

Contents

Chapter 0. Definitions and Preliminary Results	1
0.1 Spaces of Dynamical Systems	1
0.2 The Space M^*	4
0.3 The C^0 -Closing Lemma	10
0.4 Hyperbolic Sets	14
Chapter 1. Generic Properties of Dynamical Systems	23
1.1 Tolerance Stability	23
1.2 Pseudotrajectories	28
1.3 Prolongations	33
1.4 Returning Points and Filtrations	41
Chapter 2. Topological Stability	53
2.1 General Properties of Topologically Stable Systems	53
2.2 Topological Stability of Systems with Hyperbolic Structure	58
2.3 Topologically Stable Dynamical Systems on the Circle	75
2.4 Density of Topologically Stable Systems in $CLD(M)$	79
2.5 Two Conditions of Topological Stability	83
Chapter 3. Perturbations of Attractors	87
3.1 General Properties of Attractors	87
3.2 Stability of Attractors for Generic Dynamical Systems	91
3.3 Lyapunov Stable Sets and Quasi-attractors in Generic Dynamical Systems	98
3.4 Stability of Attractors with the STC on the Boundary	107
3.5 Stability of Attractors for Morse-Smale Diffeomorphisms	117
Chapter 4. Limit Sets of Domains	125
4.1 Lyapunov Stability of Limit Sets	125
4.2 Limit Sets for Diffeomorphisms Satisfying the STC	136
Appendix A. Shadowing for Diffeomorphisms with Hyperbolic Structure	143
Appendix B. Structure of Attractors with the STC on the Boundary	163
Appendix C. Complete Families of δ -semi-trajectories	179
