1	Probabilistic assessment of knowledge	1
	<i>Jean-Paul Doignon</i>	
1.1	Introduction	1
1.2	Knowledge structures	3
1.3	Surmise relations	5
1.4	Relationship between surmise relations and a class of knowledge structures	8
1.5	Surmise systems	11
1.6	Surmise systems and knowledge spaces	14
1.7	Well-graded knowledge spaces	18
1.8	Deterministic assessment procedures	23
1.9	A setting for probabilistic assessment	26
1.10	Questioning rule	30
1.11	Marking rule	32
1.12	Unitary processes	34
1.13	Basics of Markov chains	36
1.14	General results	40
1.15	Some other examples	43
1.16	Another model for probabilistic assessment	50
1.17	Computer simulations	50
1.18	Conclusions	52
2	Combinatorial structures for the representation of knowledge	59
	<i>Cornelia E. Dowling</i>	
2.1	Introduction	59
2.2	Representing judgments with a relation	61
2.3	Representing of judgments by knowledge and failure spaces . . .	62
2.4	Combinatorial Galois connections	66
2.5	The relationship between implication relations and knowledge spaces	70
2.6	A procedure facilitating an expert's judgments	74

3	Establishing knowledge spaces by systematical problem construction	81
	<i>Dietrich Albert and Theo Held</i>	
3.1	Introduction	81
3.2	Knowledge spaces	84
3.3	'Component-based' establishment of surmise relations	87
3.3.1	Union and intersection based rules	87
3.3.2	Product formation based rules	90
3.3.3	Comments and reflections on the concept of problem components	94
3.4	Empirical examples	96
3.4.1	Construction and solution of chess problems	96
3.4.2	Continuing a series of numbers	103
3.5	Relation to decision theory	109
3.6	Summary	111
4	Semantic structures	117
	<i>Jürgen Heller</i>	
4.1	Introduction	117
4.2	Previous work	118
4.2.1	Dimensional representations: Semantic space	119
4.2.2	Feature representations	120
4.3	Formalizing semantic structures	122
4.3.1	Partial orders	123
4.3.2	Lattices	126
4.3.3	Concept lattices	127
4.3.4	Lattice algebra	132
4.3.5	Homomorphisms and congruences	135
4.3.6	Supplementary Problems	137
4.4	A method for assessing semantic structures	138
4.4.1	Theory	138
4.4.2	Experimental paradigm	141
4.4.3	An empirical application	141
4.5	General discussion	146
5	Operations on cognitive structures — their modeling on the basis of graph theory	151
	<i>Erdmute Sommerfeld and Fred Sobik</i>	
5.1	Knowledge representation — the problem of formation and transformation	151
5.2	Graphs and structural information in knowledge psychology	152
5.3	Structural information — representation and interpretation	154
5.4	Systematization and formalization of cognitive structure transformations	165
5.4.1	Elementary graph transformations	167

5.4.1	Elementary graph transformations	167
5.4.2	Formalization of cognitive structure transformations without change of structural information content	170
5.4.3	Formalization of cognitive structure transformations with enlargement of structural information content . . .	173
5.4.4	Formalization of cognitive structure transformations with reduction of structural information content	177
5.4.5	Formalization of cognitive structure transformations with enlargement and reduction of structural information content	180
5.4.6	Application to psychological problems	185
5.5	Summary	190
6	Process knowledge in Production Systems	197
	<i>Cees Witteveen</i>	
6.1	Introduction	197
6.2	Production Systems	198
6.2.1	A general description of Production Systems	199
6.2.2	A preview of the control identification problem	200
6.3	Preliminaries and notations	202
6.4	Programmed Production Systems	204
6.4.1	Behavior of a PPS	207
6.5	Finding a minimal control structure	211
6.6	Inferring a PPS from a finite set of traces	215
6.6.1	Samples and failure sets	215
6.6.2	Context-complete samples	220
6.7	Discussion	226
6.7.1	Applications	226
6.7.2	Further research	226
6.7.3	Suggestions for further reading	227
7	Phenomena of self-organization	229
	<i>Hermann Rodenhausen</i>	
7.1	Introduction	229
7.2	Empirical observations and computer simulations	230
7.3	Formalization of the self-organization process	233
7.4	Mathematical formulation of the ordering property	236
7.5	Appendix	243
	Author Index	247
	Subject Index	251
