Isolation, Identification, and Structure Elucidation of Alkaloids

A General Overview

R. VERPOORTE and J. SCHRIPEMA

1 Introduction	1
2 Isolation	2
2.1 Extraction	2
2.2 Chromatography	3
2.3 Artifacts	4
2.4 Selective Detection	4
3 Identification and Structure Elucidation	5
3.1 Spectroscopic Method	6
3.1.1 UV (Ultraviolet)	6
3.1.2 IR (Infrared)	7
3.1.3 ORD and CD (Optical Rotation Dispersion and Circular Dichromism)	8
3.1.4 X-Ray Crystallography	9
3.1.5 MS (Mass Spectrometry)	10
3.1.6 NMR (Nuclear Magnetic Resonance)	11
3.1.7 ^1H -NMR	13
3.1.8 ^{13}C -NMR	14
3.1.9 2D-NMR	14
4 Strategy	20
5 Future Prospects	21
References	22

Inverse-Detected 2D-NMR Applications in Alkaloid Chemistry

G.E. MARTIN and R.C. CROUCH

1 Introduction	25
2 Historical Background	26
3 Suppression of Unwanted Magnetization Arising from ^1H – ^{12}C Species	26

4 Inverse-Detected One-Bond Heteronuclear Shift Correlation Experiments	27
4.1 HMQC	27
4.2 DEPT-HMQC	29
4.3 HSQC	29
4.4 HMQC Using Spin-Locking Fields	30
4.5 Comparison of the Available Inverse-Detected One-Bond Heteronuclear Correlation Experiments	30
5 Long-Range Heteronuclear Chemical Shift Correlation – HMBC ..	33
6 HMQC-TOCSY and Other Hyphenated Inverse-Detected 2D Experiments	36
6.1 Interpretation of HMQC-TOCSY Spectra	38
6.2 Modifications of the HMQC-TOCSY Experiment – Inverted Direct Responses	42
6.3 DEPT-HMQC-TOCSY	44
6.4 Suppression of Direct Responses in HMQC-TOCSY Spectra ...	46
7 Other Inverse-Detected NMR Experiments – Selective and F_1 Region-Selected Experiments	47
7.1 Selective One-Dimensional Analogs of HMBC – SIMBA	47
7.2 One-Dimensional HMQC-TOCSY	52
7.3 F_1 Region-Selected HMBC	52
7.4 HMQC-NOESY and HMQC-ROESY	53
8 Sample Requirements	55
9 Applications of Inverse-Detected NMR Techniques to Alkaloid Chemistry. Structural Problems	56
9.1 Terrestrial Alkaloids	56
9.1.1 Carbazole Alkaloids	57
9.1.2 Indolizidine Alkaloids	58
9.1.3 Diterpene Alkaloids	59
9.1.4 Indole-Derived Alkaloids	59
9.1.5 Pyrrole, Imidazole, Pyrrolizidine, Pyridine, and Related Alkaloids	68
9.2 Marine Alkaloids	70
9.2.1 Quinoline Alkaloids	71
9.2.2 Acridine Alkaloids	73
9.2.3 Tetrahydroisoquinoline Alkaloids	75
9.2.4 Pyrrole and Imidazole-Derived Alkaloids	75
9.2.5 Pyridine-Containing Alkaloids	78
9.2.6 Indole Alkaloids	79
9.2.7 Carbazole Alkaloids	79
9.2.8 Oxazole/Thiazole Containing Alkaloids	80
9.2.9 Bromotyrosine/Bromodopamine-Derived Alkaloids	81
9.2.10 Guanidine-Derived Alkaloids	82

10 Conclusion	83
References	84

Electrochemical Detection of Alkaloids in HPLC

V.-P. RANTA, J.C. CALLAWAY, and T. NARRANLAHTI

1 Introduction	91
2 Principles of HPLC with Electrochemical Detection	92
2.1 Basic Principles of Electrochemical Detection	92
2.2 Electroactive Functional Groups in Alkaloids	93
2.3 Mobile Phase	93
2.3.1 Conductivity	93
2.3.2 Background Current and Noise	94
2.3.3 pH	94
2.4 Electrode Materials and Flow Cells	95
2.5 Selection of Applied Potential	97
3 Methods of Detection in Plants	99
3.1 Psilocin and Psilocybin in Fungi	99
3.2 Hordenine in Germinating Barley	101
3.3 <i>Catharanthus</i> Alkaloids in Cell Culture	102
3.4 Atropine in <i>Belladonna</i> Preparations	105
3.5 Castanospermine in Leaves	105
4 Possible Methods for Detecting Other Alkaloids	107
4.1 Opium Alkaloids	107
4.2 Physostigmine	110
4.3 Coca Alkaloids	111
4.4 Sparteine	111
5 Conclusions and Future Directions	112
References	112

Gas Chromatography in the Analysis of Alkaloids

D. DAGNINO and R. VERPOORTE

1 Introduction	115
2 Pyrrolizidine Alkaloids	116
3 Quinolizidine Alkaloids	119
4 Tropane Alkaloids	120
5 Quinoline Alkaloids	123
6 Morphinan Alkaloids	124
7 Terpenoid Indole Alkaloids	124

8 Ergot Indole Alkaloids	125
9 Steroidal Alkaloids	127
10 Diterpenoid Alkaloids	129
11 Other Alkaloids	129
12 Conclusion	131

Alkaloid Analysis in Flue-Cured Tobacco

C. A. WILKINSON and W. W. WEEKS

1 Introduction	137
2 Factors Affecting Alkaloid Concentration	138
3 Methods of Analysis of Tobacco Alkaloids	139
3.1 Steam Distillation	139
3.2 Autoanalyzer	140
3.3 Chromatographic Analysis of Tobacco Alkaloids	142
3.3.1 Paper Chromatography	143
3.3.2 Paper Chromatography – Ultraviolet Spectrophotometer	144
3.3.3 Thin-Layer Chromatography	144
3.3.4 Gas Chromatography	145
3.3.5 High Performance Liquid Chromatography	148
3.4 Cundiff-Markunas Extraction Method	148
3.5 Alternative Methods	149
4 Summary	150
References	150

Assessment of Burley and Dark Tobacco Alkaloids During Storage, Aging, and Fermentation

R. A. ANDERSEN

1 Importance of Pyridine Alkaloids to Tobacco Quality and Usability	153
2 Importance of Storage, Aging, and Fermentation	153
3 Chemical Analyses	154
3.1 Total Tobacco Alkaloids	154
3.2 Individual Tobacco Alkaloids	156
3.3 Nitrite	158
3.4 Calcium	159
3.5 Moisture	160

Methods for Production of Alkaloids in Root Cultures and Analysis of Products

J.D. HAMILL and A.J. PARR

1 Introduction	191
2 Induction of Transformed Roots	193
2.1 Choice of Bacterial Strains	193
2.2 Culture of Bacteria	194
2.3 Transformation of Plant Tissues	194
2.4 Culture of Root Tissues and Decontamination	196
2.5 Growth and Maintenance of Root Cultures	197
2.6 A Protocol for Cryopreservation of Transformed Roots of <i>Nicotiana rustica</i>	199
3 Proof of Transformation	200
3.1 DNA Extraction from Transformed Roots	200
3.1.1 "Pure DNA" Isolation Procedure	201
3.1.2 DNA "Miniprep" Method	201
3.2 Detection of T-DNA	202
3.2.1 Sources of Probes	202
3.2.2 Recovery of DNA from Agarose Gels	203
3.3 Southern Blotting to Detect T-DNA in Tissues of Plant Material	203
3.4 DNA Labeling and Hybridization	204
3.4.1 Labeling Buffer	205
3.4.2 DNA Labeling	205
3.5 DNA Hybridization	205
3.6 Detection of T-DNA by Polymerase Chain Reaction (PCR) ...	206
4 Alkaloid Extraction and Quantification	208
