

Contents

Workshop on Environmental Systems

Decision Theoretic Analysis of Pollutants Emissions Monitoring Procedures <i>R. Avenhaus</i>	3
Applied General Equilibrium Modeling for Environmental Policy Analysis <i>K. Conrad</i>	6
Interconnected Games <i>H. Folmer, P. v. Mouche</i>	10
Object-Oriented Techniques for the Management of Geographic and Environmental Data <i>O. Günther, J. Lamberts</i>	13
Problems of Statistical Analysis of Environmental Data <i>H. Hebbel</i>	17
Planning "Safe" Routes for Transporting Protected Materials through an Alient Area <i>J. Karkazis</i>	20
Umweltinformationssystem Baden-Württemberg (UIS) <i>R. Mayer-Föll</i>	23
Some Adaptive Clustering Algorithms <i>H.-J. Mucha</i>	27
Development of an Energy—Emission Model Using Fuzzy Sets <i>C. Oder, O. Rentz</i>	32
Efficient Water Management <i>R. Pethig</i>	36
On Integrity Constraints for a Waste Management Information System <i>D. Schreiber, M. Grauer</i>	39
Design of a User—Friendly General Purpose Energy Information System <i>A. Schweiker, H.-M. Groscurth, A. Reuter</i>	42
Interacting Environmental Influences: Concepts of Synergism, Antagonism, and Superposition <i>F. Stehling, J. Kindorf</i>	45
Multiobjective Decision Making in Forest Management <i>L. Zadnik Stirn</i>	49

Section 1: Mathematical Modeling in OR

On Some Solution Method of Certain Type of Allocation Problems <i>Z.M. Farkas</i>	55
Generalized Monotone Maps <i>S. Schaible</i>	58

Section 2: Stochastic Models of OR

Combinatorial Approach to an r-node Tandem Queue <i>W. Böhm, S.G. Mohanty, J.L. Lain</i>	63
Individual Blocking Probabilities in the Loss System $GI + M \vec{M} N 0$ <i>A. Brandt</i>	67
Artillery Effectiveness Models in Operational Planning <i>A. Grundt</i>	70
Transmission of Reliability Properties among Record Values from Non-Identically Distributed Random Variables <i>U. Kamps</i>	74
A New Approach to Compute Performance Sensitivities of Stochastic Discrete Event Dynamic Systems (DEDS) <i>H. Lucca</i>	78
Probability Maximizing Approach to Optimal Stopping of Random Fields <i>R. Róźański, K. Szajowski</i>	82
Control by Delay of a Service System <i>H. Schmidbauer, A. Gadjiev</i>	86
Optimal Myopic Policies and Index Policies for Stochastic Scheduling Problems <i>J. Weishaupt</i>	90
Impulse and Continuous Stochastic Control: A Dynamic Programming Approach <i>A.A. Yushkevich</i>	94

Section 3: Combinatorial Optimization and Discrete Mathematics

Structure Independent Optimization of Embedding Graphs in Books <i>T. Bilski</i>	99
An Improved Version of Tabu Search for Irregular Cutting Problems <i>J. Błaźewicz, R. Walkowiak</i>	102
Restrictions of Graph Partition Problems <i>H.L. Bodlaender, K. Jansen</i>	105
Further Remarks on the Jeep Problem <i>U. Brauer, W. Brauer</i>	109
A Class of Graphs with good Communicativeness <i>V.E. Brimkov</i>	112
Resource-Constrained Project Scheduling with Maximum Time Distances <i>K. Brinkmann</i>	114
Traveling Salesman Problem with Path Dependent Costs— Generalization of One-Dimensional Search with Traveling Costs <i>B. Cao, K. Rinderle</i>	118
Stochastic Scheduling Flow-Shop No-Wait with Heuristics Using Artificial Intelligence Techniques <i>U.R. Ferreira</i>	121

Algorithms for Max-Linear and Multi-Criteria Spanning Tree Problems	
<i>H.W. Hamacher, G. Ruhe</i>	124
Combinatorial and Network Algorithms	
<i>T.C. Hu</i>	128
A Heuristic for the Nesting Problem	
<i>R. Lang, T. Milius</i>	130
New Evolutionary Genetic Algorithms for Combinatorial Optimization Problems	
<i>D.T. Loan, F.Q. Bac</i>	132
Bicriteria Transportation Problem	
<i>P. Neumayer</i>	135
Solving 3-Satisfiability in less than $1,579^n$ Steps	
<i>I. Schiermeyer</i>	138
Boltzmann Machine Solution N -Person Games	
<i>F. Seredynski</i>	139
Analysis of the Degree of Parallelism for Non-Polynomial, Polynomial, Strongly Polynomial Algorithms for Solving the Minimum Cost Flow Problem	
<i>C. Spera, M. Ugolini</i>	142
Decomposition of Multiplace Functions in Operations Research	
<i>B. von Stengel</i>	145
Experiences with a Cutting Plane Algorithm in Survivable Network Design	
<i>M. Stoer</i>	149
Combinatorial Covering Problems in Coding Theory	
<i>G.J.M. van Wee</i>	152
On Benders' Decomposition for the Capacitated Facility Location Problem	
<i>P. Wentges</i>	155
Packing Grid Figures	
<i>J. Wolffram</i>	159

Section 4: Linear and Non-Linear Optimization

Using Ellipsoids in Weighted Projective Algorithms for Nondifferentiable Optimization	
<i>A. Altman</i>	165
About the Method of Minimization of the Function	
<i>T.A. Arakelian</i>	168
LPINT: LP Software Based on the Interior Point Method	
<i>J. Barle, J. Grad</i>	171
A Convergence Acceleration of the Relaxation Algorithm in Convex Minimization	
<i>A. Cegielski</i>	173
On an Algorithm Solving Bilevel Programming Problems	
<i>S. Dempe</i>	177
Solving Linear Complementarity Problems by Imbedding	
<i>A. Fischer</i>	179

Optimality and Feasibility of Time Schedules in Vehicle Routing and Scheduling Problem with Time Window Constraints	
<i>B. Florkiewicz, M. Kulej</i>	182
Discretization of Semicoercive Variational Inequalities	
<i>J. Gwinner</i>	185
Methods of Reduced Directions with Differential Cost Function for Nonlinear Programming	
<i>V.S. Izhutkin, M.V. Petropavlovskii</i>	188
A Minimization Method for Systems with Singular Value Constraints	
<i>C. Jansson, O. Knüppel</i>	190
A Sharper Asymptotic Bound for Average Simplex Complexity	
<i>G. Joas</i>	193
Nonlinear Optimization: Stability and Parametric Aspects	
<i>H.T. Jongen</i>	196
Circumscribed Spheres via Semi-infinite Optimization	
<i>F. Juhnke</i>	197
On the Implicit Function Theorem and Parametric Optimization	
<i>G. Kassay</i>	201
On the Variance of the Number of Pivot Steps Required by the Simplex Algorithm	
<i>K.-H. Küfer</i>	203
Effective Numerical Methods and Average Errors	
<i>E. Novak</i>	207
Optimal Decisions in Multicriteria Problems with Controllable Attributes	
<i>A.M.J. Skulimowski</i>	211

Section 5: Systems and Control Theory

The Perturbed Adjoint Operator for Linear Hereditary Differential Systems with Perturbed Delay in Control	
<i>L. Bogataj</i>	217
Paths to Constrained Nash Equilibria	
<i>S.D. Fläm</i>	220
On a New Finite Perturbation Analysis Algorithm	
<i>W. Geiselhart, U. Tüshaus</i>	223
Necessary Properness Conditions in Periodic Control	
<i>R.F. Hartl</i>	226
Recent Trends in Mathematical Systems Theory and their Possible Impact on Applications	
<i>H.W. Knobloch</i>	230
Difference Methods for Monotone Differential Inclusions	
<i>F. Lempio</i>	235
Discrete-Time Markovian Jump Linear Systems	
<i>K. Szajowski, W.L. de Koning</i>	237

Change Speeds and Time Scales in Economic Dynamics— An Insight by Synergetic Economics <i>W.-B. Zhang</i>	242
---	-----

Section 6: Decision Support and Information Systems

A Formal Treatment of Relevance Information in Ill-Structured Environments <i>D. Androutsopoulos, P. Spirakis</i>	245
On Interactive Graphical Application Programs <i>K. Belling-Seib</i>	249
Embedding OR Techniques in Constraint Logic Programming <i>A. Bockmayr</i>	252
Cost/Benefit Analysis used in the Feasability Projects <i>V. Chichernea</i>	255
A Decision Support System for Diet Planning <i>T. Damij</i>	259
Experimental Results on the Efficiency of Rule-Based Systems <i>D. Gernert</i>	262
Incorporating 3D-Facilities into Statistical Graphs Using a Description-List-Based Data Presentation <i>F. Hantelmann</i>	265
Statistical and Machine Learning Approaches in Credit Scoring <i>F. Jafar-Shaghaghi</i>	270
On Completeness of Rule-Based Systems <i>A. Ligeza</i>	274
Load Sharing in a Heterogeneous Distributed Object-based System <i>J. Matulka</i>	278
Machine Learning by Constructing Decision Trees Including Cost Functions <i>W. Müller, F. Wysotzki</i>	281
MIPS—An Interactive Decision Support System for Hardware Investment Planning <i>G. Satzger, A. Wirth</i>	285
Expert Systems Applications in Construction Management and Engineering <i>C.A. Snyder</i>	289
Indices for Characterizing Ordinal Data <i>U. Tüshaus</i>	292
A Knowledge Based System Managing Sequences of Data Analysis Methods <i>F. Wartenberg, W. Gaul, D. Baier</i>	295

Section 7: Applications in Business and Economics

Enterprise Input-Output Modelling—Extensions of the Basic Model and its Applications <i>J. Artenjak</i>	303
--	-----

The Selection of the Optimum Offers in Crude Oil Market by Linear Programming <i>G. Barbatu, C.E. Marius, V. Ionescu</i>	306
Scenario Approach to Capacity Planning for the Production of a New Product <i>M. Bastic</i>	310
Project Scheduling: Models, Methods, and Systems Development <i>A. Drexl</i>	313
Analysis of Controller Workload Related to Air Traffic Density <i>S. Gladys, M. Malarski, J. Skorupski</i>	316
Office Automation in the Turkish Establishments <i>S. Gözlü</i>	320
Method for TWR Simulator Analysis of Chosen Elements of Airport Area Visualisation <i>S. Jasinski, M. Malarski, J. Skorupski</i>	322
Decision Support in Financial Planning <i>W. Junginger, A. Kor</i>	326

Section 8: Econometrics and Statistics

Distribution of the Spearman's Rank Correlation Coefficient <i>A. Baszczyńska, C. Domański</i>	333
Tests for Outliers for Multivariate Normal Distribution <i>A. Baszczyńska, C. Domański</i>	336
Demographer <i>D. Čepar, R. Habinc, E. Uršič, R. Založnik</i>	339
Natural Growth Population Models <i>D. Čepar, E. Uršič</i>	343
Estimated Accuracy of Data and Intervals of Admissible Values for Parameters of Fitting Functions <i>D. Čepar, M. Marolt, Z. Radalj, M. Ribarič</i>	346
Identification of Multiple Outliers in Time Series <i>T. Flak, W. Schmid</i>	349
Semiparametric Approaches to Dimension Reduction <i>W.K. Härdle, B.A. Turlach</i>	352
Maximum Likelihood Estimators in Non Linear Autoregressive Processes <i>M. Henkouché</i>	370
Bayes Sequential Estimation Procedures <i>R. Magiera</i>	372
Time-Series Forecasting by Pattern Imitation—further Development <i>B. Motnikar, D. Čepar, P. Žunko, M. Ribarič</i>	375
Characterizations of the Existence of UMP Tests for Hypotheses Induced by Groups <i>D. Plachky</i>	379
Statistical Scaling <i>W. Pölz</i>	384

Full-Information Best Choice Problems with Imperfect Observation	
<i>Z. Porosiński</i>	387
A Term Structure Model and Interest Rate Options	
<i>K. Sandmann, D. Sondermann</i>	391
Analysis of Dispersion Effects in Fractional Factorial Two-Level Designs	
<i>S. Uhlig</i>	394

Section 9: Micro-Economics and Game Theory

Pure Spatial Competition among Firms with more than one Facility	
<i>H. Behnke</i>	399
CS-Continuity and Separability	
<i>T. Bradtke</i>	402
A Shapley Value for Games with Restricted Coalitions	
<i>J. Derks, H. Peters</i>	406
Relationships between Bankruptcy Games and Minimum Cost Spanning Tree Games	
<i>T.S.H. Driessen</i>	410
Controlled Communication Networks	
<i>V. Feltkamp, A. van den Nouweland</i>	413
Reducing Sequencing Situations	
<i>H. Hamers, P. Borm, S. Tijs</i>	416
Coordination Failure and Endogenous Timing	
<i>S. Hurkens</i>	419
A Decision Support System for Negotiations on Financing of the Public Divisible Good	
<i>A. Jakubowski</i>	422
The Consumer Budget Set: The Meaning of Mathematical Transformation	
<i>T. Junius, K. Nevels</i>	425
Correlated Equilibria in Nonzero-Sum Stochastic Games	
<i>A.S. Nowak</i>	428
On the Core of a Set of Coalitions	
<i>H. Reijnierse, J. Derks</i>	432
Some Remarks on Simple Games and Matroids	
<i>D. Stumpe</i>	436
Risk Averse Utility Functions	
<i>G. Uebe</i>	439
A Logic of Rational Play for Games of Perfect Information	
<i>A. Vिल्s</i>	443
Learning Effects in a Heterogeneous and Asymmetric Duopoly	
<i>H. Wiese</i>	446

Section 10: Macro-Economics and Applied Econometrics

Chaotic Behaviour in a Simple Macroeconomic Model
D. Chappell 453

A Stochastic Model of Foreign Exchange Dynamics and an Exact Option Pricing Formula
M.T. Cheung, D.W.K. Yeung 455

Transition of Socialist Economies and Redistribution of Wealth
J.A. Čibej 458

Equal Rates of Return and/or Clearing of Factor Markets in Two-Sector OLG-Models with Heterogeneous Capital Goods
K. Farmer 460

Purchasing Power Parity and Cointegration
T. Gerhards 464

On the Modelling of Economic Equilibria by Variational Inequalities
J. Gwinner 469

The Policy of the Deutsche Bundesbank: An Empirical Investigation
M. Hillmer 472

Population Dynamics for the Federal Republic
G. Köpp 477

Testing for a Long Run Relationship between Trend and Difference Stationary Series
P. Kugler, P. Schwendener 481

Deficit Financing Strategies and the Fiscal Multiplier
H. Molana 484

The Disappearing Multiplier: A System Dynamics Approach to Macroeconomics
G. Ossimitz 488

Chaotic Foreign Exchange Rates
B. Reszat 491

Disequilibrium Models and the Use of Business Survey Data
P. Stalder 494

Increasing the Capital Income Tax Leads to Faster Growth
H. Uhlig, N. Yanagawa 499

Section 11: Decision Theory, Utility and Risk

On Solving of a Mulitobjective Nonlinear Programming Problem with General Parameters in the Objective Functions Using the Fuzzy Mathematical Programming
E. Ammar 505

Modeling Attitudes Towards Uncertainty and Risk Through the Use of Monotone Capacities
A. Chateauneuf 509

Case-Based Decision Theory—An Outline
I. Gilboa, D. Schmeidler 512

An Interactive Decision Procedure with Multiple Attributes under Risk
H. Holz, K. Mosler 516

An Insurance Contract for Financial Assets with Experience Rating <i>W. Jammerneegg, P. Kischka</i>	520
Efficiency Improvement in Data Envelopment Analysis <i>C. Kao</i>	523
Separation in Insurance <i>I. Meilijson</i>	526
Collective Decisions on Euclidian Spaces <i>W. Peremans, H. Peters, H. v.d. Stel, T. Storcken</i>	528
The Analytic Hierarchy Process (AHP): Basics and Software <i>K. Weber</i>	532

Section 12: Banking, Finance and Insurance

ALLFIWIB: Distributed Knowledge Based Systems for Customer Support in Financial Services <i>H.U. Buhl, H.-J. König, A. Will</i>	537
On the Use of Geometric Brownian Motion in Financial Analysis <i>M.T. Cheung, D. Yeung, A. Lai</i>	541
Modelling of Catastrophic Events in Insurance and Finance <i>P. Embrechts</i>	544
Life Insurance Solvency Assessment Using Stochastic Simulation Techniques <i>M. Hardy</i>	547
Optimal Stop-Loss Limits under Non-Expected Utility Preferences <i>W. Hürlimann</i>	550
Forecasting Volatility and Option Pricing with GARCH Models <i>J. Kähler</i>	553
Risk Management in Banks—A Stochastic Approach <i>U.-C. Kopp</i>	558
Testing Filter-Rule Profits in the Foreign Exchange Market <i>W. Naggl</i>	561
Bank Branch Computerisation: A Feasible Approach <i>S.M. Padwal</i>	564
Instalment Credits in a Model of Vertically Differentiated Consumer Durables <i>U. Schmidt-Mohr</i>	566
The Pricing of Insurance Contracts by Financial Models and Rationality <i>W. Schott</i>	569
Financial Engineering—A Knowledge Based Buy/Lease Decision Support System <i>C. Weinhardt</i>	572
The Distribution for Continuous Multiple Life Functions <i>M. van Wouwe, S. Lorimier</i>	576

Author Index	579
