

Contents

1	Introduction	1
1.1	Background	1
1.2	Reconstruction	3
1.3	Conventions About the Image	6
1.4	Mathematical Background	7
1.4.1	Terminology	8
1.4.2	Euclidean Space and Projective Space	9
1.4.3	Algebraic Curves	12
	References	14
2	Reconstruction from Image Correspondences	17
2.1	Euclidean Framework for Reconstruction	18
2.1.1	Euclidean Treatment of Ambiguity	22
2.1.2	Ambiguity and Instability	27
2.1.3	The Maximum Number of Reconstructions	28
2.2	Essential Matrices	36
2.2.1	A Characterisation of Essential Matrices	38
2.2.2	The Singular Value Decomposition	44
2.2.3	Symmetric and Antisymmetric Parts	45
2.2.4	Ambiguity	50
2.3	Projective Framework for Reconstruction	55
2.3.1	The Epipolar Transformation	56
2.3.2	Ambiguity	58
2.3.3	The Intersection of a Critical Surface Pair	61
2.4	Reconstruction up to a Collineation	62
2.4.1	Reconstruction Based on the Epipolar Transformation	63
2.4.2	Ambiguity	66
2.4.3	Critical Surfaces	68
	References	70
3	Critical Surfaces and Horopter Curves	73
3.1	The Absolute Conic	74

3.1.1	The Absolute Conic and Camera Calibration	79
3.1.2	Involutions and the Absolute Conic	81
3.2	Rectangular Quadrics	84
3.2.1	Algebraic Characterisations of Rectangular Quadrics . . .	87
3.2.2	Rigid Involutions of Rectangular Quadrics	91
3.3	Horoptyer Curves	94
3.3.1	Characterisations of Horoptyer Curves	94
3.3.2	Rigid Involutions of Horoptyer Curves	97
3.3.3	The Centre of a Horoptyer Curve	98
3.3.4	Examples	100
3.3.5	Horoptyer Curves on Rectangular Quadrics	102
3.4	Horoptyer Curves and Reconstruction	106
3.4.1	A Formula for τ_ψ	108
3.4.2	Two Cubic Constraints on Critical Surfaces	110
3.4.3	An Example	112
3.5	Reconstruction up to a Collineation	114
	References	118
4	Reconstruction from Image Velocities	119
4.1	Framework	120
4.2	Ambiguity	123
4.2.1	Preliminary Results	124
4.2.2	Critical Surfaces	126
4.2.3	Singular Critical Surfaces	128
4.2.4	Critical Surface Pairs	129
4.2.5	Cubic Polynomial Constraints on Critical Surfaces	132
4.2.6	The Maximum Number of Reconstructions	133
4.3	Algebraic Properties of Four Image Velocity Vectors	136
4.3.1	The Quartic Polynomial Constraint	137
4.3.2	Irregular Image Velocity Fields	138
4.3.3	The Effects of Small Perturbations	142
4.3.4	Symmetric Arrangements of Base Points: The Square . . .	144
4.3.5	Symmetric Arrangements of Base Points: The Tripod . . .	150
4.4	The Linear System of Quartics	153
4.4.1	The Dimension of the Linear System	154
4.4.2	Singular Points of Quartics	157
4.4.3	Base Points of the Linear System	158
4.5	The Derivatives of the Image Velocity Field	162
4.5.1	The Derivatives to Second Order	162
4.5.2	Polynomial Constraints on the Translational Velocity . . .	166
4.5.3	Time to Contact	169
