

Table of contents

Preface	vii
Structurable algebras and the construction of simple Lie algebras <i>B. N. Allison</i>	1
Algebraic systems in differential geometry <i>J. Dorfmeister</i>	9
Fonctions spéciales sur une algèbre de Jordan <i>J. Faraut</i>	35
Geometry and algebraic structures <i>J. R. Faulkner</i>	55
Bounded symmetric domains and the JB^* -triple structure in physics <i>Y. Friedman</i>	61
Recent results on finiteness conditions in Jordan pairs <i>O. Loos</i>	83
Jordan structures in analysis <i>A. Rodríguez Palacios</i>	97
Max Koecher's work on Jordan algebras <i>H. P. Petersson</i>	187
Albert algebras <i>H. P. Petersson and M. L. Racine</i>	197
Structure of JB^* -triples <i>B. Russo</i>	209
The classification of the simple Lie algebras over algebraically closed fields with positive characteristic <i>H. Strade</i>	281
Jordan algebras, complex analysis and quantization <i>H. Upmeyer</i>	301
Algebraic structures and differential equations <i>S. Walcher</i>	319
On linear groups and Lie algebras over arbitrary rings <i>E. Zelmanov</i>	327
List of Contributors	337
List of Participants	338
