

Contents

Table of Abbreviations — XV

1 Introduction – Self-Descriptions and External Assessments — 1

- 1.1 Self-Descriptions — 2
- 1.2 External Assessments – the Philosophical Stepchild — 12

2 The Berthelot Principle — 23

- 2.1 Chemistry “Makes” Its Own Objects — 23
- 2.2 Chemical Experimentation – Extending Reality — 28
- 2.3 Examples — 34
- 2.4 Conclusions — 42

3 Chemical Empiriocriticism – František Wald — 45

- 3.1 The Unloved Atomic Hypothesis — 45
- 3.2 Non-Atomism from Metaphysical Economy — 46
- 3.3 Chemical Positivism in Prague — 50
- 3.4 From Skeletons and Mummies to Multidimensional Stoichiometry — 53
- 3.5 Conclusions — 61

4 Foundations of Chemistry – Ostwald’s Principles — 65

- 4.1 An Introduction to All Chemistry Textbooks — 65
 - 4.1.1 The Motivation — 66
 - 4.1.2 Why without Atoms? — 69
 - 4.1.3 What Are Substances? — 71
 - 4.1.4 Substances and Phases — 74
 - 4.1.5 Reactivity — 76
- 4.2 Reactions of the Scientific Community — 79
- 4.3 Conclusions — 82

5 No Analysis without Synthesis — 85

- 5.1 The Analytic-Synthetic Ideal — 85
- 5.2 Definitions — 87
 - 5.2.1 Synthesis and Analysis — 87
 - 5.2.2 Self-Descriptions of Analytics — 88
 - 5.2.3 Quality — 90
 - 5.2.4 Quantity — 91

5.3	Examples from Analytical Practice —	93
5.3.1	The Brown Ring Test —	93
5.3.2	Electrolysis —	94
5.3.3	Gravimetry —	94
5.3.4	Hardness of Water —	95
5.3.5	Elemental Analysis —	96
5.3.6	Helium —	96
5.3.7	Gas Chromatography/Mass Spectrometry —	98
5.3.8	The pH Electrode —	102
5.4	Further Discussion —	107
5.4.1	Dialectical Materialism —	107
5.4.2	Pessimistic Perspectives for Substance Chemistry? —	110
5.4.3	Protochemistry —	111
5.4.4	Conclusions —	112
6	Potentiality and Temporality —	115
6.1	Equilibrium: Kinetic or Thermodynamic? —	115
6.2	Affinity —	122
6.2.1	The Strength of the Acids —	122
6.2.2	The Systematic Art of Reaction Control —	125
6.3	Catalysis —	127
6.4	Conclusions —	134
7	Naturally Chemical? —	137
7.1	Culturalist Insights —	137
7.2	Natural Kind – a Popular but Ambivalent Term —	140
7.2.1	Definitions —	140
7.2.2	Mereological Fundamentals —	141
7.2.3	Chemical Species Viewed from a Pluralistic Standpoint —	144
7.2.4	Chemical Individuals —	154
7.2.5	The Acids in the Causal Theory of Reference —	157
7.3	Conclusions —	160
8	How Chemical Is Quantum Chemistry? —	163
8.1	Electronism – the Precursor —	163
8.1.1	From the Theoretical Entity to the Electricity Atom – the Electron —	164
8.1.2	The Octet and the Oxidation Number —	168
8.2	A New Mechanics in Chemistry —	176
8.2.1	The Beginnings —	177
8.2.2	Molecular Orbitals —	180

- 8.2.3 Pauling's Ingenious Idea: Electronegativity — 181
- 8.2.4 Hans Primas – an Iconoclast? — 183
- 8.3 Further Limits of Quantum Chemistry — 186
- 8.4 Conclusions — 190

9 Friedrich Paneth – a Philosophizing Chemist — 193

- 9.1 A Conceptual Crisis in Chemistry, Set in Motion by Physics — 193
- 9.2 Cold Fusion and an Undetected Blank Value — 199
- 9.3 Non-substance Chemical Entities: Alkyl Radicals — 208
- 9.4 The Kantian Echo: The Königsberg Lecture — 211
- 9.5 Conclusions — 219

10 Ontological Underdetermination — 223

- 10.1 The Customary Concept — 224
- 10.2 The Ontological Version — 227
- 10.3 Chemical Substances between Knowledge and Ignorance — 228
 - 10.3.1 Thalidomide — 228
 - 10.3.2 CFCs and Ozone — 235
- 10.4 Conclusions — 242

11 Synopsis – Fundamentals of Metachemistry — 245

12 References — 263

List of Figures — 282

Name Index — 284

Subject Index — 289
