

TABLE DES MATIERES

Donald D. DAWSON : "MEASURE-VALUED MARKOV PROCESSES"

1.	Introduction	7
2.	From Particle Systems to Measure-valued Processes	17
3.	Random Measures and Canonical Measure-valued Processes	40
4.	Measure-valued Branching and Log-Laplace Functionals	59
5.	Probability Measure-valued Processes and Martingale Problems	78
6.	A Martingale Problem Formulation of Measure-valued Branching	105
7.	Stochastic Calculus of Measure-valued Processes	116
8.	Structural Properties of Branching and Sampling Martingale Problems	129
9.	Sample Path Properties of Super-Brownian Motion	146
10.	Building Measure-valued Processes with Interactions. Various Examples	170
11.	Palm Distributions, de Finetti Representation and Poisson Cluster Representation	186
12.	Family Structure and Historical Processes	200
	References	239

Bernard MAISONNEUVE : "PROCESSUS DE MARKOV : NAISSANCE, RETOURNEMENT, REGENERATION"

	Introduction	263
I.	Prolongement en 0 d'un processus markovien $(X_t)_{t \geq 0}$	264
II .	Processus de Markov à naissance aléatoire (PMNA)	269
III.	Mesures excessives. Décompositions	274
IV .	Retournement du temps	278
V.	Régénération et problème de Skorohod	283
	Appendice	288
	Références bibliographiques	292

Joël SPENCER : "NINE LECTURES ON RANDOM GRAPHS"

Graph Theory Preliminaries	293
Lecture 1 : Basics	295
Lecture 2 : More Random Graphs	301
Lecture 3 : The Poisson Paradigm	305
Lecture 4 : The Chromatic Number Resolved !	310
Lecture 5 : Counting Extensions and Zero-One Laws	314
Lecture 6 : A Number Theory Interlude	322
Lecture 7 : The Phase Transition	327
Lecture 8 : Martingales	334
Lecture 9 : The Lovasz Local Lemma	341
References	346
