

Table of Contents

Acknowledgement	vii
0 Introduction	1
1 The Poisson bivector and the Schouten-Nijenhuis bracket	5
1.1 The Poisson bivector	5
1.2 The Schouten-Nijenhuis bracket	6
1.3 Coordinate expressions	9
1.4 The Koszul formula and applications	12
1.5 Miscellanea	16
2 The symplectic foliation of a Poisson manifold	19
2.1 General distributions and foliations	19
2.2 Involutivity and integrability	21
2.3 The case of Poisson manifolds	25
3 Examples of Poisson manifolds	31
3.1 Structures on $\mathbb{R}^n$. Lie-Poisson structures	31
3.2 Dirac brackets	36
3.3 Further examples	38
4 Poisson calculus	41
4.1 The bracket of 1-forms	41
4.2 The contravariant exterior differentiations	43
4.3 The regular case	48
4.4 Cofoliations	54
4.5 Contravariant derivatives on vector bundles	55
4.6 More brackets	57
5 Poisson cohomology	63
5.1 Definition and general properties	63
5.2 Straightforward and inductive computations	67
5.3 The spectral sequence of Poisson cohomology	72
5.4 Poisson homology	77

6 An introduction to quantization 83

6.1 Prequantization 83

6.2 Quantization 87

6.3 Prequantization representations 89

6.4 Deformation quantization 92

7 Poisson morphisms, coinduced structures, reduction 97

7.1 Properties of Poisson mappings 97

7.2 Reduction of Poisson structures 101

7.3 Group actions and momenta 107

7.4 Group actions and reduction 110

8 Symplectic realizations of Poisson manifolds 115

8.1 Local symplectic realizations 115

8.2 Dual pairs of Poisson manifolds 121

8.3 Isotropic realizations 123

8.4 Isotropic realizations and nets 128

9 Realizations of Poisson manifolds by symplectic groupoids 135

9.1 Realizations of Lie-Poisson structures 135

9.2 The Lie groupoid and symplectic structures of T^*G 137

9.3 General symplectic groupoids 143

9.4 Lie algebroids and the integrability of Poisson manifolds 147

9.5 Further integrability results 153

10 Poisson-Lie groups 161

10.1 Poisson-Lie and biinvariant structures on Lie groups 161

10.2 Characteristic properties of Poisson-Lie groups 164

10.3 The Lie algebra of a Poisson-Lie group 169

10.4 The Yang-Baxter equations 172

10.5 Manin triples 178

10.6 Actions and dressing transformations 182
