Part 1 Fundamentals of Remote Sensing Technology, Interpretation and Integration

Chapter 1 Imaging Systems	3
1.1 Introduction	3
1.2 The Multispectral Scanning System	5
1.2.1 The Advantages of Multispectral Imaging	6
1.2.2 A Word of Caution	8
1.3 The Thematic Mapper	8
1.3.1 Changes in Spectral Range	8
1.3.2 Advantages of Increased Spatial Resolution and Spectral Range	9
1.4 The SPOT Satellite	12
1.4.1 Off-Nadir Viewing Capabilities	12
1.5 Radar Imagery	14
1.5.1 Background	14
1.5.1.1 Factors Affecting Reflection Intensity	16
1.5.1.2 Factors Affecting Resolution – Range Resolution	17
1.5.1.3 Factors Affecting Resolution = Azimuth Resolution	17
1.5.2 Advantages of Mapping with Radar Imagery	18
1.5.2.1 Cloud Penetration	18
1.5.2.2 “Treemap Geology”	18
1.5.2.3 Surface Roughness Detection	19
1.5.2.4 Preferred Look Directions	21
1.5.2.5 Stereo Radar Imaging of Geological Structures	24
1.5.3 Problems with Radar Imagery	25
1.5.3.1 Slant Range Images	25
1.5.3.2 Layover	25
1.5.4 Spaceborne Radar Systems in Use	25
1.5.5 Future Spaceborne Radar Systems	28
1.5.6 Evaluation of Space Radar	29
1.6 Summary	32
References and Further Reading	32

Chapter 2 Digital Image Manipulation	35
2.1 Introduction	35
2.2 Imagery Enhancement Techniques	37
2.2.1 Contrast Stretching	37
2.2.2 Standard False-Color Imagery	38
2.2.3 Intensity, Hue and Saturation Transformations	41
2.2.4 Ratio Enhancement	43

2.2.5 Edge Enhancement	44
2.3 Information Extraction Techniques	45
2.3.1 Spectral Classification	45
2.3.2 Supervised Classification	47
2.3.3 Unsupervised Classification	48
2.4 Merged Imagery	48
2.5 Summary	49
References and Further Reading	50

Chapter 3 Image Interpretation Techniques:	
Exposed Structures	53
3.1 Definitions and Classification	53
3.2 Analysis of Exposed Folds	54
3.2.1 Dip and Strike of Inclined Bedrock Strata	54
3.2.2 Landforms Related to Inclined Bedrock Strata	56
3.2.3 Shadowing Effects	57
3.2.4 Geomorphic Expressions of Different Fold Types	57
3.2.5 Complications in the Expressions of Folded Strata	65
3.3 Analysis of Exposed Faults	66
3.3.1 Surface Expressions of Fault Scarps	66
3.3.2 Geomorphic Expressions of Different Fault Types	68
3.3.2.1 Multidirectional Positive	68
3.3.2.2 Parallel Composite	69
3.3.2.3 Linear Negative	69
3.3.2.4 Sinuous Positive	69
3.3.3 Modification of Fault-Line Traces	69
3.3.3.1 Inverted	69
3.3.3.2 Pseudo-Fault	70
3.3.3.3 Polyphase	70
3.4 Surface and Structural Patterns of Different Structural Styles	70
3.4.1 Compressional vs. Extensional Basement-Involving Fault Block Styles	71
3.4.2 Wrench Fault Assemblages	73
3.4.3 Décollement Thrust Fault Assemblages	74
3.4.4 Regional Structural Analysis	75
3.4.5 Reactivated Structures and Superimposed Styles	75
3.4.6 Word of Caution	79
3.5 Summary	79
References and Further Reading	80

Chapter 4 Image Interpretation Techniques:

Obscured and Buried Structures	83
4.1 Introduction	83
4.1.1 Mechanisms of Surface Expression	83
4.2 Analysis Criteria	86
4.2.1 Structurally Controlled Streams	86
4.2.2 Structurally Controlled Streams Related to Piping and Sapping	90
4.2.3 Brightness and Spectral Variations	96
4.2.4 Classification and Analysis of Lineaments and Linear Features	102
4.2.4.1 Lineament Analysis	102
4.2.4.2 Analysis of Linear Features	105
4.3 Reconstruction Techniques	107
4.3.1 Topographic Models of Obscured and Buried Folded Strata	107
4.3.2 Geomorphic Investigation of Domal Topography	109
4.3.3 Subsurface Reconstruction of Domal Topography	109
4.4 Summary	112
References and Further Reading	112

Chapter 5 Interpretation Techniques:

Detection and Analysis of Basement Warp Structures ..	115
5.1 Introduction	115
5.2 Previous Studies	115
5.3 Principles of Integrating Reconnaissance Data Sets	116
5.4 Classification of Basement Structures	118
5.4.1 Exposed Basement Structures	118
5.4.1.1 First-Order Basement Structures	118
5.4.1.2 Second-Order Basement Structures	118
5.4.1.3 Third-Order Basement Structures	122
5.4.2 Basement Warp Structures (Buried and Obscured)	122
5.4.2.1 First-Order Basement Warp Structures ..	122
5.4.2.2 Second-Order Basement Warp Structures	123
5.4.2.3 Third-Order Basement Warp Structures	123
5.5 Diagnostic Surface Features of Basement Warp Structures	124
5.5.1 Subsequent Incised Valleys	125
5.5.2 Transverse Incised Valleys	126
5.5.3 Cuesta Topography	129
5.6 Specialized Interpretation Tools	129
5.6.1 Structurally Controlled Incised Valleys in the Belle Fourche Arch Area, Powder River Basin	131
5.6.1.1 Introduction	131
5.6.1.2 Surface and Subsurface Expressions of the Belle Fourche Arch	131
5.6.1.3 Geological Model of the Belle Fourche Arch	136
5.6.1.4 Exploration Application	137
5.7 Summary	138
References and Further Reading	140

Chapter 6 Interpretation Techniques:

Structural Mapping with Stereo Data	143
6.1 Introduction	143
6.2 Principles of Stereo	143
6.2.1 Concepts of Visual Depth Perception ...	143
6.2.2 Concepts of Simulated Depth Perception	144
6.2.3 Common Stereoscopic Distortions	144
6.2.3.1 Vertical Exaggeration	144
6.2.3.2 Pseudoscopic Illusions	145
6.3 Principles for Geological Mapping with Stereo Data	146
6.3.1 The Floating Dot Principle and Parallax Bars	146
6.3.2 Quantitative Measurements of Dips and Strikes	147
6.3.3 Creating a Form-Line Surface Structure (FSS) Map	147
6.4 Tools for Geological Mapping with Stereo Data ..	149
6.4.1 Stereo Pair Alignment	149
6.4.2 Simple Optical Stereoscopes	149
6.4.3 Complex and Analytical Stereoscopes ..	150
6.4.4 Digital Image Correlation	151
6.5 Evaluation of Different Stereo Data	153
6.5.1 SPOT vs. High-Altitude Photography in Low Relief Areas	153
6.5.2 SPOT vs. Field Data in Highly Deformed Areas	159
6.6 Exploration Applications	161
6.7 Selecting Stereo Data for Structural Mapping ..	165
6.8 Incorporating Stereo Capabilities	167
6.9 Summary	167
References and Further Reading	168

Chapter 7 Structural Analysis of Sedimentary Basins .. 171

7.1 Introduction	171
7.2 Approach	171
7.3 Analysis of Fractured Reservoir Trends in the Swiss Molasse Basin	172
7.3.1 Objectives	172
7.3.2 Approach	173
7.3.3 Geological Settings of the Molasse Basin	173
7.3.4 Exploration in the Swiss Molasse	178
7.3.5 Regional Analysis of Satellite Imagery	179
7.3.6 Analysis of the Basin's Margins	180
7.4 Basin Interior	180
7.4.1 Subsurface Data	181
7.4.2 Swiss Molasse Play Concept	181
7.4.3 Prospective Leads from the Swiss Molasse	183
7.5 Detection of Buried Triassic Basins in the Coastal Plains of the Eastern United States	184
7.5.1 Objectives	184
7.5.2 Geological Setting of the Mesozoic Basins	184
7.5.3 Satellite Imagery Interpretation	188

7.5.4 Regional Gravity and Magnetic Data Interpretation	190
7.6 Detailed Analysis of Known Buried Basins	191
7.6.1 Geological/Geophysical Model of Buried Triassic Basins	193
7.6.2 Structural Lead Map	193
7.6.3 Conclusions and Recommendations	194
7.7 Summary	196
References and Further Reading	196
Chapter 8 Other Applications	199
8.1 Introduction	199
8.2 Principles of Direct Detection of Hydrocarbons	199
8.2.1 Prototype Example – The Velma Field, Oklahoma	199
8.2.1.1 Background Information	199
8.2.1.2 Surface Manifestations	202
8.2.1.3 Imagery	202
8.2.2 Other Related Studies	204
8.2.2.1 Conclusions	204
8.3 Outcrop Studies	204
8.4 Logistical and Environmental Applications	207
8.5 Summary	209
References and Further Reading	209
Closing Remarks	211
Part 2 Additional Examples of Remote Sensing Interpretation and Integration	
Introduction	215
Chapter 9 The Salt Flat Graben, West Texas	217
9.1 Background	217
9.2 Objectives	217
9.3 Training Instructions	217
9.3.1 Interpretation Procedures	217
9.3.2 Questions	217
References and Further Reading	218
Chapter 10 Death Valley Region, Nevada and California	225
10.1 Background	225
10.2 Objectives	225
10.3 Training Instructions	225
10.3.1 Interpretation Procedures	225
10.3.2 Questions	225
References and Further Reading	226
Chapter 11 The Fort St. John Graben, Western Canada	239
11.1 Background	239
11.2 Objectives	239
11.3 Training Instructions	239
11.3.1 Interpretation Procedures	239
11.3.2 Questions	239
References and Further Reading	240

Chapter 12 The Canadian Foreland Fold and Thrust Belt, Northern British Columbia	249
12.1 Background	249
12.2 Objectives	249
12.3 Training Instructions	249
12.3.1 Interpretation Procedures	249
12.3.2 Questions	250
References and Further Reading	250
Chapter 13 The Paris Basin, France	263
13.1 Background	263
13.2 Objectives	263
13.3 Training Instructions	263
13.3.1 Interpretation Procedures	263
13.3.2 Questions	263
References and Further Reading	264
Chapter 14 The East Texas Region	277
14.1 Background	277
14.2 Objectives	277
14.3 Training Instructions	277
14.3.1 Interpretation Procedures	277
14.3.2 Questions	277
References and Further Reading	278

Appendices

A. List of Symbols Used in the Interpretation of Imagery Data	295
B. Abbreviations Used on Image	296
C. Drainage Patterns	297
D. Major Sources of Images	301
Glossary	307
Location Index	313
Subject Index	315
