

Table of Contents

Part I Essays	1
Identification and Robust Control <i>Pramod P. Khargonekar</i>	3
An Essay on Identification of Feedback Systems <i>Pertti Mäkilä and Jonathan Partington</i>	11
Thoughts on Identification for Control <i>Michael G. Safonov</i>	15
An Essay on Robust Control <i>Hidenori Kimura</i>	19
On the Character of Uncertainty for System Identification and Robust Control Design <i>Robert L. Kosut</i>	25
Extensions of Parametric Bounding Formulation of Identification for Robust Control Design <i>J. P. Norton</i>	29
Connecting Identification and Robust Control <i>Michel Gevers</i>	35
On Nominal Models, Model Uncertainty and Iterative Methods in Identification and Control Design <i>Paul Van den Hof, Ruud Schrama and Peter Bongers</i>	39
An Informal Review of Model Validation <i>Roy Smith</i>	51
From Data to Control <i>Munther A. Dahleh and John C. Doyle</i>	61
Is Robust Control Reliable? <i>Jeffrey C. Kantor and Billie F. Spencer, Jr.</i>	65
Modeling Uncertainty in Control Systems: A Process Control Perspective <i>Daniel E. Rivera</i>	69

Part II Technical Papers

77

A Note on H_∞ System Identification with Probabilistic A Priori Information <i>Clas A. Jacobson and Gilead Tadmor</i>	79
A Worst Case Identification Method Using Time Series Data <i>Jie Chen, Carl N. Nett, and Michael K.H. Fan</i>	93
Identification in $\mathcal{H}^\infty$ Using Time-Domain Measurement Data <i>Guozhang Gu</i>	105
Identification of Feedback Systems from Time Series <i>Pertti Mäkilä and Jonathan Partington</i>	117
Input-Output Extrapolation-Minimization Theorem and Its Applications to Model Validation and Robust Identification <i>Tong Zhou and Hidenori Kimura</i>	127
Identification of Model Error Bounds in ℓ_1 - and $\mathcal{H}_\infty$ -Norm <i>Richard G. Hakvoort and Paul M.J. Van den Hof</i>	139
Asymptotic Worst-Case Identification with Bounded Noise <i>Munther A. Dahleh</i>	157
Sequential Approximation of Uncertainty Sets via Parallelotopes <i>Antonio Vicino and Giovanni Zappa</i>	171
A Robust Ellipsoidal-Bound Approach to Direct Adaptive Control <i>Tung-Ching Tsao and Michael G. Safonov</i>	181
On Line Model Uncertainty Quantification: Hard Upper Bounds and Convergence <i>Er-Wei Bai and Sundar Raman</i>	197
A Mixed Deterministic-Probabilistic Approach for Quantifying Uncertainty in Transfer Function Estimation <i>Douwe K. de Vries and Paul M.J. Van den Hof</i>	221
Estimation for Robust Control <i>Brett M. Ninness and Graham G. Goodwin</i>	235
Non-Vanishing Model Errors <i>Håkan Hjalmarsson</i>	261
Accuracy Confidence Bands Including the Bias of Model Under-Fitting <i>Wallace E. Larimore</i>	275
Iterative Identification and Control Design: A Worked Out Example <i>Ruud Schrama and Paul Van den Hof</i>	289

Frequency Domain Identification for Robust Control Design <i>David S. Bayard and Yeung Yam</i>	303
Time Domain Approach to the Design of Integrated Control and Diagnosis Systems <i>Hamid Ajbar and Jeffrey C. Kantor</i>	337
Identification of Ill-Conditioned Plants — A Benchmark Problem <i>Elling W. Jacobsen and Sigurd Skogestad</i>	367
Control Design and Implementation based on Experimental Wind Turbine Models <i>Peter Bongers, Gregor van Baars</i>	377
