Part I Stellar Structure, Nucleosynthesis and Evolution of Low and Intermediate-mass Stars

Stellar Structure and Evolution: An Introduction

C. Simon Jeffery 3

Nucleosynthesis of Low and Intermediate-mass Stars

Amanda I. Karakas 107

Spectral Classification: Old and Contemporary

Sunetra Giridhar 165

Part II Massive Stars, Core Collapse, Explosive Nucleosynthesis

Weak Interaction Rates for Stellar Evolution, Supernovae and r -Process Nucleosynthesis

Kamales Kar 183

Massive stars as thermonuclear reactors and their explosions following core collapse

Alak Ray 209

The Evolution of Massive Stars and the Concomitant Non-explosive and Explosive Nucleosynthesis

Marcel Arnould 277

Part III Cosmochemistry and Solar System Abundances

Cosmochemistry

Bruce Fegley, Jr., Laura Schaefer 347

Solar System Abundances of the Elements

Katharina Lodders 379

Cosmochemistry: A Perspective

Aruna Goswami 419
