Part 1. Boundary layers and shear flows

Nonlinear interactions between oblique instability waves on nearly parallel shear flows	3
<i>M. E. Goldstein</i>	
Nonlinear breakdown of laminar boundary layer	21
<i>Y.S. Kachanov</i>	
The development of nonlinear oscillations in a boundary layer and the onset of random disturbances	52
<i>Oleg S. Ryzhov</i>	
Experimental study of nonlinear stages of a boundary layer breakdown	69
<i>V.I. Borodulin and Y.S. Kachanov</i>	
Asymptotic analysis of resonant interactions in a boundary layer	81
<i>A.P. Khokhlov</i>	
Stability and transition to turbulence in 2-D boundary layer under the influence of adverse pressure gradients	86
<i>V.S. Kosorygin</i>	
Computational aspects of nonparallel effects in boundary-layer receptivity	98
<i>Nay Lin, Thomas A. Buter, David A. Fuciarelli and Helen L. Reed</i>	
Influence of Pressure Gradient on the Nonlocalized receptivity of boundary layers	106
<i>J. D. Crouch</i>	
Strongly nonlinear oblique-wave solutions in wall-bounded shear flows	117
<i>W. Koch</i>	
Nonlinear spatial dynamics in a growing boundary layer	127
<i>J.J. Healey</i>	
Weakly-nonlinear evolution of a nearly-plane wave in the boundary layer of a flat plate	137
<i>S.L. Woodruff and A.F. Messiter</i>	
The nonlinear evolution of modulated waves in a boundary layer	147
<i>F.N. Shaikh and M. Gaster</i>	

A new technique of Tollmien-Schlichting wave cancellation in a sound-exposed boundary layer	160
<i>S. V. Manuilovich</i>	
Numerical simulation of the high Reynolds number flow in the non-uniform duct	164
<i>S. Takahashi and T. Kawamura</i>	
The convergence for nonlinear Galerkin method in fluid dynamics system	174
<i>Huang Aixiang</i>	

Part 2. Compressibility and thermal effects

Thermal convection in fluid layers with nonuniform thickness or surface temperature	183
<i>R.E. Kelly</i>	
Experiments on the nonlinear instability of supersonic boundary layers	196
<i>A.D. Kosinov, N.V. Semionov, S.G. Shevel'kov and O.I. Zinin</i>	
Excitation of instability waves in the supersonic boundary layer by sound	206
<i>S.A. Gaponov</i>	
Some problems in the shock wave turbulent boundary layer interactions	213
<i>C.B. Lee, Q.X. Lian and Wang Shifen</i>	
Nonlinear stability of a Mach 1.6 flat plate boundary layer	232
<i>C.L. Chang and M.R. Malik</i>	
Numerical simulation of thermal boundary layer instabilities in porous media	242
<i>D.A.S. Rees</i>	

Part 3. Vortices and wakes

Nonlinear instability of free shear layers: subharmonic resonance and three dimensional vortex dynamics	251
<i>Wade Schoppa, Hyder Husain and Fazle Hussain</i>	
The instability of Long's vortex	281
<i>P.G. Drazin, W.H.H. Banks and M.B. Zaturka</i>	
On the secondary instability of the most dangerous Görtler vortex	290
<i>S. R. Otto and James P. Denier</i>	
The nonlinear stability of vortex flows and vortex breakdown	300
<i>S.J. Tang, F.G. Zhuang and T.D. Hsing</i>	

On the onset of nonsteadiness in the flows with vortex breakdown in a cylindrical container.....	310
<i>N. Tsitverblit and E. Kit</i>	
Stability of nonparallel periodic flow with bottom friction.....	320
<i>Y. Murakami, H Fukuta and K. Gotoh</i>	
Nonlinear effects of 2-D and 3-D disturbances on laminar separation bubbles.....	330
<i>Ulrich Rist</i>	
Coherent vortical structures in plane far wakes at moderate Reynolds numbers.....	340
<i>Oleg A. Likhachev</i>	
A mechanism for oblique wave resonance in the far wake.....	350
<i>C.H.K. Williamson and A. Prasad</i>	

Part 4. Nonlinear waves and jets

Stability of nonlinear waves resonantly sustained.....	367
<i>Theodore Y. Wu</i>	
The stability of some three-dimensional and time-dependent flows....	382
<i>A.D.D. Craik</i>	
On the stability of standing solitons in Faraday resonance.....	397
<i>Gary S. Guthart and T. Yao-Tsu Wu</i>	
Quasi-stationary wave evolution on a falling film.....	407
<i>H.C. Chang, M. Cheng, E. Demekhin and E. N. Kalaidin</i>	
Instabilities in a three-dimensional heated draining film.....	425
<i>Sang W. Joo and Stephen H. Davis</i>	
Long-disturbance stability of nonlinear wave regimes in a falling liquid film.....	436
<i>O. Yu. Tsvetodub</i>	
Bifurcation cascade in a diverging flow.....	449
<i>Vladimir Shtern and Fazle Hussain</i>	
Nonlinear dynamics of forced transitional jets: Temporal attractors and transitions to chaos.....	459
<i>George Broze and Fazle Hussain</i>
