

Contents

Chapter I. Role of Coordinates in Geodesy and Geometry	1
1. Coordinates in Geodesy and Geometry	1
2. Marussi-Hotine Approach to Geodesy	5
3. Classical Formulations of the Tensor Calculus	15
4. Abstract Notion of a Tensor	26
5. Preview of the Leg Calculus	39
Problems for Chapter I	41
Chapter II. Ricci Calculus	45
1. Introduction	45
2. 3-Leg Algebra	46
3. Congruences	50
4. Geometry of Congruences	51
5. Ricci Coefficients	53
6. Calculation of Ricci Coefficients	56
7. Commutativity of Leg Derivatives	57
8. Lie Bracket	60
9. Jacobi and Schouten Identities	61
10. Interpretation of Ricci Coefficients	63
11. Miscellaneous Leg Representations	65
12. Lamé Equations	67
Problems for Chapter II	70
Chapter III. Cartan Calculus	73
1. Introduction	73
2. Exterior Product	74
3. Exterior Differentiation	78
4. Basic Properties of the Exterior Product and Differentiation	81
5. Cartan's Viewpoint	83

6. Structural Equations of Cartan	86
7. Commutators and Schouten Identities	92
8. Cartan Calculus and the Classical Tensor Calculus	93
9. Coordinates in the Cartan and Ricci Calculus	97
10. Conclusions and Summary	99
Problems for Chapter III	100
Chapter IV. General Leg Calculus	105
1. Introduction	105
2. Fundamental Idea of the Leg Calculus	106
3. Identification of the Ricci Coefficients	110
4. Permutation Algorithm	111
5. Interpretation of the Leg Coefficients	113
6. Basic Equations in the Leg Calculus	114
7. Commutators and Lie Brackets	116
8. Laplacian of a Scalar Function	121
9. Lamé Equations and Identities	123
10. Coordinates in the Leg Calculus	126
11. Reconstruction Theorem and General Viewpoint	132
Problems for Chapter IV	136
Chapter V. Gaussian Differential Geometry	139
1. Introduction	139
2. The Framework of Gaussian Differential Geometry	141
3. Gauss Operator and First Basic Form	148
4. Second Basic Form	153
5. Third and Fourth Basic Forms	159
6. Congruence and Surface Eigenstructure Theorems	161
7. Two Digressions	169
8. Basic Equations of the Surface Leg Calculus	172
9. Frenet Equations	175
10. Meusnier and Bonnet Formulas	178

11. Geodesic Curvature and Torsion in an Arbitrary Direction, and Euler's Formula	180
12. Euler's Osculating Paraboloid and Dupin's Indicatrix of Curvature	183
13. Triply-Orthogonal Systems and Dupin's Theorem	186
Problems for Chapter V	192

Chapter VI. Basic Equations for Differential Geodesy **197**

1. Introduction	197
2. Newtonian Gravitation and the Geopotential Field	197
3. Marussi Ansatz and the Hotine 3-Leg	200
4. Hotine Leg Calculus and N-Integrability Conditions	203
5. Marussi Tensor	206
6. Bruns Curvature Equation	211
7. Bruns Equation and Hotine's Theorem	213
8. n -Integrability Conditions	216
9. The Hotine-Marussi Equations	218
10. 3-Dimensional Laplacian of Local Gravity	219
11. 2-Dimensional Laplacian of Local Gravity	221
Problems for Chapter VI	223

Chapter VII. The Fundamental Theorem of Differential Geodesy **227**

1. Introduction	227
2. Basic Assumptions	227
3. The Fundamental Theorem of Differential Geodesy	229
4. Discussion	231
5. Extension Problem	232
6. Two Subsidiary Problems	237
7. The Congruence-Forming Property	238
8. The Surface-Forming Property	244
9. Conclusions	250

Problems for Chapter VII	252
Chapter VIII. Algebraic Theory of the Marussi Tensor	255
1. Introduction	255
2. Eigenstructure of Symmetric Tensors	256
3. Eigenstructure of the Marussi Tensor	261
4. The Singularity Condition	264
5. Conclusions	268
Problems for Chapter VIII	269
Chapter IX. Conformal Differential Geodesy	273
1. Introduction	273
2. Fundamental Notions of Conformal Geometry	274
3. Conformal Structural Equations	278
4. Conformal Ricci Coefficients	283
5. Conformal Surface Theory	285
6. Conformal Curve Theory	290
7. Generalized Conformal Transformations	295
8. Conclusions	300
Problems for Chapter IX	302
Chapter X. Coordinates in Differential Geodesy	303
1. Introduction	303
2. Marussi Hypothesis and Hotine Problem	304
3. Hotine's Hierarchy of Local Coordinate Systems	308
4. The Marussi-Hotine Approach: A Critique	319
5. Generalized Marussi-Hotine Approach: A Proposal	322
6. Conclusion	338
Problems for Chapter X	339
Bibliography	345
Index	363
