

Contents

Preface	vii
Abstracts of Invited Presentations	ix
I A. Maple in Computer Science	1
“Turtle Graphics” in Maple V .2	
<i>Eugenio Roanes Lozano, Eugenio Roanes Macías</i>	3
A Distributed Approach to Problem Solving in Maple	
<i>K. C. Chan, A. Díaz, and E. Kaltofen</i>	13
Denotational Semantics Applied to the Typesetting of Maple Expressions	
<i>Reid M. Pinchback</i>	22
I B. Maple in Applied Mathematics	29
A Symbolic Engineering Mechanics System Built on OEM Maple	
<i>Philip Todd, Robin McLeod and Marcia Harris</i>	31
Signal Processing Using Maple V	
<i>John I. Molinder</i>	39
Implementation of a Mapping Procedure for the Domain Decomposition for PDEs in Maple	
<i>Peiyuan Li and Richard L. Peskin</i>	46
II A. Maple in Education	55
The Influence of Maple on a Linear Algebra Course at the Delft University of Technology	
<i>Harry A.W.M. Kneppers</i>	57
Can Maple Help in Teaching Calculus with Limited Time and Staff?	
<i>Scott R. Fulton</i>	63
Enlivening the Mathematics Curriculum with Maple	
<i>G. F. Fitz-Gerald and W. P. Healy</i>	71
II B. Maple in Science	81
Analytical Approaches to Solving Coupled Nonlinear Schrödinger Equations Using Maple V	
<i>M. F. Mahmood and T. L. Gill</i>	83
Solution of the Solar Cell Transport Equations Using Maple	
<i>Randy T. Dorn and R. J. Soukup</i>	90
Kramers and Wannier V-Matrices for the Partition Functions of the Ising Model	
<i>P. Frempong-Mireku and K. J. K. Moriarty</i>	97

III A. Maple in Abstract Algebra	105
FRAC: A Maple Package for Computing in the Rational Function Field $K(X)$ <i>Cesar Alonso, Jaime Gutierrez, and Tomas Recio</i>	107
Group Rings and Hopf-Galois Theory in Maple <i>Timothy Kohl</i>	116
Rational Generating Function Applications in Maple <i>Robert A. Ravenscroft, Jr.</i>	122
III B. Maple in Science	129
Symbolic-Numeric Computations for Problem-Solving in Physical Chemistry and Biochemistry <i>J. Grotendorst, J. Dornseiffer and S. M. Schoberth</i>	131
Maple V Analytically Calculating Plane Strain FE-Matrices with Rotational Degrees of Freedom <i>G. Zirwas</i>	141
Chemical Engineering with Maple <i>Ross Taylor and Katherine Atherley</i>	149
IV A. Maple in Education	157
Maple Labs and Programs for Calculus <i>William W. Farr and Michael VanGeel</i>	159
Maple at the University of North London <i>Graham Taylor-Russell</i>	167
Introducing Maple to First Year Engineering Students Via Project Study <i>Ulf Rønnow</i>	173
Another Look at Learning the Techniques of Elementary Integration <i>Joseph A. Pavelcak</i>	179
Worksheets: Can We Teach Mathematical Algorithms with Them? <i>Michael Monagan</i>	187
IV B. Maple in Science and the Applications	197
Computer Algebra as a Tool for Analyzing Nonlinear Systems <i>Diana Murray</i>	199
Maple V and Geometrical Optics: Aberration Coefficients in Arbitrary Optical Systems <i>Eisso Atzema</i>	209
Solution of Banded Linear Systems of Equations in Maple Using LU Factorization <i>Robert M. Corless and Khaled El-Sawy</i>	219
Using Maple to Design a Complex Mixture Experiment <i>Richard A. Bilonick</i>	228
