

Table of contents

Introduction	1
Chapter 1. — A quick review of Gromov hyperbolic spaces.	5
§1. — Hyperbolic metric spaces.	6
§2. — Hyperbolic groups.	8
§3. — The boundary of a hyperbolic space.	9
§4. — The visual metric on the boundary.	12
§5. — Approximation by trees.	13
§6. — Quasi-geodesics and quasi-isometries.	13
§7. — Classification of isometries.	16
§8. — The polyhedron $P_d(X)$.	17
Bibliography for Chapter 1.	18
Chapter 2. — Symbolic dynamics.	19
§1. — Bernoulli shifts.	20
§2. — Expansive systems.	22
§3. — Subshifts of finite type.	26
§4. — Systems of finite type and finitely presented systems.	29
§5. — Symbolic dynamics on \mathbb{N} and on \mathbb{Z} .	31
§6. — Sofic systems.	36
Notes and comments on Chapter 2.	40
Bibliography for Chapter 2.	41
Chapter 3. — The boundary of a hyperbolic space as a finitely presented dynamical system.	43
§1. — The cocycles φ .	44
§2. — Integration of the cocycles φ .	45
§3. — The cocycles associated to Busemann functions.	46
§4. — The gradient lines defined by φ .	50
§5. — The point at infinity associated to a cocycle.	52
§6. — Properties of the map $\alpha : \Phi \rightarrow \partial X$.	55
§7. — Integral cocycles on a hyperbolic graph.	59

§8. — A finite presentation of the boundary of a hyperbolic group.	62
Notes and comments on Chapter 3.	67
Bibliography for Chapter 3.	68

Chapter 4. — Another finite presentation for the action of a hyperbolic group on its boundary.

§1. — Convergent sequences.	69
§2. — Convergent quasi-geodesic fields.	70
§3. — Integral fields on a graph.	74
§4. — Another finite presentation of the boundary of a hyperbolic group.	83
Notes and comments on Chapter 4.	85
Bibliography for Chapter 4.	89
	90

Chapter 5. — Trees and hyperbolic boundary.

§1. — Trees and projective sequences of sets.	91
§2. — The tree $T_{geo}(X)$.	92
§3. — The tree $T_{part}(X)$.	93
§4. — The tree T_{lex} associated to a hyperbolic group.	96
§5. — A remark on the dimension of the hyperbolic boundary.	100
Notes and comments on Chapter 5.	103
Bibliography for Chapter 5.	105
	106

Chapter 6. — Semi-Markovian spaces.

§1. — Semi-Markovian spaces.	107
§2. — First examples of semi-Markovian spaces.	108
§3. — Semi-Markovian presentation of polyhedra.	110
Notes and comments on Chapter 6.	114
Bibliography for Chapter 6.	116
	117

Chapter 7. — The boundary of a torsion-free hyperbolic group as a semi-Markovian space.

§1. — N -equivalence in the trees T_{geo} and T_{part} .	118
§2. — The boundary of T_{geo} as a semi-Markovian subset.	119
§3. — A semi-Markovian presentation of $\partial\Gamma$.	122
§4. — The boundary of T_{part} as a semi-Markovian subset.	126
§5. — A finite-to-one semi-Markovian presentation of $\partial\Gamma$.	130
Notes and comments on Chapter 7.	131
Bibliography for Chapter 7.	133
	134
