ORGANIC SYNTHESIS VIA ORGANOMETALLICS (OSM 4)

Proceedings of the Fourth Symposium
in Aachen, July 15 to 18, 1992

Contents

<i>A. Alexakis, R. Sedrani, N. Lensen, and P. Mangency</i> Chiral Diamines in Asymmetric Organometallic Synthesis	1
<i>M. Shibasaki</i> New Catalytic Asymmetric Carbon-Carbon Bond Forming Reactions by Rare Earth Alkoxides	11
<i>R. van Eldik</i> Application of High Pressure Techniques in Mechanistic and Synthetic Studies of Organometallic Systems in Solution	27
<i>L. Dahlenburg</i> Cleavage of the Carbon-Hydrogen Bond on Achiral and Chiral Transitionmetal Complexes	41
<i>R. H. Crabtree</i> Organometallic Chemistry of Excited States: Synthetic Applications of Mercury Photosensitization	59
<i>M. S. Brookhart, E. Hauptmann, and S. Sabo-Etienne</i> Transition Metal Catalyzed Dimerization of Olefins	69
<i>R. W. Hoffmann</i> Stereoselective C-C Bond Formation with Chiral α-Substituted Organolithium Compounds	79
<i>M. Regitz</i> Synthetic Aspects of the Metal-mediated Cyclooligomerization of Phosphaalkynes	93
<i>H. Roesky</i> Metal Containing Compounds: Precursors for New Reactions and Materials	115
<i>R. Beckhaus</i> Titanocene – Vinylidene – A Versatile Building Block	131

<i>W. Kaminsky, A. Ahlers, O. Rabe, and W. König</i> Enantioselective Oligomerisation of α-Olefins with Chiral Zirconocene/ Aluminoxane-Catalysts	151
<i>J.-E. Bäckvall</i> Recent Advances in Palladium-Catalyzed Oxidations	165
<i>G. van Koten</i> Novel Developments in Zinc-mediated Organic Synthesis: Radical of Polar Mechanism?	175
<i>B. Giese</i> Organometallics in Organic Synthesis via Radicals	191
<i>P. J. Kocienski</i> Synthetic Applications of 1,2-Metallate Rearrangements	203
