

Contents

Preface	vii
Contributors	xi
1. Limnology of the Plußsee	1
Hans-Jürgen Krambeck, Dieter Albrecht, Barbara Hickel, Wolfgang Hofmann, and Hans-Hermann Arzbach	
2. Dissolved Organic Matter: Analysis of Composition and Function by a Molecular-Biochemical Approach	24
Uwe Münster and Dieter Albrecht	
3. Primary Production, Photosynthesis, and Chlorophyll_a in the Plußsee	63
Maria-Elisabeth Meffert and Jürgen Overbeck	
4. Phytoplankton-Excreted Organic Carbon	81
Anne F. Sell	
5. Bacterial Secondary Production	92
Ryszard J. Chróst and Hakumat Rai	
6. Microbial Enzymatic Degradation and Utilization of Organic Matter	118
Ryszard J. Chróst	
7. Saprophytic and Oligotrophic Bacteria in the Plußsee	175
Jürgen Overbeck	

8. Heterotrophic Potential of Bacteria	192
Jürgen Overbeck	
9. Phosphoenolpyruvate Carboxylase: Allosteric Regulation at the Ecosystem Level by Dissolved Organic Matter	201
Jürgen Overbeck	
10. Relations between <i>Limnothrix redekei</i> (Cyanophyta/Cyanobacteria) and Bacteria: Mutual Control of Growth by Extracellular Algal Products	217
Maria-Elisabeth Meffert	
11. Zooplankton Grazing on Bacteria	229
Andrea Bemmmer and Jürgen Overbeck	
12. Nanoflagellate and Ciliate Grazing on Bacteria	251
Bodo G. Meier and Edith Reck	
13. Viruses	270
Karl-Paul Witzel, Jutta Demuth, and Christian Schütt	
14. Phototrophic Bacteria in the Plußsee: Ecology of the Sulfuretum	287
Rita Oberhäuser-Nehls, Konstantinos Anagnostidis, and Jürgen Overbeck	
15. Iron Bacteria	326
Wolf-Dieter Schmidt and Jürgen Overbeck	
16. Metabolism of Methane and the Carbon Cycle in the Plußsee	337
Monir Naguib	
17. Bacterial Life in the Plußsee: General Remarks on Aquatic Microbial Ecology	356
Ryszard J. Chróst and Jürgen Overbeck	
Index	367
