

Contents

The Polymerase Chain Reaction: Methodology and Diagnostic Potential (<i>A. Pingoud</i>)	1
Gene Loss as Marker in Tumor Development: Considerations on the Origin of Specific Brain Tumors Due to Combinant Loss of Function Mutations of Tumor Suppressor Genes (<i>K. D. Zang</i>)	17
p53: Oncogene, Tumor Suppressor, or Both? (<i>W. Deppert</i>)	27
Tumor Genome Screening by Multilocus DNA Fingerprints as Obtained by Simple Repetitive Oligonucleotide Probes (<i>J. T. Epplen, S. Bock, and P. Nürnberg</i>)	41
Activation of <i>ras</i> Oncogenes in Human Tumours (<i>N. R. Lemoine</i>)	53
Laboratory Techniques in the Investigation of Human Papillomavirus Infection (<i>E.-M. de Villiers</i>)	65
Detection of Minimal Residual Leukemia by Polymerase Chain Reactions (<i>C. R. Bartram</i>)	77
A Dominant Metastogene Confers Metastatic Potential to Tumor Cells (<i>H. Ponta, M. Zöller, K.-H. Heider, S. Seiter, W. Rudy, M. Hofmann, C. Tölg, and P. Herrlich</i>)	87
Progression in Human Melanoma Is Accompanied by the Altered Expression of Cell Adhesion Molecules (<i>J. P. Johnson, B. G. Stade, U. Rothbacher, S. Stratil, and G. Riethmüller</i>)	97
Structure, Function and Expression of the CEA Gene Family: Diagnostic and Therapeutic Implications (<i>W. Zimmermann, F. Grunert, G. Nagel, S. von Kleist, and J. Thompson</i>)	107

Membrane Proteins as Markers for Normal and Neoplastic Endocrine Cells (<i>G. Lahr and M. Gratzl</i>)	117
Biological and Clinical Relevance of the Tumor-Associated Serine Protease uPA (<i>M. Schmitt, F. Jänicke, N. Chucholowski, L. Goretzki, N. Moniwa, E. Schüren, O. Wilhelm, and H. Graeff</i>)	129
Analysis of Growth Regulatory Pathways in Human Neuro-Oncology (<i>M. Westphal, W. Hamel, L. Anker, and H.-D. Herrmann</i>)	151
HER-2/Neu/c-ERB-B2 Amplification: Clinical Relevance in Mammary Carcinoma (<i>W. Jonat, K. Friedrichs, H. Eidtmann, J. Meybohm, and S. Singh</i>)	169
Cytokine-Mediated Regulation of Growth Factor Receptors (EGF-R and erb-B2) in Pancreatic Tumors (<i>H. Kalthoff, C. Roeder, and W. Schmieg</i>)	175
Chimeric CEA-Specific Antibody Fragments and Anti-idiotypic Antibodies for Immunoscintigraphy and New Therapeutic Approaches to Colorectal Carcinomas (<i>M. Neumaier</i>)	187
Tumor Localization by Immunoscintigraphy: Potential and Limitations (<i>S. Matzku and H. Bihl</i>)	207
Subject Index	219
