● International Life Sciences Institute ● in association with the International Union of Toxicology

RESPIRATORY TOXICOLOGY AND RISK ASSESSMENT

Proceedings of an International Symposium

Edited by

P.G. Jenkins

International Programme on Chemical Safety
World Health Organization
Geneva, Switzerland

D. Kayser

Federal Health Office
Berlin, Germany

H. Muhle

Fraunhofer Institute for Toxicology and Aerosol Research
Hanover, Germany

G. Rosner

Fraunhofer Institute for Toxicology and Aerosol Research
Hanover, Germany

Contents

Abbreviations	XIII
Overview	1

US EPA inhalation testing guidelines

C.R. Shoaf.	11
---------------------	----

Inhalation toxicology: Current approaches and administrative needs

H.B.W.M. Koëter	27
---------------------------	----

Problems of study design – general overview

H. Muhle.	37
-------------------	----

Generation of exposure atmospheres

W. Koch	49
-------------------	----

Inhalation exposure methodology

R.F. Phalen, M.T. Kleinman, W.J. Mautz & R.T. Drew	59
--	----

Respiratory tract dosimetry of particles: Implications for setting of exposure concentrations and extrapolation modelling

G. Oberdörster	83
--------------------------	----

Dosimetry of inhaled gases

F.J. Miller	111
-----------------------	-----

Species differences: Impact on testing	
J. Pauluhn	145
Physiological and lavage fluid cytological and biochemical end-points of toxicity in the rat	
B.E. Lehnert	175
Differences in cellular organization and metabolism among species used as models for responses to inhaled substances in the human respiratory system	
C.G. Plopper, L.H. Overby, S.J. Nishio, A.J. Weir, C.J. Serabjit-Singh, R.M. Philpot & A.R. Buckpitt	207
Local and systemic cell-specific toxicity in the lung and olfactory epithelium	
L.L. Smith & F. De Matteis	223
Histopathological end-points in the respiratory tract	
D.L. Dungworth	233
The nonspecific immune system of the lung	
M.L. Lohmann-Matthes & G. Franke	251
Allergic and pseudo-allergic responses	
G. Kazantzis	263
A role for T helper-1 cells in the induction of airway hyperresponsiveness	
H. Van Loveren, J. Garssen & F.P. Nijkamp	281
<i>In vitro</i> test systems and respiratory toxicology	
M. Balls & J.H. Fentem	291
<i>In vitro</i> testing for lung toxicity	
G. Ciabattoni, P. Montuschi, D. Currò & P. Preziosi	315

Interpretation of respiratory tract responses in experimental animals

C.F. Kuper, V.J. Feron, L. van Bree & A. Zwart 323

Extrapolation: What do the animals tell us?

H. Witschi 341

Environmental epidemiology and risk assessment

J.A.J. Stolwijk 359

Hazard and risk assessment for inhaled pollutants

M.E. Meek, R. Newhook, R.G. Liteplo & V.C. Armstrong 365

Index 379
