

Contents

Introduction

1

Chapter I. Local Theory of Complex Spaces

R. Remmert

7

Chapter II. Differential Calculus, Holomorphic Maps and Linear Structures on Complex Spaces

Th. Peternell and R. Remmert

97

Chapter III. Cohomology

Th. Peternell

145

Chapter IV. Seminormal Complex Spaces

G. Dethloff and H. Grauert

183

Chapter V. Pseudoconvexity, the Levi Problem and Vanishing Theorems

Th. Peternell

221

Chapter VI. Theory of q -Convexity and q -Concavity

H. Grauert

259

Chapter VII. Modifications

Th. Peternell

285

Chapter VIII. Cycle Spaces

F. Campana and Th. Peternell

319

Chapter IX. Extension of Analytic Objects

H. Grauert and R. Remmert

351
