Fluid Flow Visualization

<i>Frits H. Post, Theo van Walsum</i>	1
1 Introduction	1
1.1 Purposes and Problems of Flow Visualization	1
1.2 Overview	3
2 Experimental Flow Visualization	3
2.1 Addition of Foreign Material	3
2.2 Optical Techniques	5
2.3 Addition of Heat and Energy	6
3 Computer Graphics Flow Visualization	7
3.1 The Flow Visualization Process	8
3.2 Flow Visualization Mappings	9
3.3 Data Preparation	12
3.3.1 Filtering	12
3.3.2 Data Selection	12
3.3.3 Domain Transformations	13
3.3.4 Interpolation	15
3.3.5 Point Location	16
3.3.6 Computing Derived Scalar Quantities	17
3.3.7 Computing Particle Path Lines	17
3.3.8 Contour Lines and Surfaces	19
3.4 Flow Field Topology	20
3.4.1 Critical points	21
3.4.2 Integral Curves and Surfaces	21
4 Presentation Techniques	22
4.1 Human Perception and Depth Cues	23
4.2 Basic Rendering Techniques	24
4.2.1 Arrows	24
4.2.2 Curves	26
4.2.3 Surfaces	27
4.2.4 Particles	28

4.2.5	Environment Geometry	29
4.2.6	Volume Rendering	29
4.3	Special Rendering Techniques	30
4.3.1	Animation	30
4.3.2	Aliasing and Anti-Aliasing	31
4.3.3	Texture Synthesis and Texture Mapping	31
4.3.4	Hybrid Rendering	32
4.3.5	Advanced Particle Rendering	33
5	Conclusions and Research Directions	34
	References	36

**Volume Visualization in Medicine:
Techniques and Applications**

	<i>Andreas Pommert, Michael Bomans, Martin Riemer, Ulf Tiede, Karl Heinz Höhne</i>	41
1	Introduction	41
1.1	Objectives	41
1.2	Related Fields	42
2	Imaging Modalities	43
3	Methods	44
3.1	Overview	44
3.2	Preprocessing	46
3.2.1	Data Conversion	46
3.2.2	Filtering	46
3.2.3	Interpolation	47
3.2.4	Data Structures	47
3.3	Object Definition	47
3.3.1	Segmentation	48
3.3.2	Interpretation	48
3.4	Surface-Based Rendering	48
3.4.1	Surface Reconstruction from Contours	49
3.4.2	Surface Reconstruction from Volumes	49
3.4.3	Shading	51
3.5	Voxel-Based Rendering	51
3.5.1	Projection Techniques	52
3.5.2	Surfaces	53
3.5.3	Cut Planes	54
3.5.4	Integral and Maximum Intensity Projection	54
3.5.5	Volume Rendering	55
3.6	Advanced Segmentation Methods	56

3.6.1	Point-Based Segmentation	57
3.6.2	Edge-Based Segmentation	57
3.6.3	Region-Based Segmentation	58
3.7	Multimodality Matching	59
3.8	Manipulation	59
3.9	Image Fidelity	59
3.10	Implementation Aspects	60
4	Applications	60
5	Conclusions	61
	References	62

Application of Visualization in Environmental Protection
