 Materials	194
3 Creep	196
4 Fatigue	208
5 Other Thoughts on Long-Term Properties	224
Acknowledgments	225
References	225
 8 Structure and Mechanical Properties of Filled and Unfilled Thermotropic Liquid Crystalline Polymers	 227
<i>Ch.J.G. Plummer</i>	
Abstract	227
1 Introduction	227
2 Injection Mouldings	231
3 Mechanical Properties	238
4 Discussion	258
Conclusions	264
Acknowledgments	267
References	267
 Part III: Processing and Joining	 271
 9 Processing of Thermoplastic-Based Advanced Composites	 273
<i>J.-A. E. Manson</i>	
Abstract	273
1 Introduction	273
2 Aspects of Material Processability and Properties	275
3 Basic Product Forms	277
4 Forming Mechanisms	281
5 Shaping and Consolidation Techniques	282
6 Process-Structure-Property Relations	290
7 Processing Window	296
Acknowledgments	297
References	297

10	Conception and Processing of Advanced Thermoplastic Composite Structures for the Machine Industry	303
	<i>J. Müller</i>	
1	General Situation for Advanced Composites in the Machine Industry	303
2	Requirements of the Machine Industry for Advanced Composites	303
3	Significance of Advanced Thermoplastic Composites for the Machine Industry	304
4	Applicability and Limitations, Guidelines for Application	306
5	Design Procedure	306
6	Manufacturing	325
7	Quality Assurance	332
8	Cost Effectiveness	333
9	Service Experiences	333
10	Future Aspects, Requirements for Material	334
	References	335
11	Bonding and Repair of Thermoplastic Composites	337
	<i>P. Davies and W.J. Cantwell</i>	
1	Introduction	337
2	Mechanical Fastening	338
3	Adhesive Bonding	339
4	Fusion Bonding	347
5	Comparison of Methods	358
6	Repair	360
	Conclusions	362
	References	365
	Index	367
